Acknowledgment

The editors would like to thank a number of people who have made this book possible. First, we acknowledge the effort expended by the authors in contributing and refining their ideas over several iterations. Many authors have also acted as reviewers of other authors’ contributions. To them we owe double thanks. We designed the review process so that each contribution was reviewed double-blind by one peer author and by another researcher who had not been involved in the preparation of the book. Thanks too to the additional reviewers. We are especially honored that Major General (rtd) K. Gijsbers, General Manager of the NATO Communications and Information Agency, agreed to write the foreword of this book. His extensive operational experience makes him the right person to judge our scientific ideas. Throughout the whole process, we have been ably supported by our publishers, IGI Global. In particular, we are grateful for A. DeMarco’s amicable guidance as the Editorial Assistant assigned to us by IGI Global.
