Successful Strategies in Supply Chain Management

Table of Contents

Foreword ................................................................................................................................. vi

Preface ................................................................................................................................. vii

Chapter I. A Co-Ordinated Single-Vendor Multi-Buyer Supply Chain Model: Synchronisation of Ordering and Production Cycles ... 1
  Chi Kin Chan, The Hong Kong Polytechnic University, Hong Kong
  Brian G. Kingsman, Lancaster University, UK

Chapter II. Multi-Stage Efficiency Tools for Goal Setting and Monitoring in Supply Chains ......................................................... 28
  Marvin D. Troutt, Kent State University, USA
  Paul J. Ambrose, University of Wisconsin - Milwaukee, USA
  Chi Kin Chan, The Hong Kong Polytechnic University, Hong Kong

Chapter III. Optimal Feedback Production for a Supply Chain ... 50
  K. H. Wong, University of the Witwatersrand, South Africa
  H.W.J. Lee, The Hong Kong Polytechnic University, Hong Kong
  Chi Kin Chan, The Hong Kong Polytechnic University, Hong Kong

Chapter IV. Life Cycle Considerations for Supply Chain Strategy .................................................................................................. 67
  Toru Higuchi, Sakushin Gakuin University, Japan
  Marvin D. Troutt, Kent State University, USA
  Brian A. Polin, Jerusalem College of Technology, Israel
Chapter V. The Effect of Different Payment Terms on Order Variability in a Supply Chain ............................................................... 90
   I Nyoman Pujawan, The University of Manchester, UK

Chapter VI. Supply Chain Globalization and the Complexities of Cost-Minimization Strategies ........................................................... 109
   Brian A. Polin, Jerusalem College of Technology, Israel
   Marvin D. Troutt, Kent State University, USA
   William Acar, Kent State University, USA

Chapter VII. Genetic Algorithm and Other Meta-Heuristics: Essential Tools for Solving Modern Supply Chain Management Problems ........................................................................................................ 144
   Bernard K.-S. Cheung, GERAD & Ecole Polytechnique of Montreal, Canada

Chapter VIII. Understanding and Managing the Intrinsic Dynamics of Supply Chains ................................................................................. 174
   Toru Higuchi, Sakushin Gakuin University, Japan
   Marvin D. Troutt, Kent State University, USA

Chapter IX. Re-Engineering of Logistics Activities for Electronic Commerce .......................................................................................... 194
   Nathalie Marcoux, Ecole Polytechnique of Montreal, Canada
   Diane Riopel, Ecole Polytechnique of Montreal, Canada
   André Langevin, Ecole Polytechnique of Montreal, Canada

Chapter X. Studies on Interaction and Coordination in Supply Chains with Perishable Products: A Review .................................... 222
   Xiping Song, The Chinese University of Hong Kong, Hong Kong
   Xiaoqiang Cai, The Chinese University of Hong Kong, Hong Kong
   Jian Chen, Tsinghua University, P.R. China

About the Authors .............................................................................. 249
