First and foremost, we would like to thank all the chapter authors who have contributed their research results to this book. Without their efforts this book would not exist. We also owe a debt of gratitude to the reviewers who have provided valuable comments on the book chapters. We would also like to acknowledge the members of the Editorial Advisory Board for their assistance and constructive comments. Last but not least, special thanks are given to Mr. Joel Gamon of IGI Global for his assistance in the book preparation.
