Acknowledgment

During this editorial I was lucky to have the support of my colleagues at IGI, who helped me review, produce, and market this book. My thanks go especially to Lynley Lapp, who provided invaluable feedback and advice during the first half of the editorial process. I would also like to thank Meg Stocking, who managed the process of transforming a set of individual chapters into a book. I am also grateful to Professor Andy Gordon of Microsoft Research, who wrote the foreword to the book. I would finally like to thank my review team for their contribution.
