Table of Contents

Preface .................................................................................................................................................... xiv

Acknowledgment .................................................................................................................................... xix

Section 1
The Puzzle: Broad Theoretical Approaches to Word Learning

Chapter 1
A Dynamic Neural Field Model of Word Learning ................................................................. 1
   Larissa K. Samuelson, University of Iowa, USA
   John P. Spencer, University of Iowa, USA
   Gavin W. Jenkins, University of Iowa, USA

Chapter 2
Timing Matters: Dynamic Interactions Create Sensitive Periods for Word Learning............... 28
   Lakshmi Gogate, Florida Gulf Coast University, USA
   George Hollich, Purdue University, USA

Chapter 3
Pushing the Envelope of Associative Learning: Internal Representations and Dynamic
   Competition Transform Association into Development ............................................................. 49
   Bob McMurray, University of Iowa, USA
   Libo Zhao, University of Iowa, USA
   Sarah C. Kucker, University of Iowa, USA
   Larissa K. Samuelson, University of Iowa, USA

Chapter 4
How Experiences with Words Supply All the Tools in the Toddler’s Word-Learning Toolbox ....... 81
   Carmel Houston-Price, University of Reading, UK
   Beth Law, University of Reading, UK

Chapter 5
Learning Words from Experience: An Integrated Framework.................................................... 109
   Annette M. E. Henderson, University of Auckland, New Zealand
   Mark A. Sabbagh, Queen’s University, Canada
Section 2
The Embodied Experience: Multiple Levels of Influence on Word Learning

Chapter 6
A Sensory-Motor Solution to Early Word-Referent Learning ........................................................ 133
Chen Yu, Indiana University, USA
Linda B. Smith, Indiana University, USA

Chapter 7
The Miracle Year: From Basic Structure to Social Communication ................................................... 153
Heather Bortfeld, University of Connecticut, USA & Haskins Laboratories, USA
Kathleen Shaw, University of Connecticut, USA
Nicole Depowski, University of Connecticut, USA

Chapter 8
An Embodied Model of Young Children’s Categorization and Word Learning ........................................ 172
Katherine E. Twomey, University of Sussex, UK
Jessica S. Horst, University of Sussex, UK
Anthony F. Morse, University of Plymouth, UK

Chapter 9
Developmental Language Learning from Human/Humanoid Robot Social Interactions:
An Embodied and Situated Approach ...................................................................................................... 197
Artur M. Arsénio, Universidade Técnica de Lisboa, Portugal

Chapter 10
Making Use of Multi-Modal Synchrony: A Model of Acoustic Packaging to Tie Words to Actions ................................................................. 224
Britta Wrede, Bielefeld University, Germany
Lars Schillingmann, Bielefeld University, Germany
Katharina J. Rohlfing, Bielefeld University, Germany

Section 3
Organismic Processes and Mechanisms of Word Learning

Chapter 11
Development of Word Recognition across Speakers and Accents ......................................................... 242
Karen E. Mulak, University of Western Sydney, Australia
Catherine T. Best, University of Western Sydney, Australia & Haskins Laboratories, USA

Chapter 12
A Neurorobotics Approach to Investigating Word Learning Behaviors ........................................... 270
Richard Veale, Indiana University, USA
Chapter 13
Learning Words by Imitating ................................................................. 296

Thomas Cederborg, INRIA, France
Pierre-Yves Oudeyer, INRIA, France

Chapter 14
I Think I Have Heard That One Before: Recurrence-Based Word Learning with a Robot .......... 327

Yo Sato, University of Hertfordshire, UK
Ze Ji, University of Hertfordshire, UK
Sander van Dijk, University of Hertfordshire, UK

Chapter 15
Two Distinct Sequence Learning Mechanisms for Syntax Acquisition and Word Learning .......... 350

Anne McClure Walk, Saint Louis University, USA
Christopher M. Conway, Georgia State University, USA

Compilation of References .................................................................................. 370

About the Contributors ......................................................................................... 420

Index ..................................................................................................................... 429
