Table of Contents

Preface ............................................................................................................................................................... xv

Section 1
Process Modeling

Chapter 1
Object-Aware Business Processes: Fundamental Requirements and their Support in Existing
Approaches .......................................................................................................................................................... 1

  Vera Künzle, Ulm University, Germany
  Barbara Weber, University of Innsbruck, Austria
  Manfred Reichert, Ulm University, Germany

Chapter 2
Ontological Description and Similarity-Based Discovery of Business Process Models ................. 30

  Khalid Belhajjame, University of Manchester, UK
  Marco Brambilla, Politecnico di Milano, Italy

Chapter 3
Towards Next Generation Provenance Systems for E-Science ......................................................... 51

  Fakhri Alam Khan, University of Vienna, Austria
  Sardar Hussain, University of Glasgow, UK
  Ivan Janciak, University of Vienna, Austria
  Peter Brezany, University of Vienna, Austria

Section 2
Structural Modeling and Semantics

Chapter 4
Modelling Information Demand in an Enterprise Context: Method, Notation, and
Lessons Learned.............................................................................................................................................. 77

  Magnus Lundqvist, Jönköping University, Sweden
  Kurt Sandkuhl, University of Rostock, Germany
  Ulf Seigerroth, Jönköping University, Sweden
Chapter 5
Ontology Alignment Quality: A Framework and Tool for Validation
Jennifer Sampson, Statoil, Bergen, Norway
John Krogstie, Norwegian University of Science and Technology, Norway
Csaba Veres, University of Bergen, Norway

Chapter 6
CbSSDF: A Two-Layer Conceptual Graph Approach to Web Services Description and Composition – A Scenario-Based Solution Analysis and Comparison with OWL-S
Xiaofeng Du, University of Durham, UK
Malcolm Munro, University of Durham, UK
William Song, University of Durham, UK

Chapter 7
Modeling Approach for Integration and Evolution of Information System
Remigijus Gustas, Karlstad University, Sweden

Section 3
Object-Oriented Modeling

Chapter 8
Ontological Rules for UML-Based Conceptual Modeling: Design Considerations and a Prototype Implementation
Shan Lu, Around America Aviation Group, Canada
Jeffrey Parsons, Memorial University of Newfoundland, Canada

Chapter 9
A Longitudinal Study of Fan-In and Fan-Out Coupling in Open-Source Systems
Asma Mubarak, Brunel University, UK
Steve Counsell, Brunel University, UK
Robert M. Hierons, Brunel University, UK

Section 4
Goal and Actor Modeling

Chapter 10
A Method for Eliciting Goals for Business Process Models based on Non-Functional Requirements Catalogues
Evellin Cardoso, Federal University of Espírito Santo, Brazil
João Paulo A. Almeida, Federal University of Espírito Santo, Brazil
Renata S. S. Guizzardi, Federal University of Espírito Santo, Brazil
Giancarlo Guizzardi, Federal University of Espírito Santo, Brazil
Chapter 11
An Approach for E-Service Design Using Enterprise Models ......................................................... 245
  Martin Henkel, Stockholm University, Sweden
  Paul Johannesson, Stockholm University, Sweden
  Erik Perjons, Stockholm University, Sweden

Section 5
Methodology and Tools for Analysis and Design

Chapter 12
What Practitioners Think of Inter-Organizational ERP Requirements Engineering Practices: Focus Group Results.................................................................................................................. 270
  Maya Daneva, University of Twente, The Netherlands
  Niv Ahituv, Tel-Aviv University, Israel

Chapter 13
The Impact of Regulatory Compliance on Agile Software Processes with a Focus on the FDA Guidelines for Medical Device Software .............................................................................................................. 298
  Hossein Mehrfard, Concordia University, Canada
  Abdelwahab Hamou-Lhadj, Concordia University, Canada

Chapter 14
Predicting OSS Development Success: A Data Mining Approach ................................................. 315
  Uzma Raja, University of Alabama, USA
  Marietta J. Tretter, Texas A&M University, USA

Chapter 15
Towards Method Component Contextualization .................................................................................. 337
  Elena Kornyshova, Université Paris I – Panthéon Sorbonne, France
  Rébeccia Deneckère, Université Paris I – Panthéon Sorbonne, France
  Bruno Claudepierre, Université Paris I – Panthéon Sorbonne, France

Compilation of References .................................................................................................................. 369
About the Contributors ....................................................................................................................... 398
Index ...................................................................................................................................................... 405
