We would like to acknowledge the help of all involved in the collation and re-
view process of the book, without whose support the project could not have
been satisfactorily completed.

Most of the authors of the chapters included in this book also served as refer-
ees for articles written by other authors. Thanks go to all those who provided
constructive and comprehensive reviews.

Special thanks also go to the publishing team at Idea Group Inc. In particular to
Kristin Roth and Jan Travers, who continuously prodded via e-mail to keep the
project on schedule. Their contributions throughout the whole process from
inception of the initial idea to final publication have been invaluable.

In closing, we wish to thank all of the authors for their insights and excellent
contributions to this book.
