## Table of Contents

Preface ........................................................................................................................................... xiv

Acknowledgment .............................................................................................................................. xviii

### Chapter 1
Insights into the Search Behavior of Non-Medical Professionals Based on Task Difficulty and an Evaluation against New Generation Medical Information Retrieval Strategies ........................................ 1
   Anushia Inthiran, Monash University, Malaysia
   Saadat M. Alhashmi, Abu Dhabi University, UAE
   Pervaiz K. Ahmed, Monash University, Malaysia

### Chapter 2
Indicating Fields of Inequalities Regarding the Access to Health Benefits: Summary of Watch Health Care Foundation’s Three-Year Activity ........................................................................................................... 27
   Krzysztof Landa, Watch Health Care Foundation, Poland
   Karolina Skora, Watch Health Care Foundation, Poland
   Iwona Zaczyk, Watch Health Care Foundation, Poland

### Chapter 3
Health Care Reform Requires IT Solutions to Influence Consumer Perception at a Health Care Payer ........................................................................................................................................... 42
   Rahul Bhaskar, California State University – Fullerton, USA
   Au Vo, Claremont Graduate University, USA

### Chapter 4
Doing the Right Things Right or the Wrong Things Well: How Healthcare Searches for the Wisdom to Know the Difference ........................................................................................................ 53
   Vahé A. Kazandjian, Aralez Health LLC, USA & The Johns Hopkins Bloomberg School of Public Health, USA
Chapter 5
A Cognitive Machine-Learning System to Discover Syndromes in Erythematous-Squamous Diseases ................................................................. 66

Francesco Gagliardi, University of Rome “La Sapienza”, Italy

Chapter 6
E-Collaboration in Biomedical Research: Human Factors and Social Media .......................... 102

Kathleen Gray, University of Melbourne, Australia
Fernando Martin Sanchez, University of Melbourne, Australia
Gabrielle Bright, University of Melbourne, Australia
Ardis Cheng, University of Melbourne, Australia

Chapter 7
Migrant Women: Implications for Policy Development of Effective User-Driven Health Care..... 121

Jane Fitzpatrick, Independent Researcher, UK

Chapter 8
Diffusion of Innovations: A Foundational Theory for Medical Informatics Research ............ 136

Fred K. Weigel, Eisenhower Army Medical Center, USA
Benjamin T. Hazen, Auburn University, USA

Chapter 9
A New Space for Biotechnology Innovation? Comparison of Physical and Virtual Collaboration in Early Drug Discovery ................................................................. 154

David Tamoschus, Bayer Vital GmbH2, Germany

Chapter 10
Modeling the Diffusion of Psychological Stress ................................................................. 178

Pietro Cipresso, Applied Technology for Neuro-Psychology Lab, Italy
Silvia Serino, Applied Technology for Neuro-Psychology Lab, Italy
Andrea Gaggioli, Applied Technology for Neuro-Psychology Lab, Italy
Giuseppe Riva, Applied Technology for Neuro-Psychology Lab, Italy

Chapter 11
Cloud Bioinformatics in a Private Cloud Deployment .......................................................... 205

Victor Chang, Leeds Metropolitan University, UK & University of Southampton, UK

Chapter 12
Application of the Cloud Computing for the Effective Implementation of the Medical Information System ................................................................. 221

Ekaterina Kldiashvili, Georgian Telemedicine Union Association, USA
