Acknowledgment

We wish to thank all the authors who responded to our call for proposals. The authors whose proposals were accepted after a peer review process embarked on a long, and at times, arduous journey with us. We acknowledge their hard work as they took time from their demanding work schedules to draft and re-draft their chapters which ultimately culminated in the successful completion of this edited book. A number of authors also volunteered as reviewers and we thank them for their constructive feedback that enhanced the quality of the contributions to this book.

We would like to acknowledge the assistance provided by Mohamed Abdulrahman Othman and Lyas Ait Tayeb (research students from The Petroleum Institute) in the final stages of this edited book project. Special thanks go to the editorial advisory board members who were invaluable as reviewers and helped to shape the orientation of this book. We would like to thank the publishing team at IGI Global who provided much guidance in the production of the book; in particular, Monica Speca and Jan Travers.
