Acknowledgments

The editors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed. First, we would like to thank the authors for their insights and excellent contributions, as well as for their enthusiasm for putting this book together. Most of the authors of chapters included in this also served as referees for articles written by other authors. Thanks go to all those who provided constructive and comprehensive reviews. Besides the authors, we are grateful to Vlatka Hlupic, Murat Baygeldi, George Giaglis, and Xenia Ziouvelou, who have also contributed to the review process.

A further special note of thanks goes also to all the staff at Idea Group Publishing, whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular, we would like to thank Mehdi Khosrow-Pour, who motivated us to initially accept his invitation for taking on this project. Last but not least we would like to thank Sofia Filidou at the Athens University of Economics and Business for helping us manage the call for chapters, the submissions, the copyright forms and camera-ready versions, and for her constant attention to detail.

The financial support of the Information Society Technologies Programme of the European Commission to the ‘E-FACTORS’ project (IST-2001-34868, www.e-factors.net) has been instrumental throughout the period of incubation of this volume. This project has motivated many of the ideas presented here.

George Doukidis, Nikos Mylonopoulos, and Nancy Pouloudi
