Acknowledgment

We are grateful for those whose support allowed us to complete this collection of chapters related to the practical use of technology in the literacy classroom. We are especially thankful for our chapter contributors who responded to repeated requests for revisions and other materials to complete this volume.

To our reviewers, thank you for evaluating chapter submissions for practical, hands-on application of technology in the literacy classroom. To our dean, department chairpersons, and colleagues at the University of Central Arkansas, thank you for all of your encouragement.

We would like to thank IGI Global for allowing us the opportunity to develop our concept into reality, for their prompt response to questions and concerns, and for their competence and expertise.

A special thank you goes to our families for their patience as we took time away from them to edit this book. We could not have done it without their support.
