Preface .......................................................................................................................... vii

Section I: Modeling Cognition

Chapter I
The Goose, the Fly, and the Submarine Navigator: Interdisciplinarity in Artificial Cognition Research ................................................................. 1
Alexander Riegler, Center Leo Apostel for Interdisciplinary Studies, Belgium

Chapter II
An Embodied Logical Model for Cognition in Artificial Cognition Systems .......... 27
Guilherme Bittencourt, Universidade Federal de Santa Catarina, Brazil
Jerusa Marchi, Universidade Federal de Santa Catarina, Brazil

Chapter III
Modeling Field Theory of Higher Cognitive Functions ...................................... 64
Leonid Perlovsky, Air Force Research Center, USA
Section II: Methodological Issues

Chapter IV
Reconstructing Human Intelligence within Computational Sciences: An Introductory Essay ................................................................. 106
Gerd Doeben-Henisch, University of Applied Sciences Frankfurt am Main, Germany

Chapter V
Stratified Constraint Satisfaction Networks in Synergetic Multi-Agent Simulations of Language Evolution ................................................. 140
Alexander Mehler, Bielefeld University, Germany

Section III: Cognition and Robotics

Chapter VI
Language Evolution and Robotics: Issues on Symbol Grounding and Language Acquisition .............................................................. 176
Paul Vogt, University of Edinburgh, UK and Tilburg University, The Netherlands

Chapter VII
Evolutionary Robotics as a Tool to Investigate Spatial Cognition in Artificial and Natural Systems .......................................................... 210
Michela Ponticorvo, University of Calabria, Italy
Richard Walker, XiWrite s.a.s., Italy
Orazio Miglino, University of Naples “Federico II”, Italy

Chapter VIII
The Meaningful Body: On the Differences Between Artificial and Organic Creatures ............................................................... 238
Willem Haselager, Raboud University, The Netherlands
Maria Eunice Q. Gonzalez, UNESP, Brazil

Section IV: Cognition in Virtual Agents

Chapter IX
Making Meaning in Computers: Synthetic Ethology Revisited ......................... 252
Bruce MacLennan, University of Tennessee, USA

Chapter X
Environmental Variability and the Emergence of Meaning: Simulational Studies Across Imitation, Genetic Algorithms, and Neural Networks ......................... 284
Patrick Grim, State University of New York at Stony Brook, USA
Trina Kokalis, State University of New York at Stony Brook, USA
Section V: Theoretical and Philosophical Issues

Chapter XI
Mimetic Minds: Meaning Formation through Epistemic Mediators and External Representations .............................................................. 327
Lorenzo Magnani, University of Pavia, Italy

Chapter XII
First Steps in Experimental Phenomenology ......................................................... 358
Roberto Poli, University of Trento, Italy

About the Authors ................................................................................................. 387

Index ................................................................................................................... 393
