Table of Contents

Preface ................................................................................................................................................ xiv

Chapter I
3SST Model: A Three Step Spatio-Temporal Conceptual and Relational Data Model ................. 1
   Andreea Sabău, Babeş-Bolyai University, Romania

Chapter II
An Identity Perspective for Predicting Software Development Project Temporal Success ........... 15
   Jeff Crawford, University of Tulsa, USA

Chapter III
Survey of Cardinality Constraints in Snapshot and Temporal Semantic Data Models ................. 25
   Faiz Currim, University of Iowa, USA
   Sudha Ram University of Arizona, USA

Chapter IV
On the Load Balancing of Business Intelligence Reporting Systems ......................................... 42
   Leszek Kotulski, AGH University of Science and Technology, Poland
   Dariusz Dymek, Cracow University of Economics, Poland

Chapter V
Information Systems Development: Understanding User Participation as a Social Network ........ 58
   Angela Mattia, Virginia Commonwealth University, USA
   Heinz Roland Weistroffer, Virginia Commonwealth University, USA

Chapter VI
Solutions to Challenges of Teaching “Systems Analysis and Design” for
   Undergraduate Software Engineers ...................................................................................................... 68
   Özlem Albayrak, Bilkent University, Turkey
Chapter VII
Systems Analysis and Design in Polish Universities Curricula: Structured or Object-Oriented........ 88
   Przemyslaw Polak, Warsaw School of Economics, Poland

Chapter VIII
Systems Engineering Modeling and Design .................................................................................. 96
   Kumar Saurabh, Satyam Computer Services Ltd., India

Chapter IX
UML 2.0 in the Modelling of the Complex Business Processes of Reporting
and Control of Financial Information System .................................................................................. 115
   Sebastian Kwapisz, University of Gdansk, Poland

Chapter X
The UML 2 Academic Teaching Challenge: An Integrated Approach ........................................... 134
   Stanislaw Wrycza, University of Gdansk, Poland

Chapter XI
User Interface Generation from the Data Schema ........................................................................... 145
   Akhilesh Bajaj, University of Tulsa, USA
   Jason Knight, University of Tulsa, USA

Chapter XII
Decision Rule for Investment in Reusable Code ............................................................................. 154
   Roy Gelbard, Bar-Ilan University, Israel

Chapter XIII
Web-Based Systems Development: An Empirically-Grounded Conceptual Framework ............... 161
   Michael Lang, National University of Ireland, Galway, Ireland

Chapter XIV
Configurable Reference Modeling Languages ................................................................................. 180
   Jan Recker, Queensland University of Technology, Australia
   Michael Rosemann, Queensland University of Technology, Australia
   Wil M. P. van der Aalst, Queensland University of Technology, Australia, & Eindhoven
   University of Technology, The Netherlands
   Monique Jansen-Vullers, Eindhoven University of Technology, The Netherlands
   Alexander Dreiling, SAP Research CEC Brisbane, SAP Australia Pty Ltd., Australia

Chapter XV
Designing Reputation and Trust Management Systems .................................................................... 202
   Roman Beck, Johann Wolfgang Goethe University, Germany
   Jochen Franke, Johann Wolfgang Goethe University, Germany
Chapter XVI
SEACON: An Integrated Approach to the Analysis and Design of Secure Enterprise Architecture-Based Computer Networks

Surya B. Yadav, Texas Tech University, USA

Chapter XVII
Formal Methods for Specifying and Analyzing Complex Software Systems

Xudong He, Florida International University, USA
Huiqun Yu, East China University of Science and Technology, China
Yi Deng, Florida International University, USA
