Organizational Cognition and Learning: Building Systems for the Learning Organization

Table of Contents

Foreword ................................................................. ix

Preface ................................................................. xiv

Section I: Organizational Learning

Chapter I
Managing Knowledge in the Cognitive Organization ...................... 1
The Digital Revolution and the Cognitive Machine ....................... 2
The Digital Revolution and the Cognitive Organization .................. 5
The Emergence of Knowledge Management .................................. 7
Filling the Gap Between Knowledge and Learning ....................... 14
Conclusion: Knowledge Management in an Organizational Learning Perspective .................................................. 17

Chapter II
Complexity as a Resource ................................................. 23
The Experience of Complexity .............................................. 24
Experiencing Complexity: The Paradoxes .................................. 28
Coping with Paradoxes Through Learning and Language ............. 31
Learning as the Explanation of Complexity ............................... 33
Conclusion .................................................................... 35
Components of a Verbal Model .......................................................... 167
Fuzzy Reasoning .............................................................................. 169
Fuzzy Multiattribute Techniques ..................................................... 170
An Example of a Linguistic Connective: The Fuzzy Quantifier ............ 172
From Theory to Practice .................................................................. 173

Chapter XIII
Modeling Verbal Judgements ............................................................... 178
The Fuzziness of Verbal Judgments .................................................. 179
A Model for the Representation of Verbal Judgment:
  Logical and Linguistic Truth ......................................................... 181
Properties of the Dual Truth Model .................................................. 185
The Representation of Judgment Through Fuzzy Scales ...................... 187
How to Aggregate Verbal Judgments ............................................... 189
Conclusion ....................................................................................... 192

Chapter XIV
Modeling Rules .................................................................................. 195
Examples of Verbal Models ............................................................... 196
A Verbal Model of Organizational Analysis ........................................ 196
The Representation of Discourses Through a Fuzzy Causal Map .......... 199
Conclusion ....................................................................................... 203

Chapter XV
The Management of Grey Knowledge Through Causal Maps:
A Field Example ................................................................................ 205
  Knowledge Management in Software Development
    Through Causal Maps ................................................................... 206
  Critical Issues in Formal Methodology Adoption for
    Software Development .................................................................. 207
  Eliciting and Mapping Theories of Action in the
    Life Cycle Selection Through Causal Maps .................................. 210
  Conclusion ....................................................................................... 219

Section IV:
Implications and Perspectives

Chapter XVI
Organizational Observers as Agents of Change .................................... 226
Three Problems ................................................................................ 227
The Problem of Distancing: The Organizational Analyst as an
  Agent of Change .......................................................................... 227
About the Authors................................................................................................................. 318
Index....................................................................................................................................... 320
