Table of Contents

Preface..................................................................................................................................................xii

Chapter 1
A General Framework of Algorithm-Based Fault Tolerance Technique for Computing Systems ....... 1
   Hodjatollah Hamidi, K. N. Toosi University of Technology, Iran

Chapter 2
Methods on Determining the Investment in IT Security................................................................. 22
   Amanda Eisenga, Florida Gulf Coast University, USA
   Walter Rodriguez, Florida Gulf Coast University, USA
   Travis Jones, Florida Gulf Coast University, USA

Chapter 3
   Hossein Arsham, The Johns Hopkins University, USA
   Veena Adlakha, University of Baltimore, USA

Chapter 4
Authenticity in Online Knowledge Sharing: Experiences from Networks of Competence
   Meetings............................................................................................................................................. 61
   Inge Hermanrud, Hedmark University College, Norway

Chapter 5
Information Privacy Concerns and Workplace Surveillance: A Case of Differing Perspectives ....77
   Regina Connolly, Dublin City University, Ireland

Chapter 6
Wearable Computing: Security Challenges, BYOD, Privacy, and Legal Aspects.......................... 96
   John Lindström, Luleå University of Technology, Sweden
   Claas Hanken, Nemetschek Bausoftware GmbH, Germany
Chapter 7
Control Mechanism of Identity Theft and Its Integrative Impact on Consumers’ Purchase Intention in E-Commerce............................................................. 121
Mahmud A. Shareef, Carleton University, Canada
Vinod Kumar, Carleton University, Canada
Uma Kumar, Carleton University, Canada

Chapter 8
The Influence of Trust in the UTAUT Model ................................................................. 162
Eduardo Esteva-Armida, Instituto Tecnologico y de Estudios Superiores de Monterrey, Mexico
Alberto Rubio-Sanchez, University of the Incarnate Word, USA

Chapter 9
Technology-Related Risks in Virtual and Traditional Information Systems Projects ............. 187
April Reed, East Carolina University, USA

Chapter 10
A Likelihood Ratio-Based Forensic Text Comparison in SMS Messages: A Fused System with Lexical Features and N-Grams ............................................................. 208
Shunichi Ishihara, The Australian National University, Australia

Related References ........................................................................................................... 225
Compilation of References ............................................................................................ 253
About the Contributors ................................................................................................. 276
