# Table of Contents

Preface .................................................................................................................................................. xvi

**Section 1**  
Neuroprosthetics Theory and Model

**Chapter 1**  
Neuroprosthetics: Introduction ................................................................. 1  
*Ganesh R. Naik, University of Technology Sydney (UTS), Australia*

**Chapter 2**  
Retinal Prosthetics.................................................................................. 8  
*Milan Djilas, Vision Institute (INSERM/CNRS/UMPC), France  
Serge Picaud, Vision Institute (INSERM/CNRS/UMPC), France*

**Chapter 3**  
Sensors for Motor Neuroprosthetics: Current Applications and Future Directions............ 38  
*Emilia Ambrosini, Politecnico di Milano, Italy & Salvatore Maugeri Foundation, Scientific Institute of Lissone, Italy  
Noelia Chia Bejarano, Politecnico di Milano, Italy  
Alessandra Pedrocchi, Politecnico di Milano, Italy*

**Chapter 4**  
Models of Cooperation between Medical Specialists and Biomedical Engineers in Neuroprosthetics .................................................................................................................. 65  
*Emilia Mikołajewska, Military Clinical Hospital No. 10 and Polyclinic, Poland  
Dariusz Mikołajewski, Kazimierz Wielki University, Poland & Nicolaus Copernicus University, Poland*

**Chapter 5**  
Are We the Robots? Man-Machine Integration ........................................... 81  
*Iolanda Pisotta, Neurological Rehabilitation Department A and Clinical and Research Movement Analysis Lab (CaRMA), IRCCS Fondazione Santa Lucia, Italy & Department of Psychology, University of Rome “Sapienza”, Italy  
Silvio Ionta, Swiss Federal Institute of Technology (ETHZ), Switzerland & Centre Hospitalier Universitaire Vaudois (CHUV) & University of Lausanne (UNIL), Lausanne, Switzerland*
Chapter 6
Neuroprostheses as an Element of an Eclectic Approach to Intervention in Neurorehabilitation......101
Emilia Mikołajewska, Military Clinical Hospital No. 10 and Polyclinic, Poland

Chapter 7
Chances for and Limitations of Brain-Computer Interface use in Elderly People.........................116
Emilia Mikołajewska, Military Clinical Hospital No. 10 and Polyclinic, Poland
Dariusz Mikołajewski, Kazimierz Wielki University, Poland & Nicolaus Copernicus University, Poland
Tomasz Komendziński, Nicolaus Copernicus University, Poland
Joanna Dreszer-Drogorób, Nicolaus Copernicus University, Poland
Monika Lewandowska, Institute of Physiology and Pathology of Hearing, Poland
Tomasz Wolak, Institute of Physiology and Pathology of Hearing, Poland

Section 2
Neuroprosthetics for BCI and Other Applications

Chapter 8
Review of Applications for Wireless Brain-Computer Interface Systems...............................128
Soogil Woo, Gwangju Institute of Science and Technology, South Korea
Younghak Shin, Gwangju Institute of Science and Technology, South Korea
Seungchan Lee, Gwangju Institute of Science and Technology, South Korea
Heung-No Lee, Gwangju Institute of Science and Technology, South Korea

Chapter 9
Lower-Limb Neuroprostheses: Restoring Walking after Spinal Cord Injury .........................153
Monzurul Alam, The Hong Kong Polytechnic University, Hong Kong
Jufang He, The Hong Kong Polytechnic University, Hong Kong & City University of Hong Kong, Hong Kong

Chapter 10
Brain-Computer Interfaces for Assessment and Communication in Disorders of Consciousness.....181
Christoph Guger, Guger Technologies, Austria
Bettina Sorger, Maastricht University, The Netherlands
Quentin Noirhomme, University of Liège, Belgium
Lorina Naci, University of Western Ontario, Canada
Martin M. Monti, University of California, Los Angeles, USA
Ruben Real, Universität Würzburg, Germany
Christoph Pokorny, Graz University of Technology, Austria
Sandra Veser, University of Tübingen, Germany
Zulay Lugo, University of Liège, Belgium
Lucia Quitadamo, “Tor Vergata” University of Rome, Italy
Damien Lesenfants, Université de Liège, Belgium
Monica Risetti, Fondazione Santa Lucia, IRCCS, Italy
Rita Formisano, Fondazione Santa Lucia, IRCCS, Italy
Jlenia Toppi, “Sapienza” University of Rome, Italy
Chapter 11
Assistive Technology for Cognition: An Updated Review .................................................................215
  Catherine Best, University of Stirling, UK
  Brian O’Neill, Brain Injury Rehabilitation Trust, UK
  Alex Gillespie, London School of Economics, UK

Chapter 12
Brain-Computer Interfaces for Control of Upper Extremity Neuroprostheses in Individuals with
High Spinal Cord Injury .......................................................................................................................237
  Rüdiger Rupp, Heidelberg University Hospital, Spinal Cord Injury Center, Germany
  Martin Rohm, Heidelberg University Hospital, Spinal Cord Injury Center, Germany
  Matthias Schneiders, Heidelberg University Hospital, Spinal Cord Injury Center, Germany

Chapter 13
Practical Artifact Removal Brain-Computer Interface System: Application to Neuroprosthetics.....265
  Wei-Yen Hsu, National Chung Cheng University, Taiwan
