Table of Contents

Detailed Table of Contents ................................................................................................................ vii
Preface ................................................................................................................................................ xiii

Section I
Setting Standards

Chapter I
Challenges for Formal Standardization: The Institutional Reforms of 2008-2010 Reconsidered / Ulrich Blum........................................................................................................................................... 1

Chapter II
IT Standardization: The Billion Dollar Strategy / John Hurd and Jim Isaak ........................................... 20

Chapter III
Best Practice in Company Standardization / Henk J. de Vries.............................................................. 27

Section II
Specifics of Standards and Standards Setting

Chapter IV
Open Standards Requirements / Ken Krechmer .................................................................................... 49

Chapter V
The Role of Individuals and Social Capital in POSIX Standardization / Jim Isaak ......................... 66

Chapter VI
Linguistic Qualities of International Standards / Hans Teichmann, Henk J. de Vries, and Albert Feilzer ................................................................................................................................. 86
Section III
Diffusion and Adoption of Standards

Chapter VII
A Diffusion Model for Communication Standards in Supply Networks / Michael Schwind, Tim Stockheim, and Kilian Weiss .......................................................................................................................... 105

Chapter VIII
Scope and Timing of Deployment: Moderators of Organizational Adoption of the Linux Server Platform / Joel West and Jason Dedrick.......................................................... 122

Section IV
IS Perspectives

Chapter IX
Standards for Business Component Markets: An Analysis from Three Theoretical Perspectives / Heiko Hahn and Klaus Turowski................................................................. 143

Chapter X
Should Buyers Try to Shape IT Markets Through Nonmarket (Collective) Action? Antecedents of a Transaction Cost Theory of Network Effects / Kai Reimers and Mingzhi Li ....... 163

Chapter XI
Comparing the Standards Lens with Other Perspectives on IS Innovations: The Case of CPFR / M. Lynne Markus and Ulric J. Gelinas, Jr................................................................. 185

Section V
Cases and Projects

Chapter XII
Market Response to ISO 9000 Certification of Software Engineering Processes / G. Keith Fuller and Ilan Vertinsky.......................................................................................... 203

Chapter XIII
The Value of Web Design Standards for Mobile Computing / Matt Germonprez, Michel Avital, and Nikhil Srinivasan ......................................................................................... 214

Chapter XIV
Developing Country Perspectives on Software: Intellectual Property and Open Source. A Case Study of Microsoft and Linux in China / Xiaobai Shen .............................................. 227
Chapter XV
COPRAS: Encouraging ICT Research Projects to Produce More Tangible Standardization Results / Bart Brusse
