Table of Contents

Preface.................................................................................................................................................. xix

Chapter 1
Application of Molecular Topology to the Prediction of Water Quality Indices of Alkylphenol Pollutants........................................................................................................................................ 1
   Jorge Gálvez, University of Valencia, Spain
   Miriam Parreño, University of Valencia, Spain
   Jordi Pla, University of Valencia, Spain
   Jaime Sanchez, University of Valencia, Spain
   Maria Gálvez-Llompart, University of Valencia, Spain
   Sergio Navarro, University of Valencia, Spain
   Ramón García-Domenech, University of Valencia, Spain

Chapter 2
Graph-Theoretical Indices based on Simple, General and Complete Graphs .................................. 11
   Lionello Pogliani, Università della Calabria, Italy

Chapter 3
Modeling of Fluid Interaction Produced by Water Hammer ................................................................. 27
   Kaveh Hariri Asli, Azerbaijan National Academy of Science, Azerbaijan
   Faig Bakhman Ogli Naghiyev, Azerbaijan State Oil Academy, Azerbaijan
   Soltan Ali Ogli Aliyev, Azerbaijan National Academy of Science, Azerbaijan
   Hoosein Hariri Asli, Applied Science and Technology University, Iran

Chapter 4
Logistic vs. W-Lambert Information in Quantum Modeling of Enzyme Kinetics............................... 40
   Mihai V. Putz, West University of Timișoara, Romania
   Ana-Maria Putz, Timișoara Institute of Chemistry of Romanian Academy, Romania

Chapter 5
Toxicity of Halogen, Sulfur and Chlorinated Aromatic Compounds: A Quantitative-Structure-Toxicity-Relationship (QSTR)......................................................................................... 60
   Ashutosh Gupta, Udai Pratap Autonomous College, India
   Arindam Chakraborty, Indian Institute of Technology Kharagpur, India
   Santanab Giri, Indian Institute of Technology Kharagpur, India
   Venkatesan Subramanian, Central Leather Research Institute, India
   Pratim Kumar Chattaraj, Indian Institute of Technology Kharagpur, India
Chapter 6
A Hybrid Approach Based on Self-Organizing Neural Networks and the K-Nearest Neighbors Method to Study Molecular Similarity

Abdelmalek Amine, Tahar Moulay University, Algeria
Zakaria Elberrichi, Djillali Liabes University, Algeria
Michel Simonet, Joseph Fourier University, France
Ali Rahmouni, Tahar Moulay University, Algeria

Chapter 7
Solvent Effect of Oxygen in the Thermolysis Decomposition of the Acetone Dperoxide

M. I. Profeta, Universidad Nacional del Nordeste, Argentina
J. R. Romero, Universidad Nacional del Nordeste, Argentina
L. A. C. Leiva, Universidad Nacional del Nordeste, Argentina
N. L. Jorge, Universidad Nacional del Nordeste, Argentina
M. E. Gomez Vara, Universidad Nacional del Nordeste, Argentina
E. A. Castro, INIFTA, Argentina

Chapter 8
Characterization of Polycyclic Aromatic Hydrocarbon Profiles by Multivariate Statistical Analysis

D. J. Marino, Universidad Nacional de La Plata, Argentina
E. A. Castro, Universidad Nacional de La Plata, Argentina
L. Massolo, Universidad Nacional de La Plata, Argentina
A. Mueller, Centre of Environmental Research Leipzig-Halle GmbH, Germany
O. Herbarth, Centre of Environmental Research Leipzig-Halle GmbH, Germany
A. E. Ronco, Universidad Nacional de La Plata, Argentina

Chapter 9
Using Chemical Structural Indicators for Periodic Classification of Local Anaesthetics

Francisco Torrens, Universitat de València, Spain
Gloria Castellano, Universidad Católica de Valencia San Vicente Mártir, Spain

Chapter 10
Exploring the Thermodynamic Aspects of Structure Formation During Wet-Spinning of Polyacrylonitrile Fibres

Shahram Arbab, University of Guilan, Iran
A. Zeinolebadi, University of Hamburg, Germany
Parviz Noorpanah, Amirkabir University of Technology, Iran

Chapter 11
Correlation of the Drug Activities of Some Anti-Tubercular Chalcone Derivatives in Terms of the Quantum Mechanical Reactivity Descriptors

Tanmoy Chakraborty, University of Kalyani, India
Dulal C. Ghosh, University of Kalyani, India
Chapter 12
Hydrogen-Bonded Interactions in the Systems L-Cysteine - H₂SeO₃ and L-Cysteine - H₂SeO₄:
A DFT Study

Alexei N. Pankratov, Institute of Chemistry, N. G. Chernyshevskii Saratov State University,
Saratov, Russia
Nikolay A. Bychkov, Institute of Chemistry, N. G. Chernyshevskii Saratov State University,
Saratov, Russia
Olga M. Tsivileva, Laboratory of Microbiology, Institute of Biochemistry and Physiology of
Plants and Microorganisms, Russian Academy of Sciences, Saratov, Russia

Chapter 13
Theoretical Studies on the Structure and Spectroscopic Properties of 2,4-D (2,4-Diclorofenoxiacetic Acid)

Maria G. Andino, Universidad Nacional del Nordeste, Argentina
Mariela I. Profeta, Universidad Nacional del Nordeste, Argentina
Jorge M. Romero, Universidad Nacional del Nordeste, Argentina
Nelly L. Jorge, Universidad Nacional del Nordeste, Argentina
Eduardo A. Castro, Research Institute of Theoretical and Applied Physical-Chemistry (INIFTA), Argentina

Chapter 14
Experimental-Theoretical Method for Defining Physical-Mechanical Properties of Polymer Materials
with Regard to Change of Their Physical-Chemical Properties

Gabil G. Aliyev, Azerbaijan National Academy of Sciences, Azerbaijan

Chapter 15
Two-D Analysis of the Thermo-Mechanical Properties of ZrO₂-Based Composites

Sedigheh Salehi, Katholieke Universiteit Leuven, Belgium
Vasyl Ryukhtin, Helmholtz-Zentrum Berlin for Materials and Energy, Germany
Petr Lukas, Nuclear Physics Institute, Czech Republic
Omer Van der Biest, Katholieke Universiteit Leuven, Belgium
Jef Vleugels, Katholieke Universiteit Leuven, Belgium

Chapter 16
Wavy Motion of Viscous Bubbly Liquid in Tubes of Orthotropic Material

Rafael Yusif Amenzadeh, Baku State University, Azerbaijan
Akperli Reyhan Sayyad, Baku State University, Azerbaijan
Faig Bakhman Ogli Naghiyev, Baku State University, Azerbaijan

Chapter 17
Bundlet Model for Single-Wall Carbon Nanotubes, Nanocones and Nanohorns

Francisco Torrens, Universitat de València, Spain
Gloria Castellano, Universidad Católica de Valencia, Spain
Chapter 18
An Efficient Algorithm for Automating Classification of Chemical Reactions into Classes in Ugi’s Reaction Scheme
Sanjay Ram, Bengal Engineering and Science University, Shibpur, India
Somnath Pal, Bengal Engineering and Science University, Shibpur, India

Chapter 19
Modelling Liquid Flow Through Carbon Nanotubes
Faig Bakhman Ogli Naghiyev, Ministry of Communications and Information Technologies of Azerbaijan Republic, Azerbaijan

Chapter 20
Interactions Between Weighting Scheme and Similarity Coefficient in Similarity-Based Virtual Screening
John D. Holliday, University of Sheffield, UK
Peter Willett, University of Sheffield, UK
Hua Xiang, University of Sheffield, UK

Chapter 21
Retrained Classification of Tyrosinase Inhibitors and “In Silico” Potency Estimation by Using Atom-Type Linear Indices: A Powerful Tool for Speed up the Discovery of Leads
Gerardo M. Casañola-Martín, Universitat de València, Spain, & Central University of Las Villas, Cuba
Mahmud Tareq Hassan Khan, GenØk – Center for Biosafety, Norway
Huong Le-Thi-Thu, Central University of Las Villas, Cuba
Yovani Marrero-Ponce, Central University of Las Villas, Cuba, & Universitat de València, Spain
Ramón García-Domenech, Universitat de València, Spain
Francisco Torrens, Universitat de València, Spain
Antonio Rescigno, Università di Cagliari, Italy
Concepción Abad, Universitat de València, Spain
