Table of Contents

Preface .................................................................................................................................................. xiii

Acknowledgment .................................................................................................................................. xvii

Chapter 1
Human Motion Tracking in Video: A Practical Approach ................................................................. 1
   Tony Tung, Kyoto University, Japan
   Takashi Matsuyama, Kyoto University, Japan

Chapter 2
Learning to Recognise Spatio-Temporal Interest Points ................................................................. 14
   Olusegun T. Oshin, University of Surrey, UK
   Andrew Gilbert, University of Surrey, UK
   John Illingworth, University of Surrey, UK
   Richard Bowden, University of Surrey, UK

Chapter 3
Graphical Models for Representation and Recognition of Human Actions .................................... 31
   Pradeep Natarajan, BBN Technologies, USA
   Ramakant Nevatia, The University of South California, USA

Chapter 4
Common Spatial Patterns for Real-Time Classification of Human Actions ..................................... 55
   Ronald Poppe, University of Twente, The Netherlands

Chapter 5
KSM Based Machine Learning for Markless Motion Capture ......................................................... 74
   Therdsak Tangkuampien, Monash University, Australia
   David Suter, Monash University, Australia
Chapter 6
Multi-Scale People Detection and Motion Analysis for Video Surveillance

YingLi Tian, The City College of City University of New York, USA
Rogerio Feris, IBM T. J. Watson Research Center, USA
Lisa Brown, IBM T. J. Watson Research Center, USA
Daniel Vaquero, University of California, Santa Barbara, USA
Yun Zhai, IBM T. J. Watson Research Center, USA
Arun Hampapur, IBM T. J. Watson Research Center, USA

Chapter 7
A Generic Framework for 2D and 3D Upper Body Tracking

Lei Zhang, Rensselaer Polytechnic Institute, USA
Jixu Chen, Rensselaer Polytechnic Institute, USA
Zhi Zeng, Rensselaer Polytechnic Institute, USA
Qiang Ji, Rensselaer Polytechnic Institute, USA

Chapter 8
Real-Time Recognition of Basic Human Actions

Vassilis Syriris, Aristotle University of Thessaloniki, Greece

Chapter 9
Fast Categorisation of Articulated Human Motion

Konrad Schindler, TU Darmstadt, Germany
Luc van Gool, ETH Zürich, Switzerland ESAT/PSI-IBBT, K. U. Leuven, Belgium

Chapter 10
Human Action Recognition with Expandable Graphical Models

Wanqing Li, University of Wollongong, Australia
Zhengyou Zhang, Microsoft Research, Redmond, USA
Zicheng Liu, Microsoft Research, Redmond, USA
Philip Ogunbona, University of Wollongong, Australia

Chapter 11
Detection and Classification of Interacting Persons

Scott Blunsden, European Commission Joint Research Centre, Italy
Robert Fisher, University of Edinburgh, UK

Chapter 12
Action Recognition

Qingdi Wei, National Laboratory of Pattern Recognition, Institute of Automation, CAS, Beijing, China
Xiaoqin Zhang, National Laboratory of Pattern Recognition, Institute of Automation, CAS, Beijing, China
Weiming Hu, National Laboratory of Pattern Recognition, Institute of Automation, CAS, Beijing, China
Chapter 13
Distillation: A Super-Resolution Approach for the Selective Analysis of Noisy and Unconstrained Video Sequences ................................................................. 244

Dong Seon Cheng, University of Verona, Italy
Marco Cristani, University of Verona, Italy
Vittorio Murino, University of Verona, Italy

Compilation of References ............................................................................... 265

About the Contributors .................................................................................... 286

Index .............................................................................................................. 295
