The editors would like to acknowledge the help of all the people involved in this project and, more specifically, the authors and reviewers that took part in the review process. Without their support, this book would not have become a reality.

Firstly, the editors would like to thank each one of the authors for their contributions. Our sincere gratitude goes to the chapter authors who contributed their time and expertise to this book.

Secondly, the editors wish to acknowledge the valuable contributions of the reviewers regarding the improvement of quality, coherence, and content presentation of chapters. Most of the authors also served as referees; we highly appreciate their double task. Our special thanks to David Forest for his valuable comments.

A special thanks to Dr. Ángel Jordán for writing the Foreword.

Our special thanks also go to the publishing team at IGI Global for considering the edited book proposal academically and publishing it for the intended readership. If not for them, this effort would have no meaning at all. In particular, we would like to thank Erin O’Dea, Jan Travers, Allyson Gard, and Monica Speca for their endless support and cooperation.

Dr. Colomo-Palacios would like to thank his (lovely and beautiful) wife, Cristina, a constant source of inspiration, encouragement, and endless love, and Rodrigo, the charming kid.

Dr. Calvo-Manzano would like to thank his loving family: Magdalena and all his children, Ana, Manuel, and María.

Dr. Amescua wants to thank two wonderful sisters, Mercedes and Carmen Campos, and Enrique González-Ruano, his father and reference model, whom he has always trusted and who has supported his teaching and research activity in the public university.

Dr. San Feliu Gilabert wants to thank his family. They encouraged him to pursue the dream to be a professor.
