Table of Contents

Preface ......................................................................................................................................................... xv

Acknowledgment............................................................................................................................................ xviii

Chapter 1
A Conversation Between Colleagues: Defining Multiple Literacy in Science Education....................... 1
   Colette Fortuna, University of Dundee, Scotland
   Sheila Henderson, University of Dundee, Scotland
   Joseph McLuckie, University of Dundee, Scotland
   Susan Rodrigues, University of Dundee, Scotland
   Lorraine Syme-Smith, University of Dundee, Scotland
   Neil Taylor, University of Dundee, Scotland
   Graham Williamson, University of Dundee, Scotland

Chapter 2
Empowering Students to be Scientifically Literate through Digital Literacy........................................ 11
   Wan Ng, La Trobe University, Australia

Chapter 3
Achieving Multiple Literacy in Science Education: A Classroom Teacher’s Perspective..................... 32
   Sinclair Mackenzie, Science Teacher (Physics), Scotland

Chapter 4
Using Multimedia Learning Aids from the Internet for Teaching Chemistry:
Not as Easy as it Seems?............................................................................................................................... 49
   Ingo Eilks, University of Bremen, Germany
   Torsten Witteck, Engelbert-Kaempfer-Gymnasium, Lemgo, Germany
   Verena Pietzner, University of Hildesheim, Germany
Chapter 5
Three Primary Science Podcasts: Illustrating the Contextual and Staging Dimensions of Language in Podcasts ............................................................ 70
Susan Rodrigues, University of Dundee, Scotland
Graham Williamson, University of Dundee, Scotland

Chapter 6
Diffusion of ICT Innovation in Science Education .................................................. 84
Bulent Cavas, Dokuz Eylul University, Turkey
Pinar Cavas, Ege University, Turkey
Bahar Karaoglan, Ege University, Turkey
Tarik Kisla, Ege University, Turkey

Chapter 7
The Role of ICTs in Primary Science Education in Developing a Community of Learners to Enhance Scientific Literacy ........................................... 103
Beverley Jane, Monash University, Australia
Marilyn Fleer, Monash University, Australia
John Gipps, Monash University, Australia

Chapter 8
Multiple Literacies and Environmental Science Education: Information Communication Technologies in Formal and Informal Learning Environments .......................................................... 123
Ruth Hickey, James Cook University, Australia
Hilary Whitehouse, James Cook University, Australia

Chapter 9
Enhancing ICT Application in Science and Mathematics Education:
The Malaysian Smart School Experience .......................................................... 142
Suan Yoong, Sultan Idris University of Education, UPSI, Malaysia
Lee Yuen Lew, Long Island University C. W. Post Campus, USA

Chapter 10
AVU’s Experience in Increasing Access to Quality Higher Education through e-Learning in Sub-Saharan Africa .......................................................... 165
Bakary Diallo, African Virtual University, Headquarters Nairobi, Kenya
Sidiki Traoré, African Virtual University, Regional Office Dakar, Senegal
Therrezinha Fernandes, African Virtual University, Regional Office Dakar, Senegal

Chapter 11
Multiple Literacies in the ICT Age: Implications for Teachers and Teacher Educators, An Australian Perspective .......................................................... 180
Heather Fehring, RMIT, Australia
Chapter 12
Online Assessment: Informing Practice in Tertiary Science Education ............................................... 207
  David Walker, University of Dundee, Scotland

Chapter 13
Enhancing Scientific Literacy through the Industry Site Visit .......................................................... 225
  Jari Lavonen, University of Helsinki, Finland
  Antti Laherto, University of Helsinki, Finland
  Anni Loukomies, University of Helsinki, Finland
  Kalle Juuti, University of Helsinki, Finland
  Minkee Kim, University of Helsinki, Finland
  Jarkko Lampiselkä, University of Helsinki, Finland
  Veijo Meisalo, University of Helsinki, Finland

Chapter 14
  Andrew Marks, Independent Researcher, UK

Chapter 15
Learning, Old Age and Email ............................................................................................................. 249
  John S. Murnane, The University of Melbourne, Australia

Chapter 16
Virtual Worlds for Science Learning ................................................................................................ 263
  Mick Grimley, University of Canterbury, New Zealand
  Trond Nilsen, University of Canterbury, New Zealand
  Roslyn Kerr, University of Canterbury, New Zealand
  Richard Green, University of Canterbury, New Zealand
  David Thompson, University of Canterbury, New Zealand

Chapter 17
Representational Inquiry Competences in Science Games .............................................................. 280
  Rikke Magnussen, Aarhus University, Denmark

Compilation of References .................................................................................................................. 298

About the Contributors ....................................................................................................................... 332

Index .................................................................................................................................................. 341
