The editors would first like to thank the chapter authors for their insights and excellent contributions to this book, as well as Pr. Georges Gardarin, who kindly accepted to write the foreword of this book.

The editors would also like to acknowledge the help of all involved in the review process of the book, without whose support the project could not have been satisfactorily completed. Their comprehensive and constructive comments helped in improving the quality of this book and fueled very exciting discussions. We have indeed noticed that a true debate emerged during the review process, thus showing that this research field is very promising.

Finally, special thanks go to the publishing team at Idea Group Inc., and especially to Ms. Michele Rossi and Kristin Roth, who made our job as editors smooth and easy.
