Acknowledgment

This reference book on “Service-Driven Approaches to Architecture and Enterprise Integration” has been a very interesting project for me, involving authors and experts from around the world. The success of this book project is due to the efforts of many people working together as a team.

I would like to thank my coeditor Kirtana Raja, for time spent brainstorming and her extensive help with editing, layout, proofreading, and finalizing the content for publication.

It has been tremendously insightful and a great pleasure to work with all my authors. I would like to acknowledge my deepest and most sincere appreciation for their cooperation, time, and effort.
