**Tas Adam** has recently retired from the position of Senior Lecturer in the School of Management and Information Systems at Victoria University, Melbourne. His PhD is titled “Determining an e-learning Model for Students with Learning Disabilities: An Analysis of Web-Based Technologies and Curriculum,” and he has worked extensively in this area.

**Arthur Adamopoulos** is a Lecturer at RMIT University, Melbourne, Australia in the school of Business Information Technology and Logistics. He is currently researching technology adoption and usage, with a specific focus on online investing.

**Noel Carroll** completed his PhD with the Department of Computer Science and Information Systems at the University of Limerick, Ireland. His research focuses on Service Science initiatives and examines methods to investigate the value of IT on service networks.

**Bill Davey** is a Senior Lecturer in Business Information Technology at RMIT University, Melbourne, Australia. He holds degrees in Science, Education, Computing and a Master of Business. His research interests include methodologies for systems analysis and development, Visual Basic programming, information systems curriculum, and information technology in educational management.

**Martin Dick** is a Senior Lecturer at RMIT University, Melbourne, Australia in the school of Business Information Technology and Logistics.
José Figueiredo has a PhD in Industrial Engineering and Management with a thesis “Sociotechnical Approaches to Inter-Institutional Information Systems Design,” MBA in Information Management, Engineer Degree in Electronics and Digital Systems. He is a Professor at the Engineering and Management Department (DEG) of IST, Technical University of Lisbon, currently teaching Project and Knowledge Management.

Steve Goldberg founded INET International Inc. in 1998. As INET’s President, he leads the firm in data collection for international research studies, wireless healthcare programs, and INET mini-conferences. He is on the Editorial Board of the International Journal of Networking and Virtual Organizations and has many peer-reviewed papers.

Fernando Abreu Gonçalves has a PhD in Industrial Engineering and Management with a thesis on “Actor-Network Theory in Management and Engineering Design,” MBA in Information Management, Engineer Degree in Chemical Engineer. He is Emeritus Professor from ISCAL Accounting and Administration Institute, Polytechnic Institute of Lisbon.

Tiko Iyamu holds a PhD in Information Systems and is currently Professor of Informatics and Chair of Health Informatics at the Namibia University of Science and Technology, Windhoek, Namibia. Prior to his fulltime appointment in academic in 2009, Tiko held several positions in both Public and Private Institutions in South Africa.

Ezatollah Karami is Professor of Agricultural Development and Extension at College of Agriculture, Shiraz University, Iran. He has conducted research and published widely on issues of agricultural extension and sustainable agriculture.

Davar Khalili is Associate Professor in the Department of Water Engineering, College of Agriculture, Shiraz University. His research interests include system engineering, hydrologic systems, developing efficient and realistic operating policies for multi-purpose reservoir systems, decision methodology for the resource utilization of rangeland watersheds, and stochastic dynamic games in solving river basin disputes.

Jayan Kurian is a lecturer at RMIT University, Vietnam.

Awie Leonard joined the University of Pretoria in 1992 as senior lecturer after spending several years in the private sector as programmer/systems analyst, project manager, systems development, and maintenance manager. Apart from lecturing a variety of Information Technology subjects, his research focus is in the broad field of IT Service Management.
Imran Muhammad is a PhD student at RMIT University, Australia. His primary research interests are in the area of business information systems especially in the area of healthcare information systems management and electronic health records.

Rennie Naidoo is a Senior Lecturer in Information Systems at the University of the Pretoria. His research interest is in applying a practice lens using social theories such as actor-network theory and structuration to better understand general IS management, IS design, IS implementation, IS decision-making, and IS Human Resources challenges.

Andrea Quinlan is a PhD Candidate at York University, Canada. Her research examines interconnections between law, science, technology, and sexual violence. Her PhD draws on Actor-Network Theory and feminist theory to examine the Sexual Assault Evidence Kit, a tool used to collect forensic evidence in legal cases of sexual assault.

Petronnell Sehlola is an IT practitioner who started her career as a software developer and currently provides consulting services to Government Administration in South Africa. Her focus includes IT Projects, Business Analysis, and Risk Management. She is a Business Information System postgraduate student at Tshwane University of Technology, South Africa.

Juergen Seitz received his PhD from Viadrina European University, Frankfurt (Oder), Germany. He is Professor for Business Information Systems and Finance, and Chair of the Business Information Systems Department at Baden-Wuerttemberg Cooperative State University Heidenheim, Germany. Dr. Seitz is also editor, associate editor, and editorial board member of several international journals.

Tefo Sekgweleo is from the Department of Informatics, Tshwane University of Technology, Pretoria, South Africa.

Maryam Sharifzadeh is an Assistant Professor in the Rural Management Department, Yassouj University. Her research interests and experience have been concentrated on human and non-human actors of agricultural climate networks, network analysis tools, and information systems, especially in agricultural development processes in Iran.

Mohini Singh is Professor of Information Systems at RMIT University in Australia. She has published well over 100 scholarly papers in the areas of e-business, e-government, and new technology and innovation management. Her current research focus is on social media and Websites.
About the Contributors

Nilmini Wickramasinghe received her PhD from Case Western Reserve University, USA and currently is the Epworth Chair in Health Information Management and a Professor at RMIT University, Australia. She researches within the IS domain with a special focus on IS/IT solutions to effect superior, patient-centric healthcare delivery.

Gholam H. Zamani is a Professor in the Agricultural Extension and Education Department at the Shiraz University. His research emphasizes the importance of educating human resource in development process.

Manuel Zwicker is a PhD student at RMIT University, Australia. His research is in business information systems, especially in e-health. He received his MBA from ESB Business School, Reutlingen, Germany and his diploma degree from University of Cooperative Education Heidenheim, Germany (nowadays Baden-Wuerttemberg Cooperative State University Heidenheim, Germany).
