# Table of Contents

Foreword .................................................................................................................................................. xix

Preface ..................................................................................................................................................... xxii

## Section 1
**Patient Safety: The Human Interface**

**Chapter 1**
Informational, Physical, and Psychological Privacy as Determinants of Patient Behaviour in Health Care

Natalia Serenko, Lakehead University, Canada

**Chapter 2**
The SHEEP Model: Applying Near Miss Analysis

Deborah J. Rosenorn-Lanng, Royal Berkshire NHS Foundation Trust, UK
Vaughan A. Michell, University of Reading, UK

**Chapter 3**
G-NO-TECS: Generic Non-Technical Skills in Healthcare

Deborah J Rosenorn-Lanng, Royal Berkshire NHS Foundation Trust, UK

**Chapter 4**
Using a Virtual Learning Environment within Simulation to Enhance Inter-Professional Team Working Skills

Melanie Humphreys, Keele University, UK
Deborah J. Rosenorn-Lanng, Royal Berkshire NHS Foundation Trust, UK
Luke Bracegirdle, Keele University, UK
Section 2
Patient Safety: The Process Interface

Chapter 5
A New Era for Safety Measurement ................................................................. 48
Sarahjane Jones, University of Warwick, UK
Mairi Macintyre, University of Warwick, UK

Chapter 6
Workarounds: Risk or Benevolence for Patient Safety? ........................................ 76
Nada Nadhrah, University of Reading, UK
Vaughan Michell, University of Reading, UK

Chapter 7
Computerisation of Clinical Pathways .................................................................... 114
Jasmine Tehrani, University of Reading, UK

Chapter 8
Clinical Pathway Enhanced by Knowledge Management Technology: A Critical Step towards Medical Quality Improvement .............................................................. 138
Weizi Li, University of Reading, UK

Section 3
Patient Safety: The Technology Interface

Chapter 9
Using Radio Frequency Identification Technology to Store Patients’ Medical Information ............. 159
Peter J. Hawrylak, University of Tulsa, USA
Chris Hart, University of Tulsa, USA

Chapter 10
A Pharmaco-Cybernetics Approach to Patient Safety: Identifying Adverse Drug Reactions through Unsupervised Machine Learning ........................................................................ 179
Kevin Yi-Lwern Yap, National University of Singapore, Singapore

Chapter 11
Patient Safety in Community Care: E-Health Systems and the Care of the Elderly at Home ........... 198
Ken Eason, The Bayswater Institute, UK
Patrick Waterson, Loughborough University, UK
Chapter 12
Health Information Technology: Anticipating, Recognizing, and Preventing Disruptions in Complex Adaptive Healthcare Systems ................................................................. 214
  Patrick Albert Palmieri, A.T. Still University, USA & Association for the Accreditation of Ambulatory Health Care Services, USA & Universidad San Ignacio de Loyola, Perú
  Lori T. Peterson, Cleveland State University, USA
  Miguel Noe Ramirez Noeding, Clinica Santa Isabel, Perú & Association for the Accreditation of Ambulatory Health Care Services, USA

Section 4
Patient Safety: The Information Interface

Chapter 13
Towards Interactive Virtual Environments through Handheld Devices for the Disabled: A Performance-Evaluation Perspective ................................................................. 237
  Fotios Spyridonis, Brunel University, UK
  Gheorghita Ghinea, Brunel University, UK
  Tor-Morten Grønli, The Norwegian School of Information Technology, Norway
  Jarle Hansen, Brunel University, UK

Chapter 14
Applying Social Aspects in Home Telecare Design to Improve the Safety of Users and Quality of Service ........................................................................................................ 250
  Lawrence Chidzambwa, Vancouver, BC, Canada

Chapter 15
Customer Strategy Definition in Elderly Care: Understanding Customer-Focused Care Expectation and Managing Resource Allocation .................................................................................. 275
  Basel Khashab, University of Reading, UK
  Uday Joshi, University of Reading, UK
  Stephen R. Gulliver, University of Reading, UK

Chapter 16
Technology Acceptance and Care Self-Management: Consideration in Context of Chronic Care Management ........................................................................................................... 295
  Patcharin Wannatawee, University of Reading, UK
  Muna Alhhammad, University of Reading, UK
  Stephen R. Gulliver, University of Reading, UK
Section 5
Architecture, Strategy, and Policy

Chapter 17
Information Architecture for Pervasive Healthcare Information Provision with Technological Implementation
Chekoung Tan, University of Reading, UK
Shixiong Liu, University of Reading, UK

Chapter 18
Healthcare Resource Sustainability: Obtaining Information Access via Healthcare Space Modelling
Stephen Gulliver, University of Reading, UK
Isaac Wiafe, School of Technology- GIMPA, Ghana
Hubert Grzybek, University of Reading, UK
Milan Radosavljevic, University of Reading, UK

Chapter 19
Health IT Policy in the UK: The Case of Electronic Health Records
Wendy L. Currie, Audencia, Nantes, School of Management, France

Chapter 20
The Internet of Things and Opportunities for Pervasive Safety Monitored Health Environments
Vaughan Michell, University of Reading, UK
