Table of Contents

Section I
Theory of Information Technology for Mass Customization

Chapter I
Mass Customization with Configurable Products and Configurators:
A Review of Benefits and Challenges / Mikko Heiskala, Juha Tihonen,
Kaija-Stiina Paloheimo, and Timo Soininen .......................................................... 1

Chapter II
Product Modeling and Configuration Experiences / Joseba Arana, María Elejoste,
José Ángel Lakunza, Jone Uribetxebarria, and Martín Zangitu ............................... 33

Chapter III
Product Configuration in ETO Companies / Thomas Ditlev Petersen ..................... 59

Chapter IV
Open Variant Process Models in Supply Chains /
Corinna Engelhardt-Nowitzki and Helmut Zsifkovits ........................................... 77

Section II
Frameworks for Mass Customization

Chapter V
An Associative Classification-Based Recommendation System for Personalization in
B2C E-Commerce Applications / Yiyang Zhang and Jianxin (Roger) Jiao ................ 107

Chapter VI
Knowledge-Based Recommender Technologies Supporting the Interactive Selling of
Financial Services / Alexander Felfernig ................................................................. 122
Chapter VII

Chapter VIII
An Agent-Based Information Technology Architecture for Mass Customized Markets / Manoochehr Ghiassi and Cosimo Spera ................................................................................. 162

Chapter IX
Critical Role of Supply Chain Decoupling Point in Mass Customisation from Its Upstream and Downstream Information Systems Point of View / Soroosh Saghiri ......................... 185

Section III
Innovative Information Technology Approaches for Mass Customization

Chapter X
From Strategy Definition to Product Derivation Using a Scenario-Based Architecting Approach / Mugurel Ionita, Pierre America, and Dieter Hammer ................................................................. 198

Chapter XI
Research Issues in Knowledge-Based Configuration / Dietmar Jannach, Alexander Felfernig, Gerold Kreutler, Markus Zanker, and Gerhard Friedrich ......................................................... 221

Chapter XII
Mass Customisation of Services and Processes Based on Fuzzy Cognitive Maps / Dimitris Kardaras and Bill Karakostas .......................................................................................... 237

Chapter XIII
Applying Service CAD System to Value Customization / Tomohiko Sakao, Yoshiki Shimomura, Alberto Simboli, Andrea Raggi, Luigia Petti, and Giuseppina Pagliuca ............. 255
