Acknowledgment

Automatic biometric recognition techniques are becoming increasingly important in corporate and public security systems. However, up to the present, most of the existing publications are on physical biometrics. To the best of our knowledge, this edited book is the first literature focusing on behavioral biometrics, which is very helpful to both researchers and practitioners. Therefore, we would like to express our sincere thanks to IGI Global to offer us the opportunity to edit such a book on this exciting area.

During the edition of this book, we received much help and support. First of all, we would like to thank all of the authors for submitting their wonderful works and apologize that not all chapter submissions could be accepted. We are also grateful to all of the chapter reviewers for their remarkable efforts on providing timely reviews of high quality. It was a great honor to have those worldwide leading experts join the Editorial Advisory Board of this book. They are Prof. Ahmed Awad (University of Victoria, Canada), Prof. Bir Bhanu (University of California, Riverside, USA), Prof. Hubert Cardot (Université François-Rabelais de Tours, France), Prof. Stan Li (Chinese Academy of Sciences, China), Prof. Mark Nixon (University of Southampton, UK), Prof. Tieniu Tan (Chinese Academy of Sciences, China), Prof. Anastasios Venetsanopoulos (Ryerson University, Canada), and Prof. David Zhang (Hong Kong Polytechnic University, China). We appreciate their valuable suggestions to strengthen the overall quality of this book and help to promote this publication. We are especially grateful to Prof. Mark Nixon for his time in writing the foreword for this book.

This book could not be possible without the help of the people involved at IGI Global. As a full-service publishing company, IGI Global staff handles all tasks related to production, registration, marketing and promotion, overseas distribution, and so on. As well as thanking the financial and technical support from IGI Global, special thanks go to Rebecca Beistline (Assistant Development Editor) and Christine Bufton (Administrative Editorial Assistant), for their assistance in guiding us each step of the way.
