Preface ............................................................................................................................................xvii

Acknowledgment ..........................................................................................................................xxiii

Section I
Artificial Higher Order Neural Networks for Economics

Chapter I
Artificial Higher Order Neural Network Nonlinear Models: SAS NLIN or HONNs? ..................1
Ming Zhang, Christopher Newport University, USA

Chapter II
Higher Order Neural Networks with Bayesian Confidence Measure for the Prediction
of the EUR/USD Exchange Rate ..................................................................................................48
Adam Knowles, Liverpool John Moores University, UK
Abir Hussain, Liverpool John Moores University, UK
Wael El Deredy, Liverpool John Moores University, UK
Paulo G. J. Lisboa, Liverpool John Moores University, UK
Christian L. Dunis, Liverpool John Moores University, UK

Chapter III
Automatically Identifying Predictor Variables for Stock Return Prediction ..........................60
Da Shi, Peking University, China
Shaohua Tan, Peking University, China
Shuzhi Sam Ge, National University of Singapore, Singapore

Chapter IV
Higher Order Neural Network Architectures for Agent-Based
Computational Economics and Finance ..................................................................................79
John Seiffertt, Missouri University of Science and Technology, USA
Donald C. Wunsch II, Missouri University of Science and Technology, USA
Chapter V
Foreign Exchange Rate Forecasting Using Higher Order Flexible Neural Tree .................................. 94
Yuehui Chen, University of Jinan, China
Peng Wu, University of Jinan, China
Qiang Wu, University of Jinan, China

Chapter VI
Higher Order Neural Networks for Stock Index Modeling ............................................................ 113
Yuehui Chen, University of Jinan, China
Peng Wu, University of Jinan, China
Qiang Wu, University of Jinan, China

Section II
Artificial Higher Order Neural Networks for Time Series Data

Chapter VII
Ultra High Frequency Trigonometric Higher Order Neural Networks
for Time Series Data Analysis ................................................................. 133
Ming Zhang, Christopher Newport University, USA

Chapter VIII
Artificial Higher Order Pipeline Recurrent Neural Networks
for Financial Time Series Prediction .......................................................... 164
Panos Liatsis, City University, London, UK
Abir Hussain, John Moores University, UK
Efstathios Milonidis, City University, London, UK

Chapter IX
A Novel Recurrent Polynomial Neural Network for Financial Time Series Prediction .................... 190
Abir Hussain, John Moores University, UK
Panos Liatsis, City University, London, UK

Chapter X
Generalized Correlation Higher Order Neural Networks for Financial Time Series Prediction ....... 212
David R. Selviah, University College London, UK
Janti Shawash, University College London, UK

Chapter XI
Artificial Higher Order Neural Networks in Time Series Prediction ............................................. 250
Godfrey C. Onwubolu, University of the South Pacific, Fiji
Chapter XII
Application of Pi-Sigma Neural Networks and Ridge Polynomial Neural Networks to Financial Time Series Prediction ................................................................. 271
Rozaida Ghazali, Liverpool John Moores University, UK
Dhiya Al-Jumeily, Liverpool John Moores University, UK

Section III
Artificial Higher Order Neural Networks for Business

Chapter XIII
Electric Load Demand and Electricity Prices Forecasting Using Higher Order Neural Networks Trained by Kalman Filtering ................................................................. 295
Edgar N. Sanchez, CINVESTAV, Unidad Guadalajara, Mexico
Alma Y. Alanis, CINVESTAV, Unidad Guadalajara, Mexico
Jesús Rico, Universidad Michoacana de San Nicolas de Hidalgo, Mexico

Chapter XIV
Adaptive Higher Order Neural Network Models and Their Applications in Business .................. 314
Shuxiang Xu, University of Tasmania, Australia

Chapter XV
CEO Tenure and Debt: An Artificial Higher Order Neural Network Approach .......................... 330
Jean X. Zhang, George Washington University, USA

Chapter XVI
Modelling and Trading the Soybean-Oil Crush Spread with Recurrent and Higher Order Networks: A Comparative Analysis ...................................................... 348
Christian L. Dunis, CIBEF, and Liverpool John Moores University, UK
Jason Laws, CIBEF, and Liverpool John Moores University, UK
Ben Evans, CIBEF, and Dresdner-Kleinwort-Investment Bank in Frankfurt, Germany

Section IV
Artificial Higher Order Neural Networks Fundamentals

Chapter XVII
Fundamental Theory of Artificial Higher Order Neural Networks ............................................. 368
Madan M. Gupta, University of Saskatchewan, Canada
Noriyasu Homma, Tohoku University, Japan
Zeng-Guang Hou, The Chinese Academy of Sciences, China
Ashu M. G. Solo, Maverick Technologies America Inc., USA
Takakuni Goto, Tohoku University, Japan
Chapter XVIII
Dynamics in Artificial Higher Order Neural Networks with Delays .......................................................... 389
   Jinde Cao, Southeast University, China
   Fengli Ren, Southeast University, China
   Jinling Liang, Southeast University, China

Chapter XIX
A New Topology for Artificial Higher Order Neural Networks: Polynomial Kernel Networks ........ 430
   Zhao Lu, Tuskegee University, USA
   Leang-san Shieh, University of Houston, USA
   Guanrong Chen, City University of Hong Kong, China

Chapter XX
High Speed Optical Higher Order Neural Networks for Discovering Data Trends
and Patterns in Very Large Databases ........................................................................................................... 442
   David R. Selviah, University College London, UK

Chapter XXI
On Complex Artificial Higher Order Neural Networks: Dealing with Stochasticity,
Jumps and Delays ........................................................................................................................................ 466
   Zidong Wang, Brunel University, UK
   Yurong Liu, Yangzhou University, China
   Xiaohui Liu, Brunel University, UK

Chapter XXII
Trigonometric Polynomial Higher Order Neural Network Group Models
and Weighted Kernel Models for Financial Data Simulation and Prediction ........................................... 484
   Lei Zhang, University of Technology, Sydney, Australia
   Simeon J. Simoff, University of Western Sydney, Australia
   Jing Chun Zhang, IBM, Australia

About the Contributors .................................................................................................................................. 504
