Table of Contents

Foreword .............................................................................................................................................. xv
Preface ................................................................................................................................................ xvi
Acknowledgment ................................................................................................................................ xx

Section I
Introduction Chapters

Chapter I
An Introduction to Women’s Health and Informatics ................................................................. 1
Peter Stone, FRANZCOG, CmFm, The University of Auckland, New Zealand

Chapter II
Women’s Health Informatics: The Ethical and Legal Issues ...................................................... 13
Premila Fade, Poole Hospital NHS Foundation Trust, UK
Anne-Marie McMahon, Poole Hospital NHS Foundation Trust, UK

Section II
Information Management Applications

Chapter III
Coding and Messaging Systems for Women’s Health Informatics .............................................. 38
David Parry, Auckland University of Technology, New Zealand

Chapter IV
Women’s Health Informatics in the Primary Care Setting .......................................................... 53
Gareth Parry, Horsmans Place Partnership, UK

Chapter V
The Electronic Health Record to Support Women’s Health ....................................................... 65
Emma Parry, The University of Auckland, New Zealand
Chapter VI
Imaging and Communication Systems in Obstetrics and Gynecology ............................................... 77
Graham Parry, Middlemore Hospital, New Zealand

Section III
Obstetrics and Neonatology

Chapter VII
Statistical Measures in Maternity Care .................................................................................................. 94
Emma Parry, The University of Auckland, New Zealand

Chapter VIII
Building Knowledge in Maternal and Infant Care .................................................................................. 106
Kiran Massey, University of British Columbia and BC Women’s Hospital and Health Centre, Canada
Tara Morris, University of British Columbia and BC Women’s Hospital and Health Centre, Canada
Robert M. Liston, University of British Columbia, and BC Women’s Hospital and Health Centre, and British Columbia Perinatal Health Programme, Canada
Peter von Dadelszen, University of British Columbia and British Columbia Perinatal Health Programme, Canada
Mark Ansermino, University of British Columbia, Canada
Laura Magee, University of British Columbia and British Columbia Perinatal Health Programme, Canada

Chapter IX
Informatics Applications in Neonatology ............................................................................................... 130
Malcolm Battin, National Women’s Health, Auckland City Hospital, New Zealand
David Knight, Mater Mother’s Hospital, Brisbane, Australia
Carl Kuschel, The Royal Women’s Hospital, Melbourne, Australia

Chapter X
Computerizing the Cardiotocogram (CTG) ....................................................................................... 151
Jenny Westgate, The University of Auckland, New Zealand
Section IV
Gynecology Applications

Chapter XI
Computer Assisted Cervical Cytology ................................................................. 160
Liron Pantanowitz, Tufts School of Medicine, Baystate Medical Center, USA
Maryanne Hornish, Tufts School of Medicine, Baystate Medical Center, USA
Robert A. Goulart, Tufts School of Medicine, Baystate Medical Center, USA

Chapter XII
Informatics and Ovarian Cancer Care .................................................................. 185
Laurie Elit, McMaster University, Canada,
Susan Bondy, University of Toronto, Canada
Michael Fung-Kee-Fung, University of Ottawa, Canada
Prafull Ghatage, University of Toronto, Canada
Tien Le, University of Toronto, Canada
Barry Rosen, University of Toronto, Canada
Bohdan Sadovy, Princess Margaret Hospital, Canada

Section V
Knowledge and Information Management and Use

Chapter XIII
Women’s Health and Health Informatics: Perinatal Care Health Education ............ 263
Jamila Abuidhail, Faculty of Nursing, The Hashemite University, Jordan

Chapter XIV
Electronic Information Sources for Women’s Health Knowledge for Professionals ........ 278
Shona Kirtley, University of Oxford, UK

Chapter XV
Computerised Decision Support for Women’s Health Informatics .......................... 302
David Parry, Auckland University of Technology, New Zealand

Chapter XVI
Organizational Factors: Their Role in Health Informatics Implementation ................ 315
Michelle Brear, University of New South Wales, Australia

Chapter XVII
Standardization in Health and Medical Informatics ............................................. 323
Josipa Kern, Zagreb University Medical School, Croatia
Chapter XVIII
Evaluation of Health Information Systems: Challenges and Approaches ................................. 330
   Elske Ammenwerth, University for Health Sciences, Medical Informatics and Technology
   (UMIT), Austria
   Stefan Gräber, University Hospital of Saarland, Germany
   Thomas Bürkle, University of Münster, Germany
   Carola Iller, University of Heidelberg, Germany

Chapter XIX
eHealth Systems, Their Use and Visions for the Future ......................................................... 346
   Pirkko Nykänen, Tampere University, Finland

Chapter XX
The Competitive Forces Facing E-Health .................................................................................. 354
   Nilmini Wickramasinghe, Stuart Graduate School of Business, USA
   Santosh Misra, Cleveland State University, USA
   Arnold Jenkins, Johns Hopkins Hospital, USA
   Douglas R. Vogel, City University of Hong Kong, China

Compilation of References ....................................................................................................... 368

About the Contributors ............................................................................................................. 397
