Foreword .................................................................................................................. xx

Preface ..................................................................................................................... xxiii

Acknowledgment ...................................................................................................... xxxiii

Introduction ............................................................................................................... xxxiv

Section 1  
Teaching, Learning and Assessment

Chapter 1  
The Nature of Third Grade Student Experiences with Concept Maps to Support Learning of Science Concepts ................................................................. 1  
*Margaret L. Merrill, Educational Consultant, USA*

Chapter 2  
Critical Thinking and Writing Informational Texts in a Grade Three Classroom ................................................................................................................... 38  
*Robin M. Bright, University of Lethbridge, Canada  
Bev Smith, Jennie Emery Elementary School, Canada*

Chapter 3  
Examples of Concept Mapping in a School Setting: A Look at Practical Uses ......................................................................................................................... 67  
*Cristine G. Goldberg, University of West Georgia, USA*

Chapter 4  
Can Mapping Improve the Quality of Critical Thinking in Essay Writing in an Introductory Level, Core Curriculum Class? ...................................................... 102  
*Leonard Shedletsky, University of Southern Maine, USA*
Chapter 5
A Case on Teaching Critical Thinking and Argument Mapping in a Teacher Education Context ................................................................. 119

Yasemin Oral, İstanbul University, Turkey

Chapter 6
Confronting Critical Thinking Challenges “in” the College Classroom ........ 140
Chigozirim Ifedapo Utah, University of Nebraska – Lincoln, USA
Alexis Waters, University of Nebraska – Lincoln, USA

Chapter 7
Making Sense of Intercultural Interaction .................................................. 157

Kate Dunsmore, Fairleigh Dickinson University, USA

Chapter 8
Self-Inquiry and Group Dynamics: A Multidisciplinary Framework for Critical Thinking ................................................................. 178

Katia Gonzalez, Wagner College, USA
Rhoda Frumkin, Wagner College, USA
John Montgomery, SUNY, New Paltz, USA

Chapter 9
Teaching Critical Thinking to First-Year Medical Students through Concept Mapping .............................................................................. 197

Amina Sadik, Touro University Nevada, USA

Chapter 10
Concept Maps as Replacements of Written Essays in Efficient Assessment of Complex Medical Knowledge .................................................... 223

Gloria Gomez, University of Southern Denmark, Denmark
Robin Griffiths, University of Otago, New Zealand
Pooshan Navathe, University of Otago, New Zealand

Chapter 11
Talmud Diagrams ................................................................................... 272

Israel Ury, Jewish Content Laboratories, Israel
Section 2
Visual Representations for Design and Collaboration

Chapter 12
Conceptual Mapping Facilitates Coherence and Critical Thinking in the Science Education System........................................................................................................296

James Gorman, Northbridge High School, USA
Jane Heinze-Fry, Museum Institute for Teaching Science, USA

Chapter 13
Critical Thinking, Critical Looking: Key Characteristics of an Educated Person.........................................................................................................................335

Richard C. Emanuel, Alabama State University, USA
Siu Challons-Lipton, Queens University of Charlotte, USA

Chapter 14
Mind Mapping for Critical Thinking ..................................................................................................................................................................................354

Roxanne M. O’Connell, Roger Williams University, USA

Chapter 15
Concept Maps, VoiceThread, and Visual Images: Helping Educators Spawn Divergent Thinking and Dialogic Learning......................................................387

Kristen M. Snyder, Mid Sweden University, Sweden

Chapter 16
Learning Argumentation Practices in School with a Graphical Synchronous Discussion Tool..................................................................................................418

Amnon Glassner, The Kaye Academic College of Education, Israel
Baruch B. Schwarz, The Hebrew University of Jerusalem, Israel

Chapter 17
Mapping the Doctorate: A Longitudinal Study of PhD Students and their Supervisors........................................................................................................446

Camille B. Kandiko Howson, King’s College London, UK
Ian Kinchin, University of Surrey, UK
Chapter 18
Mapping Out Scientists’ Messages: Models that Support Collaborative Critical Thinking

Annette deCharon, University of Maine, USA

Chapter 19
Concept Maps and the Systematization of Knowledge

Patrícia Lupion Torres, Pontifical Catholic University of Paraná (PUCPr), Brazil
Marcus Vinícius Santos Kucharski, Federal University of Technology – Paraná (UTFPr), Brazil
Rita de Cássia Veiga Marriott, Federal University of Technology – Paraná (UTFPr), Brazil
