Karin Axelsson holds a PhD in Information Systems Development from Linköping University, Sweden. She is currently assistant professor in the Department of Computer and Information Science at Linköping University, where she is responsible for single-subject courses in information systems. Her main research interests are focused on e-commerce, inter-organizational information systems, and development and applications of business action theory. She is a member of the Swedish research network VITS, in which she is responsible for the research area of inter-organizational relations and electronic commerce. This research area includes projects about business relations, inter-organizational business development, business networks and IT, and IOS development.

Christopher D. Barko is an Information Technology professional at Laboratory Corporation of America. His IT industry experience spans many years in various consulting, business intelligence, software engineering and analyst positions for a number of Fortune 500 organizations. He received his BBA in Computer Information Systems from James Madison University and MBA from the University of North Carolina at Greensboro, where he specialized in Decision Support Systems. His
current research interests include organizational data mining, business intelligence and customer relationship management, and how these technologies can enhance the organizational decision-making process to optimize resource allocation and improve profitability. His research has been published in several leading journals such as the *Journal of Data Warehousing*, *Journal of Computer Information Systems*, and others. He is president of Customer Analytics, Inc., a consultancy that leverages advanced analytics to deliver profitable database marketing solutions.

**Elliot Bendoly** is an assistant professor of Operations Management at Emory University’s Goizueta Business School. He received a PhD in the fields of Operations Management and Decision Sciences from Indiana University. His research focuses on organizational behavioral issues in resource allocation decisions and on operational/strategic constraints to the benefits of ERP and transactional IT. He has published work in the *Journal of Applied Psychology*, *European Journal of Operational Research, Decision Support Systems, Information & Management* and *Journal of Economic and Management Strategy*.

**Chuan-Feng Chiu** received his PhD in Computer Engineering from Tamkang University, Taiwan (2002). He received his MS and BS in the same major in 1999 and 1995, respectively. Since 1999, Dr. Chiu published many refereed papers in international conferences and journals. Dr. Chiu’s research interests focus on multi-media database, e-commerce, mobile agents, and multimedia software engineering. Currently, he is working at Panasonic, Taiwan.

**Ahmed Farouk Ghoneim** is currently an assistant professor in the Faculty of Economic and Political Science at Cairo University. He is the deputy director of the Center for Economic and Financial Research and Studies (CEFRS), Cairo University, and an advisor to the Minister of Industry on foreign trade issues and international agreements. He is a research associate at the Economic Research Forum for Arab Countries, Iran and Turkey (ERF). He works as a consultant to several international organizations including the World Bank and the World Intellectual Property Organization (WIPO). He holds a PhD in Economics and his special interest in research include mainly trade policy, regional trade integration, the multilateral trading system, the World Trade Organization, and the economics of IPR. He held different policy oriented positions, among which was an advisor on foreign trade issues to the Minister of Foreign Trade.

**Sherine Ghoneim** (BA, Economics, American University in Cairo, 1986; MSc, Management, Boston University, 1990; PhD, Information Management, “Developing a National EDI Strategy: Opportunities and Challenges,” The Management School, Imperial College of Science, Technology & Medicine, University of London, 2000) is a staff member and assistant professor with the Faculty of Computers and Information at Cairo University teaching Information
Systems Management and E-Commerce Foundation courses. Ghoneim’s research interests are focused on Information Systems management, e-commerce, e-government and health informatics. Ghoneim is published widely in acclaimed journals such as the *European Journal of Information Systems* and *Journal of Strategic Information Systems*. The publications are typically founded on both academic and professional relevance where the author reflects on her 20 years of professional experience in the field of information and knowledge management with leading international organizations such as General Electric Information Services - Egypt and UK, International Network Services - UK, Economic Research Forum-Egypt and Global Development Network - USA.

**Yi “Maggie” Guo** (BE, Information Engineering, Northern Jiaotong University, Beijing, China; MS, MIS, University of Nebraska at Omaha) is finishing her PhD in the Information and Operations Management Department at Texas A&M University – College Station, USA. Yi’s research interests include e-commerce, online shopping experience, flow theory, and agent-based systems in knowledge management. For more information contact: mguo@cgsb.tamu.edu.

**Hui-huang Hsu** is currently an associate professor of the Department of Computer Science at Chinese Culture University, Taipei, Taiwan, ROC. He received his PhD and MS in Electrical and Computer Engineering from the University of Florida, Gainesville, USA, in 1994 and 1991, respectively, and a BE in Electronic Engineering from Tamkang University, Taipei, Taiwan, ROC, in 1987. His research interests are in the areas of artificial intelligence, data mining, multimedia, e-commerce, and distance learning.

**Frederick Kaefer** is an assistant professor of Information Systems in the School of Business Administration of Loyola University, Chicago (USA). He has a PhD in MIS from the University of Iowa. His research interests include the planning and use of communication systems, neural networks and decision support systems. He has published in journals such as *Decision Support Systems, European Journal of Operational Research* and *Informs Journal on Computing*.

**Sherif Kamel** is an associate professor of management information systems, the Information Systems Unit head at the Department of Management and the director of the Institute of Management Development of the School of Business, Economics and Mass Communication at The American University in Cairo. Previously, he was the director of the Regional IT Institute (1992-2001) and the training manager at the Cabinet of Egypt Information and Decision Support Center (1988-1991). He designs and delivers executive development programs in information technology management and applications for public and private sector organization in many developing countries. In 1996, he was one of the co-
founding members of the Internet Society of Egypt. He has published many articles in IT transfer to developing countries, electronic commerce, human resources development, decision support applications and knowledge management. He serves on the editorial and review boards of a number of information systems and management journals and is the associate editor of the *Annals of Cases on Information Technology Applications and Management in Organizations*. He is currently a member of the executive council of the Information Resources Management Association (IRMA) and acts as its director of communications. He is a graduate of London School of Economics and Political Science (UK) and The American University in Cairo (Egypt).

**Feng Li** (BSc, MA, PhD) is chair of E-Business Development at the University of Newcastle upon Tyne Business School, UK. Previously he lectured at Strathclyde University Business School, UK. For 15 years he has been investigating the impacts of information and communications technologies on the strategies and business models of organizations. He is the author of two books and numerous journal articles, and he speaks regularly at international conferences and to business executives from both the private and public sectors. Professor Li is a member of several programmes on ICTs, e-commerce/e-business, supply chain/value chain, and virtual teams. He has worked closely with companies in the banking, telecommunications, manufacturing, retailing, and electronics as well as the public sectors. He is particularly interested in new rules of the networked economy and their implications for strategies, business models and organizational designs. Professor Li is the winner of the Blackwell Prize for E-Business and Technology Management at British Academy of Management 2002 (BAM2002), and his recent work on Internet banking and on the telecommunications industry has been extensively reported in the *Financial Times, Daily Telegraph, Guardian Weekly, Sky News*, and the BBC as well as many other news and professional online and offline media. Professor Li can be contacted at feng.li@ncl.ac.uk.

Jack T. Marchewka, PhD, is an associate professor and the Barsema professor of Management Information Systems in the Department of Operations Management and Information Systems (OMIS) at Northern Illinois University, USA. In addition, he is also the director of the Experiential Learning Center (ELC). His current research interests include IT project management, electronic commerce, and knowledge management. His articles have appeared in the *Information Resources Management Journal, Journal of Global Information Management, Information Technology and People, Journal Informatics Education Research, Communications of the International Information Management Association*, and the *Journal of International Technology and Information Management*.

Nekatarios Mettos earned a Master of Science in Financial Decision Making from the University of Portsmouth, and is currently working in Greece. He is developing his research interests in e-commerce applications.

Ashfaaq Moosa is a data analyst at Upromise, Inc., a firm that helps families save for college. He has worked on various customer-focused data integration and data mining projects for various industries including retail, real estate and financial. He graduated with a Master’s of Science in Information Technology and Management from the University of North Carolina at Greensboro. He may be reached at ashfaaq@yahoo.com.

Keith Mulbery is an associate professor in the Utah Valley State College (UVSC) Information Systems Department. He has worked at UVSC since 1994 and is currently pursuing a PhD in Business Information Systems at USU. His teaching interests include office software and spreadsheet applications, Visual Basic, and technology-related software.

Hamid R. Nemati is an assistant professor of Information Systems at the Information Systems and Operations Management Department of the University of North Carolina at Greensboro, USA. He holds a doctorate degree in Management Sciences and Information Technology from the University of Georgia and a Master’s of Business Administration from the University of Massachusetts. He has extensive professional IT experience as an analyst and has consulted with a number of major corporations. Before coming to UNCG, he was on the faculty of J. Mack Robinson College of Business Administration at Georgia State University. His research specialization is in the areas of organizational data mining, decision support systems, data warehousing, and knowledge management. He has presented nationally and internationally on a wide range of topics relating to his research interests. His research has been published in a number of top-tier scholarly journals.
David Paper is an associate professor in the Utah State University Business Information Systems Department, USA. His refereed publications appear in journals such as *Information and Management, Communications of the AIS, Journal of Information Technology Cases and Applications, Information Resources Management Journal, Journal of Managerial Issues, Business Process Management Journal, and Journal of Computer Information Systems*. His industry experience includes working and consulting with organizations such as the Space Dynamics Laboratory, Texas Instruments, DLS, Inc., the Utah Department of Transportation, and the Phoenix Small Business Administration. His teaching interests include database management, business process reengineering, worker empowerment, lean principles, and organizational change.

Paul A. Pavlou is a PhD candidate of Information Systems at the Marshall School of Business in the University of Southern California, USA. His research interests focus on IT-enabled collaborative interorganizational relationships, electronic commerce and online consumer behavior, the role of dynamic capabilities in interorganizational new product development teams, institutional trust in online auction marketplaces, and cross-national studies of e-commerce and e-government. Paul has several publications in refereed journals, books, and conference proceedings. His research has appeared (or is scheduled to appear) in *MIS Quarterly, International Journal of Electronic Commerce, Journal of Strategic Information Systems, Electronic Markets, Journal of Electronic Commerce Research, Journal of Logistics Information Management*, and in conference proceedings.

Eric Pedersen is an associate professor of Visual Technologies and Computer Information Systems at Dixie State College (DSC). He has worked at DSC since 1989. In addition to his faculty work, he has been the Principal Investigator in the DSC Center of Excellence for Computer Graphics since 1991. He has co-founded several e-businesses and is currently conducting research in e-commerce and completing his PhD in Business Information Systems at USU.

Victor Perotti is an assistant professor of Management Information Systems (MIS) in the College of Business of the Rochester Institute of Technology. He teaches MIS and e-business courses at both the graduate and undergraduate levels. Dr. Perotti has recently been honored for both his teaching and research. In March 2000, he was awarded the Richard and Virginia Eisenhart Provost’s Award for Excellence in Teaching. Before joining the College of Business, Victor was a research assistant at The Vision Lab at The Ohio State University. At Ohio State, he wrote several publications in the area of visual perception. Since that time, Victor has been doing research on a variety of MIS topics, centered on the theme of understanding business data through visualization.
**Charles G. Petersen**, PhD, is an associate professor of Operations Management at Northern Illinois University, USA. Dr. Petersen teaches both graduate and undergraduate supply chain management and previously served as the coordinator for the integrated undergraduate business core. He holds a BS in Industrial Engineering from Iowa State University, an MBA from Washington University, and a PhD in Operations Management from Indiana University. Dr. Petersen’s primary research interests are in the areas of supply chain management, order fulfillment, and electronic commerce. His scholarly work has been published in *Decision Sciences, Production and Operations Management, International Journal of Production Research, International Journal of Production Economics*, and *International Journal of Operations & Production Management*.

**Leyland Pitt** has been named to the chair of Electronic Marketing in the School of Marketing, Curtin University of Technology, Perth, Australia. He also holds positions as adjunct professor of Marketing in the Graduate School of Business, Ecole Nationale Ponts et Chaussées in Paris, the University of Vienna, Austria, and the University of Lulea, Sweden. He holds a BCom(Hons), MBA and PhD in Marketing from the University of Pretoria, and the MCom in Management from Rhodes University. Prior to joining Curtin he was professor of Marketing at Cardiff University, UK, and he has also held chairs in marketing at Henley Management College and Brunel University, UK, and the University of Cape Town, South Africa. In addition, he has taught Marketing and Electronic Commerce in MBA and executive programs at schools such as Warwick Business School, London Business School, the Graduate School of Business at Columbia University, and the Graham School of Continuing Studies at the University of Chicago. The Academy of Marketing Science has recognized him as one of the world’s Outstanding Marketing Teachers for 2002. Leyland Pitt’s particular areas of interest in research and teaching involve marketing and the new electronic media, the staging of consumer experiences, and marketing strategy. He is the author of more than 100 papers in scholarly journals, and his work has been accepted for publication in journals such as *California Management Review, Sloan Management Review, Information Systems Research, Journal of the Academy of Marketing Science, the Journal of Advertising Research, Communications of the ACM*, and *MIS Quarterly* (for which he also served as associate editor). He is also a winner of the award for the best paper in the *Journal of International Marketing* (2000).

**Pauline Ratnasingam** is an assistant professor of the Computer Information Systems Department at Central Missouri State University, Missouri (USA). Pauline Ratnasingam received her Bachelors in Computing (Information Systems) and Honors in Information Systems from Monash University, Melbourne, Australia. She received her PhD titled “Inter-organizational Trust in Business to Business Electronic Commerce” from Erasmus University, Rotterdam School of Management, The Netherlands. She lectured on topics such as: Project Management,
Management of Information Systems, and Electronic Commerce in Australia, New Zealand, Europe and America. She is an associate member of the Association of Information Systems, and is a member of the Information Resources Management Association and Academy of Management. Her research interests include business risk management, Internet-based business-to-business e-commerce, organizational behavior, inter-organizational relationships and trust. She is the recipient and principal investigator of a National Science Foundation Scholar Awards Grant for $60,000 (Grant Number: 01227550), research project title: “Inter-Organizational Trust in Business-to-Business Electronic Commerce.” She has published several articles related to this area in national and international conferences and refereed journals.

Martyn Roberts is a principal lecturer in Business Information Systems at the University of Portsmouth. He has worked in both the IS industry and academia and has taught in the UK and in the U.S. His research is based around the strategic use of IS in SMEs and in particular with companies that have experienced high growth rates. His work has been published in a number of journals and conferences. Recently Martyn has pioneered the introduction of eCommerce/eBusiness in the University and has a growing list of publications in the area.

Timothy Shih is a professor and chairman of the Department of Computer Science and Information Engineering at Tamkang University, Taiwan, R.O.C. He is a senior member of IEEE and a member of ACM. His research interests include multimedia computing and networking, distance learning, e-commerce, and content-based multimedia information retrieval. He was on the faculty of the Computer Engineering Department at Tamkang University in 1986. In 1993 and 1994, he was a part-time faculty member of the Computer Engineering Department at Santa Clara University. He was also a visiting professor at the University of Aizu, Japan, in 1999, and a visiting researcher at the Academia Sinica, Taiwan in 2001. Dr. Shih received his BS and MS in Computer Engineering from Tamkang University and California State University, Chico, in 1983 and 1985, respectively. He received his PhD in Computer Engineering from Santa Clara University in 1993. Dr. Shih has edited many books and published more than 270 papers and book chapters, as well as participated in many international academic activities, including the organization of many international conferences and special issues of international journals. He is the founder and co-editor-in-chief of the International Journal of Distance Education Technologies (Idea Group Publishing, Hershey, PA). Dr. Shih has received many research awards, including Tamkang University research awards, NSC research awards (National Science Council of Taiwan), and the IIAS research award of Germany. He also received many funded research grants from domestic and international agencies. Dr. Shih has been invited frequently to give keynote speeches, tutorials, panels, and talks at international conferences and overseas research organizations. Dr. Shih can be reached at tshih@cs.tku.edu.tw.
Patricia Sorce is co-director of the RIT Printing Industry Center and associate professor of Marketing, RIT College of Business, where she has served for 21 years. She teaches in the areas of marketing research, buyer behavior and database marketing. She earned a PhD in Cognitive and Experimental Psychology from the University of Massachusetts. Many of her scholarly publications build on a theme of understanding human decision making with a focus on consumer behavior. She has published in referred marketing, management and psychology journals. These publications have spanned a wide range of topics including basic research in psychology (retrieval processes in long-term memory), marketing segmentation analysis (lifestyles of older consumers), and most recently, Internet buying behavior. Before her appointment as co-director of the RIT Printing Industry Center, she served as associate dean of the College of Business from 1996 through 2001.

Rian van der Merwe is research assistant and a student for the Doctor of Philosophy Degree in Marketing at Curtin University of Technology, Australia. He received both his bachelor’s and Master of Science Degree in Industrial Engineering with High Distinction at the University of Stellenbosch, South Africa. His research interests focus on Internet marketing, electronic commerce and strategic alliances on the Internet.

Leo R. Vijayasarathy (Leo.Vijayasarathy@mail.biz.colostate.ed) is assistant professor of Computer Information Systems in the College of Business at Colorado State University, USA. He earned his doctorate in 1994 from Florida International University. His research, which examines the adoption, use, and consequences of systems that facilitate electronic commerce, has been published in Electronic Markets, European Journal of Information Systems, Information & Management, Internet Research, Journal of Management Information Systems, and Quarterly Journal of Electronic Commerce.

Stanley Widrick serves as department chairman of Management, Marketing and International Business in the College of Business at Rochester Institute of Technology. He is an expert in developing international business plans based soundly in the theories of marketing, international business and financial performance. He has also worked as a consultant for a wide variety of industries including: Eastman Kodak Company, General Motors, Bausch and Lomb, Rochester Telephone Company, and numerous other corporations and governmental agencies. His writings on marketing strategies, pricing decisions, and buyer behavior have been published in a variety of journals and conference proceedings including Business and Society, the Journal of Consumer Marketing, Advances in Consumer Research, the Journal of Retailing, the Journal of Consumer Affairs, the Journal of Product and Brand Management, and others.
Xianzhong Mark Xu received his PhD in MIS from the UK Open University Business School in 1998, and is currently a senior lecturer at the University of Portsmouth Business School. His research interests are in e-commerce strategy and implementation, executive information systems with a focus on strategic information scanning, information support and executives’ information behavior. He has published widely in international journals such as *Information Systems Management*, *Information & Management*, and *International Journal of Information Management*. He is a regular reviewer for the *Journal of Operational Research Society*.
