3D virtual human model 28

A

accurate motion retrieval 205
action parameters (APs) 220
action units (AUs) 179, 213, 297, 330
activation function 215
activation-emotion space 177
activation-evaluation space 178
active calibration 71, 78
active contour models 211
activity recognition algorithms 131
affective nature 176
AFX extensions 9
allophones 282
anchor points 274
animation 27, 318
animation frame 54
animation mask 54
animation parameters 37
animation parameters compression 38
animation principle 52
applications 1
archetypal emotions 179
ARTEMIS Animation Avatar Interface (3AI) 38
articulated synthetic object 45
articulated virtual character 45
artificial neural network (ANN) 215, 319, 321, 322
audio-based animation 282
audio-visual speech recognition 321
audio/video coding 27
augmented reality system 17
automatic adaptation 295
avatar 33, 203
avatar model 37

B
backpropagation 215
backpropagational neural networks (BPNNs) 215
base mesh 32
Binary Format for Scene (BIFS) 29, 33
"Black Box" Model 79
blobs 183
BLUE-C Project 358
body animation parameters (BAPs) 8, 35, 346, 357
body definition parameters (BDPs) 35
body deformation tables (BDTs) 40
body node 33, 35
body pose 176
bone-based animation (BBA) 29
bone controller 41
brightness constancy assumption 242
building module 37
bundle adjustment 103
"butterfly" scheme 58

C
calibration 112, 135
calibration control points 87
calibration feature points 87
camera calibration 70, 71, 205
camera calibration techniques 71
camera coordinate system (CCS) 72
camera imaging process 72
camera parameter recovery 90
Candide 300
centroid 185
cracter skeleton 28
chin and cheek contours 306
clip-and-paste method 238
clones 203
CMP (single chip multi-processor) 162
code book 189
coding system 298
color cues 180
color segmentation 143
computer graphics applications 2
computer vision 2
computer vision-based techniques 346
condensation 12
conditional likelihood 183
confidence 198
confusion matrix 193
connectivity-wireframe (CW) 32, 58
context of interaction 196
continuous human activity 15
"control hull" 58
coordinate systems (CSs) 72
Cr/Cb image 185
cylinders 5
cylindrical mapping 278

d
DCT-based quantification 252
de-rectification 120
deformable hand-shape templates 180
deformable model 213
deformation controller 42
deformation method 238
degrees of freedom (DOFs) 3, 73
delta rule 215
diffuse reradiation 206
dilation 307
diphthong 270
direct linear transformation (DLT) 87, 88
discrete cosine transform (DCT) 39
disk-structuring element 186
disparity map generation 133
displacer nodes 7
distance transform 186
distortion center  82
dynamic model  6

E
e-Tailor  351
e-Tailor technical approach  351
dynamic model  6
eigen Light Maps  250
ellipse fitting  143, 147
emotion  176
emotion information  219
emotion wheel  178
emotional body animation  357
emotional dictionary  176
emotional facial animation  357
emotional space  176
emotional speech analysis  356
emotional speech synthesis  356
emotional states  177
emotional video analysis  356
ERMIS project  196
erosion  307
Euclidean geometry  73
Euclidean transformation  73
explicit calibration  78
expression profiles  194
expression recognition  321
extrinsic transform matrix (ETM)  75
eyebrows  307

F
face and body animation (FBA)  29, 33, 178, 346
face animation  204
face detection  183
face model adaptation  297, 298
face model reconstruction  111
face node  33
face parameterisation module  37
face size  308
face space  239, 280
face/body animation parameters (FAP/BAP)  8
face/body animation tables (FAT/BATs)  9
facial action coding system (FACS)  179, 217, 220, 238, 297, 320
facial action parameters (FAPs)  112
facial action units (AUs)  213
facial animation  204
facial animation parameter (FAP)  8, 34, 179, 213, 239, 246, 253, 299, 357
facial animation tables (FAT)  357
facial definition parameter (FDP)  8, 179, 214
facial deformation modeling  322
facial deformations  268
facial description parameter (FDP)  357
facial expression  204, 235
facial expression modeling  238
facial feature estimation  301, 308
facial feature extraction  183
facial features  179
facial motion & expression image analysis  205
facial motion analysis  320
facial motion data  322
facial motion synthesis  321
facial motion understanding  219
facial muscle distribution  326
FBA compliant data  37
FBA decoder  34
FDP feature points (FPs)  181
feature-based estimation  239
first order left-to-right models  189
focal plane  74
frame  103
fuzzification  195
fuzzy class  194
fuzzy logic  218
fuzzy systems  218

G
Gaussian mixture model (GMM)  217, 321
general purpose processors (GPP)  144
generic head model  272
geometric curves 211
gesture classes 189
gesture classification 188
gesture-activity recognition 130
global hand motion 180
global head motion 242
graph matching 143, 148

H

H-Anim (Humanoid Animation Working Group) 345
hand and body modeling 342
hand clapping 189
hand detection 185
hand gestures 176
hand lift 189
hand localization 180
head detection 208
head tracking 203
heterogeneous networks 29
Hidden Markov Model (HMM) 143,
148, 181, 217, 320, 322
hierarchic animation 57
hierarchical, robust scheme 183
high level facial parameter 356
holistic linear subspace 324
human body analysis/synthesis techniques 348, 360
human body animation 352
human body applications 348
human body modeling 2
human body models (HBMs) 2
human body parts 130
human body surface reconstruction 19
human body surface recovering 19
human computer interaction (MMI) 180,
321
human emotion perception study 335
human facial motion 320
human gesture recognition 146
human hand motion 180
human motion recognition 15
human motion tracking 10, 12
human tracking 10
human tracking system 140
humanoid animation framework 9
humanoid animation specification (H-
anim) 7
humanoids 7
hybrid classification procedure 218
hybrid recursive matching (HRM) 134

I

iFACE 323
image based rendering (IBR) 77

Excellent additions to your institution’s library!  
Recommend these titles to your Librarian!

To receive a copy of the IRM Press catalog, please contact  
1/717-533-8845, fax 1/717-533-8661,  
or visit the IRM Press Online Bookstore at: [http://www.irm-press.com]!

Note: All IRM Press books are also available as ebooks on netlibrary.com as well as other ebook sources. Contact Ms. Carrie Skovrinskie at cskovrinskie@idea-group.com to receive a complete list of sources where you can obtain ebook information or IRM Press titles.
During the past decade, with the advent of telecommunications and the availability of distance learning opportunities, more college and university libraries can now provide access to comprehensive collections of research literature through access to online databases.

The InfoSci-Online database is the most comprehensive collection of full-text literature regarding research, trends, technologies, and challenges in the fields of information science, technology and management. This online database consists of over 3000 book chapters, 200+ journal articles, 200+ case studies and over 1,000+ conference proceedings papers from IGI’s three imprints (Idea Group Publishing, Information Science Publishing and IRM Press) that can be accessed by users of this database through identifying areas of research interest and keywords.

Contents & Latest Additions:
Unlike the delay that readers face when waiting for the release of print publications, users will find this online database updated as soon as the material becomes available for distribution, providing instant access to the latest literature and research findings published by Idea Group Inc. in the field of information science and technology, in which emerging technologies and innovations are constantly taking place, and where time is of the essence.

The content within this database will be updated by IGI with 1300 new book chapters, 250+ journal articles and case studies and 250+ conference proceedings papers per year, all related to aspects of information, science, technology and management, published by Idea Group Inc. The updates will occur as soon as the material becomes available, even before the publications are sent to print.

InfoSci-Online pricing flexibility allows this database to be an excellent addition to your library, regardless of the size of your institution.

Contact: Ms. Carrie Skovrinskie, InfoSci-Online Project Coordinator, 717-533-8845 (Ext. 14), cskovrinskie@idea-group.com for a 30-day trial subscription to InfoSci-Online.
Multimedia systems and content-based image retrieval are very important areas of research in computer technology. Numerous research works are being done in these fields at present. These two areas are changing our life-styles because they together cover creation, maintenance, accessing and retrieval of video, audio, image, textual and graphic data. But still several important issues in these areas remain unresolved and further research works are needed to be done for better techniques and applications. Multimedia Systems and Content-Based Image Retrieval addresses these unresolved issues and highlights current research.

“Multimedia Systems and Context-Based Image Retrieval contributes to the generation of new and better solutions to relevant issues in multi-media-systems and content-based image retrieval by encouraging researchers to try new approaches mentioned in the book.”
– Sagarmay Deb, University of Southern Queensland, Australia
