Measuring Information Systems Delivery Quality

Table of Contents

Foreword ......................................................................................................................................................... vi
   Joseph A. De Feo, Juran Institute Inc., USA

Preface ............................................................................................................................................................ viii

SECTION I: INTRODUCTION AND OVERVIEW
   OF QUALITY CONCEPTS AND DIMENSIONS

Chapter I. The Panorama of Information Systems Quality .................. 1
   Evan W. Duggan, University of Alabama, USA
   Han Reichgelt, Georgia Southern University, USA

Chapter II. An Overview of Software Quality Concepts and
   Management Issues ................................................................................................................................. 28
   Alain April, École de technologie supérieure, Québec, Canada
   Claude Y. Laporte, École de technologie supérieure, Québec, Canada

Chapter III. The Different Views of Software Quality......................... 55
   Bernard Wong, University of Technology, Australia

SECTION II: QUALITY IN THE EARLY STAGES OF IS DELIVERY

Chapter IV. Making Real Progress with the Requirements
   Defects Problem ........................................................................................................................................ 90
   R. Geoff Dromey, Griffith University, Australia
Chapter V. User Participation in the Quality Assurance of Requirements Specifications: An Evaluation of Traditional Models and Animated Systems Engineering Techniques ........................................ 112
   Heinz D. Knoell, University of Lueneburg, Germany

Chapter VI. Academic Storytelling: The Development of User-Driven Scenarios .................................................................................................................. 134
   Robert Cox, University of Tasmania, Australia

SECTION III: PROCESS CONTRIBUTION TO IS QUALITY

Chapter VII. Process-Centered Contributions to Information Systems Quality ........................................................................................................ 158
   Evan W. Duggan, University of Alabama, USA
   Richard Gibson, American University, USA

Chapter VIII. Developer-Driven Quality: Guidelines for Implementing Software Process Improvements .......................................................... 181
   Gina C. Green, Baylor University, USA
   Rosann Webb Collins, University of South Florida, USA
   Alan R. Hevner, University of South Florida, USA

Chapter IX. Improving Quality through the Use of Agile Methods in Systems Development: People and Values in the Quest for Quality ........................................................................................................ 201
   Julie E. Kendall, Rutgers University, USA
   Kenneth E. Kendall, Rutgers University, USA
   Sue Kong, Rutgers University, USA

Chapter X. Quality Metrics and Bayesian Analysis: The Case of Extreme Programming .......................................................................................... 223
   Francisco Macias, Technologic of Monterrey, Mexico
   Mike Holcombe, University of Sheffield, England

SECTION IV: MANAGING RISKS OF SPI PROJECTS AND METHODOLOGIES

Chapter XI. Building IT Risk Management Approaches: An Action Research Method .......................................................................................... 244
   Jakob H. Iversen, University of Wisconsin Oshkosh, USA
   Lars Mathiassen, Georgia State University, USA
   Peter A. Nielsen, Aalborg University, Denmark
Chapter XII. Examining the Quality of Evaluation Frameworks and Metamodelling Paradigms of Information Systems Development Methodologies ................................................................. 265
   Eleni Berki, University of Tampere, Finland

SECTION V: IS QUALITY ISSUES IN UNDER-RESEARCHED AREAS

Chapter XIII. Software Quality and Open Source Process .......... 291
   Sameer Verma, San Francisco State University, USA

Chapter XIV. Creating IS Quality in Government Settings .......... 311
   Catherine Horiuchi, Seattle University, USA

Chapter XV. ERP Quality: Do Individuals Matter? An Australian Case ................................................................. 328
   Jenine Beekhuyzen Griffith University, Australia

About the Authors ................................................................................................................................. 346

Index .................................................................................................................................................. 355
