Acknowledgment

While writing, contributors have referred to several books and journals, and we take this opportunity to thank all those authors and publishers. In addition, we are also thankful to VIT University, India, for providing facilities to complete this project. We are extremely thankful to the editorial board and reviewers for their support during the process of evaluation. Last but not the least, we thank the production team of IGI Global for encouraging us and extending their cooperation and help for a timely completion of this edited book.
