Table of Contents

Preface .................................................................................................................................................. xi

Section 1
Ontology Engineering and Knowledge

Chapter 1
Online Semantic Knowledge Management for Product Design Based on Product Engineering
Ontologies ................................................................................................................................................ 1
   Lijuan Zhu, Washington State University, USA
   Uma Jayaram, Washington State University, USA
   Okjoon Kim, Washington State University, USA

Chapter 2
A Theory of Social Agentivity and its Integration into the Descriptive Ontology for Linguistic
and Cognitive Engineering .................................................................................................................. 27
   Edward Heath Robinson, The University of South Florida, USA

Chapter 3
AL-QuIn: An Onto-Relational Learning System for Semantic Web Mining ............................... 52
   Francesca A. Lisi, Università degli Studi di Bari “Aldo Moro”, Italy

Section 2
Reasoning and Ontology Development

Chapter 4
Semi-Automatic Ontology Construction by Exploiting Functional Dependencies and Association
Rules ..................................................................................................................................................... 76
   Luca Caglieri, Politecnico di Torino, Italy
   Tania Cerquitelli, Politecnico di Torino, Italy
   Paolo Garza, Politecnico di Milano, Italy
Chapter 5
Concept Induction in Description Logics Using Information-Theoretic Heuristics
Nicola Fanizzi, University of Bari, Italy

Chapter 6
Using Similarity-Based Approaches for Continuous Ontology Development
Maryam Ramezani, SAP Research, Germany

Chapter 7
A Modal Defeasible Reasoner of Deontic Logic for the Semantic Web
Efstratios Kontopoulos, Aristotle University of Thessaloniki, Greece
Nick Bassiliades, Aristotle University of Thessaloniki, Greece
Guido Governatori, NICTA, Australia
Grigoris Antoniou, FORTH, Greece

Section 3
Web of Data and Applications

Chapter 8
Data Linking for the Semantic Web
Alfio Ferraram, Università degli Studi di Milano, Italy
Andriy Nikolov, The Open University, UK
François Scharffe, University of Montpellier, France

Chapter 9
ACRONYM: Context Metrics for Linking People to User-Generated Media Content
Fergal Monaghan, SAP Research, UK
Siegfried Handschuh, National University of Ireland, Galway, Ireland
David O’Sullivan, National University of Ireland, Galway, Ireland

Chapter 10
An Enhanced Semantic Layer for Hybrid Recommender Systems: Application to News Recommendation
Iván Cantador, Universidad Autónoma de Madrid, Spain
Pablo Castells, Universidad Autónoma de Madrid, Spain
Alejandro Bellogín, Universidad Autónoma de Madrid, Spain

Chapter 11
Numeric Query Answering on the Web
Steven O’Hara, University of Texas at San Antonio, USA
Tom Bylander, University of Texas at San Antonio, USA
Chapter 12
Semantics Discovery via Human Computation Games ................................................................. 286

Jakub Šimko, Slovak University of Technology, Slovak Republic
Michal Tvarožek, Slovak University of Technology, Slovak Republic
Mária Bieliková, Slovak University of Technology, Slovak Republic

Compilation of References ............................................................................................................. 309

About the Contributors .................................................................................................................... 335

Index............................................................................................................................................. 339
