Acknowledgment

Although we are responsible for writing and organizing this book, it would not have been possible without the support of many people. We would like to express our deepest appreciation to all those who have provided us the support and helped to complete this book.

Our sincere gratitude goes to Professor Howard Schmidt, Retired Special Assistant to the President, Cyber Security Coordinator at the Executive Office of the President, White House, and Mr. Aloysius Cheang, Managing Director at CSA APAC. They have shared their broad vision and pioneering opinion about cloud computing with the authors.

A couple of chapters in this book are based on the collaborative research efforts with our CSA colleagues. Our thanks go to Jairo Orea, Marlin Pohlman, Yaron Levy, Dan Logan, Price Oden, et al., for Chapter 4 (“Trusted Cloud Initiative Reference Architecture”), and to Jens Laundrup, Andrea Bilobrk, Moshe Ferber, Robert Gutcho, Bernd Jager, and Roshan Sequeira for Chapter 5 (“Security Information and Event Management Implementation Guidance”). We also appreciate the support from Dr. Yudong Liu, Assistant Professor at the Department of Computer Science, Western Washington University, and Kevin Zhang, Software Engineer at Microsoft Corporation, on Chapter 6 (“Enterprise Security Monitoring with the Fusion Center Model”).

We would like to acknowledge the EMC² Education Services for supporting us with books and training materials. We could not have written the chapters on big data without their assistance.

A few chapters of the book are based on original work together with Tom Defanti and Jurgen Schulze, distinguished scientists at Calit², California Institute for Telecommunications and Information Technology. They have largely contributed and supported the work about cross-stream coding for parallel data transfers.

Furthermore, many thanks go to Mr. Zheng Li, Sr. Director of the Public Sector Group at Microsoft China, Dr. Tayfun Keskin, Professor at the Business School of the University of Washington, and Mr. Jie (Jason) Yang, Sr. Finance Manager at Microsoft Corporation. They have contributed tremendously in the research on the comparison of cloud computing ecosystems in the USA and China, as well as the future trend of IT in China. This work has been included in the Appendix.

Last but not least, we would also like to acknowledge with much appreciation Dr. Ya-Qin Zhang, the Corporate Vice President of Microsoft Corporation, Mr. Jim Reavis, the Co-Founder and Executive Director of Cloud Security Alliance (CSA), and Mr. George Yan, the General Manager for Cloud and Enterprise of Microsoft Corporation, who were abundantly helpful to us in their support and guidance for the completion of this book.
