# Architectural Issues of Web-Enabled Electronic Business

## Table of Contents

Preface ........................................................................................................................................... viii

**Section I: Globalization of E-Business**

Chapter I. Issues in the Globalization of Electronic Commerce ........................................ 1  
*Daniel Brandon, Christian Brothers University, USA*

Chapter II. Electronic Architectures for Bridging the Global Digital Divide: A Comparative Assessment of E-Business Systems Designed to Reach the Global Poor ................................................................................................................................. 23  
*Nikhilesh Dholakia, University of Rhode Island, USA*  
*Nir Kshetri, University of Rhode Island, USA*

**Section II: Intelligent Portal Architecture**

Chapter III. Intelligent Business Portals .................................................................................. 41  
*Xue Li, University of Queensland, Australia*

Chapter IV. Expert Database Web Portal Architecture ............................................................ 52  
*Anthony Scimé, State University of New York College at Brockport, USA*

**Section III: Scalability and Performance**

Chapter V. Scheduling and Latency—Addressing the Bottleneck ........................................... 67  
*Michael J. Oudshoorn, University of Adelaide, Australia*
Chapter VI. Integration of Database and Internet Technologies for Scalable End-to-End E-commerce Systems .................................................................................................................. 84
K. Selçuk Candan, Arizona State University, USA
Wen-Syan Li, C&C Research Laboratories, NEC USA, Inc.

Section IV: Web-Based Distributed Data Mining

Chapter VII. Internet Delivery of Distributed Data Mining Services: Architectures, Issues and Prospects .................................................................................................................. 113
Shonali Krishnaswamy, Monash University, Australia
Arkady Zaslavsky, Monash University, Australia
Seng Wai Loke, RMIT University, Australia

Chapter VIII. Data Mining For Web-Enabled Electronic Business Applications ....... 128
Richi Nayak, Queensland University of Technology, Australia

Section V: Web Search and Data Retrieval

Chapter IX. Intelligent Web Search Through Adaptive Learning From Relevance Feedback ................................................................................................................................. 139
Zhixiang Chen, University of Texas–Pan American, USA
Binhai Zhu, Montana State University, USA
Xiannong Meng, Bucknell University, USA

Chapter X. World Wide Web Search Engines ................................................................................................................................. 154
Wen-Chen Hu, University of North Dakota, USA
Jyh-Haw Yeh, Boise State University, USA

Chapter XI. Retrieval of Multimedia Data on the Web: An Architectural Framework ................................................................................................................................. 169
Mohammed A. Moharrum, Old Dominion University, USA
Stephan Olariu, Old Dominion University, USA
Hussein Abdel-Wahab, Old Dominion University, USA

Chapter XII. Navigation in E-Business Web Sites ...................................................... 184
Roland Hübscher, Auburn University, USA
Tony Pittarese, Pensacola Christian College, USA
Patricia Lanford, Auburn University, USA

Section VI: Web Information Systems (WIS) Development: Design, Environment and Standards

Chapter XIII. E-Business Transaction Management in Web-Integrated Network Environment ................................................................................................................................. 198
V.K. Murthy, University of New South Wales at ADFA, Australia
Linda V. Knight, DePaul University, USA
Theresa A. Steinbach, DePaul University, USA
Vince Kellen, Blue Wolf, USA

Chapter XV. Characterizing Web Systems: Merging Information and Functional Architectures
David Lowe, University of Technology, Sydney, Australia
Brian Henderson-Sellers, University of Technology, Sydney, Australia

Chapter XVI. Customisation of Internet Multimedia Information Systems Design Through User Modelling
Sherry Y. Chen, Brunel University, UK
Marios C. Angelides, Brunel University, UK

Chapter XVII. A Software Model, Architecture and Environment to Support Web-Based Applications
David Kearney, University of South Australia, Australia
Weiquan Zhao, University of South Australia, Australia

Chapter XVIII. XML - Digital Glue for the Modern World—Electronic Business Standards Fuelling Intra- and Inter-Enterprise Interoperability for Global Collaboration
Frank Jung, Software AG Headquarters, Darmstadt, Germany

Section VII: E-Marketing and Virtual Marketplace

Chapter XIX. Designing Agent-Based Negotiation for E-Marketing
V.K. Murthy, University of New South Wales at ADFA, Australia

Chapter XX. Virtual Marketplace for Agent-Based Electronic Commerce
Chuen Hwee Ng, National University of Singapore, Singapore
Sheng-Uei Guan, National University of Singapore, Singapore
Fangming Zhu, National University of Singapore, Singapore

Chapter XXI. Integrated E-Marketing—A Strategy-Driven Technical Analysis Framework
Simpson Poon, Charles Sturt University, Australia
Irfan Altas, Charles Sturt University, Australia
Geoff Fellows, Charles Sturt University, Australia

Chapter XXII. An Agent-Based Architecture for Product Selection and Evaluation Under E-Commerce
Leng Woon Sim, National University of Singapore, Singapore
Sheng-Uei Guan, National University of Singapore, Singapore
Section VIII: Security Architecture

Chapter XXIII. An Architecture for Authentication and Authorization of Mobile Agents in E-Commerce ............................................................... 348
  Wee Chye Yeo, National University of Singapore, Singapore
  Sheng-Uei Guan, National University of Singapore, Singapore
  Fangming Zhu, National University of Singapore, Singapore

Chapter XXIV. Security and Trust of Online Auction Systems in E-Commerce ...... 362
  P.W. Lei, University of Sussex, UK
  L.K. Lo, University of Nottingham, UK
  C.R. Chatwin, University of Sussex, UK
  R.C.D. Young, University of Sussex, UK
  M. I. Heywood, Dalhousie University, Canada
  N. Zincir-Heywood, Dalhousie University, Canada

Section IX: E-Business Applications

Chapter XXV. E-Commerce and Digital Libraries ............................................. 377
  Suliman Al-Hawamdeh, Nanyang Technological University, Singapore
  Schubert Foo, Nanyang Technological University, Singapore

Chapter XXVI. Electronic Business Over Wireless Device: A Case Study ............ 391
  Richi Nayak, Queensland University of Technology, Australia
  Anurag Nayak, IT Consultant, Australia

About the Authors ..................................................................................................................... 404
