Acknowledgment

This edited book could not have been accomplished without a collective effort. Therefore, we would like to gratefully acknowledge the selfless support of people who extended their hands to help us to make this project successful. First of all, we sincerely thank the chapter authors for their valuable contributions to this endeavor and their disciplined cooperation. In addition, many thanks go to the Editorial Advisory Board members, Pirjo Laaksonen, Barry Davies, Len Tiu Wright, Carmen Santos, Alkis Thrassou, Demetris Vrontis, Samuel Rabino and Natarjan Chandrasekhar for their precious academic advice in selecting and reviewing the chapters in the manuscript and providing constructive comments. Furthermore, we would like to express our gratitude to all the subject experts for volunteering in the chapter review process. We would like to acknowledge the friendly and supportive role of the editorial staff of IGI Global, especially Allyson Gard, for her relentless help and support at different stages of the manuscript development starting from the book proposal acquisition to the final manuscript development. Last, but not least, we are very grateful to all our family members for their continuous encouragement and inspiration to make this project a success.
