About the Contributors

**Humphry Hung** is a visiting fellow of the Department of Management and Marketing of the Hong Kong Polytechnic University. He has more than 20 years’ practical experience in training and development. His research interests include mobile marketing, creativity and innovation management, and entrepreneurship. Dr. Hung has published in several international refereed journals and conference proceedings.

**Y. H. Wong** is an associate professor of the Department of Management and Marketing of the Hong Kong Polytechnic University. His research interest is in the fields of ubiquitous marketing, relationship management and customer services. He has more than 12 years’ practical experience in Marketing. His publications include a book, *Guanxi: Relationship Marketing in a Chinese Context* and refereed journal articles.

---

**Jounghae Bang** is a doctoral candidate in the marketing area of the College of Business Administration at University of Rhode Island (URI), USA. Her research bridges the areas of marketing and MIS. Her research interests are customer relationship management, relationship marketing, online marketing, data mining and e-commerce. Luxury branding and service marketing are also included in her interests. She was involved in several IS projects as an IT consultant at Deloitte Consulting in Korea and as a researcher in Ewha Center for Informatization Strategy (ECIS) at Ewha Woman’s University in Korea. She holds a MA in management information systems and a BA in business administration from Ewha Womans University in Korea.

**Jørgen P. Bansler** is an associate professor in the Center for Information and Communication Technologies at the Technical University of Denmark. His research interests include computer-mediated
communication, computer-supported collaborative work, information systems design, and organizational implementation and use of IT. His current research focuses on the use of information and communication technology in health care. Jørgen Bansler holds a PhD in computer science from the University of Copenhagen, Denmark.

**Stuart J. Barnes** is chair and professor of management at the University of East Anglia, UK. Stuart has been teaching and researching in the information systems field for over a decade. His academic background includes a first class degree in economics from University College London and a PhD in business administration from Manchester Business School. He has published three books and more than seventy articles including those in journals such as *Communications of the ACM*, the *International Journal of Electronic Commerce*, the *e-Service Journal*, *Electronic Markets*, and the *Journal of Electronic Commerce Research*. Two more books are in progress for 2005.

**Chihab BenMoussa** is a senior researcher at the Institute for Advanced Management Systems Research (IAMSR). He received his MBA from Al Akhawyn University, Morocco and his PhD in information systems from Åbo Akademi University, Finland. Prior to joining IAMSR and its doctoral program, he was a senior consultant at PricewaterhouseCoopers. He combines research skills with real-world experience to identify growth and innovation opportunities where information and communication technologies could create a competitive edge for companies. His current research focuses on mobile business, knowledge management and information systems audit.

**Mike Burmester** is a professor at Florida State University since 2000. Earlier, he was at Royal Holloway, London University. He got his BSc from Athens University and PhD from Rome University. His research interests include privacy, anonymity, network security and watermarking and he has numerous publications in these areas. He is a member of the International Association for Cryptological Research and a fellow of the Institute of Mathematics and Applications.

**Federico Ceccarini** received the Laurea degree in mathematics and application at the “Federico II” University of Naples. He was with the R&D Centre for Information and Communications Technologies of Sema Group, and since 2007, he has been a research engineer in the Telecom VAS and Media Unit, of Engineering.IT. His research interests include mobile applications and services, human-computer interaction, and affective computing. At present he is involved in WiSe Research Project and was author of several papers.

**Toly Chen** received the BS degree, the MS degree, and the PhD degree at industrial engineering from National Tsing Hua University. He is now an associate professor in the Department of Industrial Engineering and Systems Management of Feng Chia University, an IEEE member, and an IIE senior member. He has publications in journals such as *Computers and Industrial Engineering*, *Fuzzy Sets and Systems*, *International Journal of Advanced Manufacturing Technology*, *European Journal of Operational Research*, *Journal of Intelligent Manufacturing*, *Neurocomputing*, *Intelligent Data Analysis*, *International Journal of Innovative Computing, Information and Control*, and *Applied Soft Computing*. He is also on the editorial boards of *Open Operational Research Journal*, and *Open Statistics and Probability Journal*. 
Inyoung Choi is a postdoctoral research fellow at the Imaging Science and Information Systems Research Center at Georgetown University. Her research interests include information strategy planning (ISP), strategic use of information technology (SUIT), and knowledge management. She has over 10 years of experience in an information technology strategy development, system implementation planning and evaluation including four years of experience as IT consultant at Ernst and Young Consulting. Dr. Choi received her PhD from Ewha Womans University in management information systems.

Giovanni Frattini received his Laurea degree in physics from University of Naples. He has worked for several companies with different roles. From 2000 his focus is on new solutions for telecommunication value added services (VAS). He has covered different roles: among the others delivery unit manager and enterprise architecture champion. Currently he is working as chief architect coordinating several research and operational projects. As researcher is main focus is currently on multimodal mobile services and SOA architectures for Telecommunication.

Ivano De Furio received the Laurea degree in electronic engineering at the “Federico II” University of Naples. He was with the R&D Centre for Information and Communications Technologies of Bull HN Information Systems, and since 2000, he has been a research engineer in the Telecom VAS and Media Unit, of Engineering. IT. His research interests include artificial intelligence, rule systems for business agents, semantic web service approaches and architectures. He has been involved in several research projects, such as HIVDS, SERVICEWARE and WISE and was author of several papers. In March 2007, Ivano De Furio received degree cum laude in computer science engineering.

Vishal Jain was a Master student of Dr. Jon Quah.

Timo Koivumäki is research professor of mobile business applications at VTT Technical Research Centre of Finland and at University of Oulu. His research interests include consumer behavior in e-commerce, m-commerce and ubi environments, user-driven open innovation, e-business, m-business, mobile marketing, digital economy, information goods and sports marketing. He is the associate director of OASIS research lab in the University of Oulu. Prof. Koivumäki has published e.g. in *Electronic Markets, NetNomics, International Journal of Mobile Communications, Behaviour and Information Technology*, and *International Journal of Information Technology and Management*.

Konstantinos Komaitis, PhD, is currently a lecturer at the University of Strathclyde in Glasgow, UK. His main areas of research are Internet governance and intellectual property. Dr. Komaitis is involved in a project on multistakeholder participation and in September 2009 he will be publishing his book on domain name regulation, investigating in particular the legal nature of domain names and their relationship with trademarks.

Kaisa Koskela is a doctoral student at the Marketing Department of the University of Oulu. Her main research interests lie in user involvement in new technology-intensive product and service development and especially in the lead user approach.

Yu-Cheng Lin received the PhD degree in industrial engineering from National Tsin Hua University. He is currently an assistant professor of the Department of Industrial Engineering and Management of the Overseas Chinese Institute of Technology.
About the Contributors

**Hanne Westh Nicolajsen** is an assistant professor in the Center for Information and Communication Technologies at the Technical University of Denmark. Her research interests include organizational implementation and use of IT, knowledge management, and computer-mediated communication. Her current research focus is on the use of information and communication technology for innovation in the service sector. Hanne Nicolajsen holds a PhD from the Technical University of Denmark.

**Teea Palo** is a doctoral student at the Marketing Department of the University of Oulu. Her main research interests lie in strategic nets and their business models especially in the field of new technology-based services, such as ubiquitous services.

**Jon T.S. Quah** is currently a faculty staff with the School of Electrical and Electronic Engineering, Nanyang Technological University. Dr. Quah lectures in both undergrad as well as graduate courses such as software development methodology, software quality assurance and project management, object-oriented system analysis and design, and software engineering. His research interests include financial market modeling using neural network, software reliability, and Internet related topics such as e-commerce and e-learning. Other than academic services, Dr. Quah has undertaken joint projects with major companies in banking and airline industries, as well as statutory boards of the government body. Prior to his academic pursuits, Dr. Quah was a director of a local company dealing with industrial chemicals.

**N. Raghavendra Rao** is a professor at SSN School of Management & Computer Applications, Chennai, India. Dr. Rao has a Master’s degree in commerce from Osmania University and a PhD in finance from the University of Poona. He has also three post graduate diplomas in the areas of financial management, portfolio management and tax laws from the University of Madras. He has a rare distinction of having experience in the combined areas of information technology and business applications. His rich experience in industry is matched with a parallel academic experience in management & IT in business schools. He has over two decades of experience in the development of application software related to manufacturing, service oriented organizations, financial institutions and business enterprises. He contributes chapters for books. He presents papers related to information technology and knowledge management at national and international conferences. he contributes articles on information technology to main stream news papers and journals. His area of research interest is mobile computing, space technology and knowledge management.

**Luigi Romano** received his Laurea degree in physics from University of Naples in 1996. In 1997 he attended the pre-doctoral school in communication systems at the Swiss Federal Institute of Technology Lausanne (EPFL). From 1997 on he was engaged in different roles for several telecommunication operators and in 2000 he started working in the system integration area of Sema Group. In the 2003 he was involved in a research project, in Atos Origin Italia, attempting to ground mobile value added services in innovative architectures. He followed other research projects related to multimodal systems and artificial intelligence and he is currently involved in a project aiming to explore the potential of semantic grid computing in e-government applications for Engineering.IT.

**Roberto Russo** was born in 1974, degree in computer science at Federico II University of Naples. Since 1999 he has been working for Engineering.IT (ex Atos Origin with different roles. Currently he
is team leader of several projects; his research interests include human-computer interaction, mobile application and architectures. He has been involved in several research projects such as SERVICEWARE and WISE and was author of several papers.

Eusebio Scornavacca is lecturer of electronic commerce at the School of Information Management, Victoria University of Wellington, New Zealand. Before moving to Wellington, Eusebio spent two years as a researcher at Yokohama National University, Japan. He has published and presented more than thirty articles in conferences and academic journals. Eusebio is on the editorial board of the *International Journal of Mobile Communications* and the *International Journal of Electronic Finance*. His current research interests mobile business, electronic business, e-surveys, and IS teaching methods.

Dong Hee Shin is an assistant professor of the computer and information sciences, Towson University, USA. Dr. Shin was previously an assistant professor at the College of Information Sciences and Technology, Penn State University (2004-2008). Dr. Shin earned his PhD and Master degrees in information sciences and technology from Syracuse University. Dr. Shin focuses on human-computer interaction and technology management in organization, market, and policy contexts. Dr. Shin was the vice chair of the 2006 International Conference on Telecommunication Systems. His project was funded by the Korea Communications Commission. Dr. Shin has published 32 articles in international journals and presented at 30 conferences. Dr. Shin was nominated for an Information Management and Technology Interdisciplinary Fellowship at the Syracuse University in 2005 and received an Outstanding Researcher Award at the Penn State University in 2007.

Jaana Tähtinen is professor of marketing at the University of Oulu, Finland. Her main research interests include dissolution and dynamics of business relationships, mobile advertising, and value creation in business networks. She has published e.g. in the *European Journal of Marketing, Industrial Marketing Management, International Journal of Service Industry Management, and Marketing Theory*. She has also co-edited a special issue on relationship dissolution in *Journal of Marketing Management* and is one of the founders of biannual Nordic Workshop on Relationship Dynamics (from 2000).

Anna Trifonova has graduated at New Bulgarian University (Sofia, Bulgaria) in 1999. Her specialty was information systems and technologies - applications in business and office. She finished her PhD at the International Graduate School of Information and Communication Technologies at the University of Trento, Italy in March 2006. Her research topic was “Mobile Learning: Wireless and Mobile Technologies in Education”. Her scientific interests and publications to that time are mainly in the mobile learning domain, and starting from year 2003 she has more than 15 articles in international peer-reviewed conferences and workshops on this topic.

Horng-Ren Tsai received the PhD degree at electrical engineering from National Taiwan University of Science and Technology. He is currently an associate professor of the Department of Information Technology at Lingtung University.

Yi-Chi Wang received the PhD degree in industrial engineering from Mississippi State University. He is currently an assistant professor of the Department of Industrial Engineering and Systems Management of Feng Chia University.
Alexander Y. Yap is an associate professor of information systems at Elon University, North Carolina. He holds a PhD degree in information systems from Copenhagen Business School (Denmark), an MBA in international management from Exeter University (UK), and a Master’s in development economics from Williams College (USA). He won the prestigious ‘ICIS Best Paper Award’ in Helsinki, Finland. His research papers have been published in the *Journal of Global Information Management*, the *Journal of E-Commerce Research*, *Journal of Electronic Markets*, and the *Journal of Enterprise Information Systems*, among others. He has also published in prestigious IS conferences, which include the ICIS, ECIS, and ACM.

Zhijun Zhang received his bachelor’s degree in computer science from Peking University, Beijing, China, in 1990. He developed computer software for three years before starting his graduate study at the University of Maryland, where he conducted research in software engineering and human-computer interaction. He received his PhD degree in computer science from the University of Maryland in 1999. Besides teaching at University of Phoenix, Dr. Zhang was a technology researcher at a large financial service company, focusing on emerging mobile technologies and their impact on human-computer interaction. He is now an enterprise architect for the same company, working on service-oriented architecture and other strategic architecture initiatives.
