Acknowledgment

The editors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed. Deep appreciation and gratitude is due to the School of ITEE, UNSW@ADFA, for ongoing sponsorship in terms of generous allocation of Internet, hardware and software resources and other editorial support services for coordination of this year-long project.

Most of the authors of chapters included in this book also served as referees for chapters written by other authors. Thanks go to all those who provided constructive and comprehensive reviews. However, some of the reviewers must be mentioned as their reviews set the benchmark. Reviewers who provided the most comprehensive, critical and constructive comments include: Saku Kukkonen, Jason Teo, Minh Ha Nguyen, Maoguo Gong, Soo-Yong Shin, Ramesh Rajagopalan, Konstantinos E. Parsopoulos, Andrea Toffolo, Andrew Lewis, Carlos A. Coello Coello, Alessandro Di Nuovo, Mark Kleeman, Marcus Randall, and Luis Marti.

Special thanks go to the publishing team at IGI Global, whose contributions throughout the whole process from the inception of the initial idea to final publication have been invaluable. In particular, we own a great deal for Deborah Yahnke, Kristin Roth, and Ross Miller, who continuously supported us via e-mail for keeping the project on schedule.

Special thanks go to Professor Hussein Abbass for his helpful discussions on materializing this book project. And last but not least, our families, for their unfailing support and encouragement during the months it took to give birth to this book.

In closing, we wish to thank all of the authors for their insights and excellent contributions to this book.
