About the Authors

Noushin Ashrafi is a professor of information systems and chair of the executive committee of the Faculty Council at the University of Massachusetts Boston. Dr. Ashrafi received her PhD from the University of Texas at Arlington. Her area of research includes software process improvement, application of mathematical models to assess fault tolerance in software, and privacy issues in electronic commerce. Her publications have appeared in journals such as *IEEE Transactions, Information and Management, Journal of Electronic Commerce in Organizations*, and *Journal of Database Management*. Dr. Ashrafi has made presentations on various topics of information systems at national and international conferences.

David Barnes is a senior lecturer in operations and strategic management at Royal Holloway University of London. His research interests centre on the strategic management of operations and the impact of e-business on operations. Prior to his academic career he worked in the process plant contracting and building products manufacturing industries, in engineering and line management positions for a number of organizations ranging from blue chip to small family owned businesses. He holds a BSc (English) from Imperial College London, an MBA from the Open University and a PhD from Staffordshire University.

Raquel Benbunan-Fich is an associate professor in the Computer Information Systems Department at the Zicklin School of Business, Baruch College, CUNY. She received her PhD in MIS from Rutgers University (1997). Her research interests include issues on e-commerce, evaluation of Web-based systems, group collabora-
Ong Chin Eang is a lecturer at Monash University, Malaysia, with a specialty in e-commerce. He has a bachelor’s degree in logistics and transportation management, a postgraduate diploma in business systems and a master’s degree in business information technology from RMIT (Royal Melbourne Institute of Technology) University, Melbourne, Australia. He obtained his postgraduate certificate in higher education and is currently conducting doctoral research on trust and redress mechanism in B2C e-commerce context with Monash University. His doctoral research examines methods that enables the used of these redress mechanisms to its jurisdictions in cross border disputes without compromising the benefits and trust between businesses and consumers.

Nikhilesh Dholakia is professor in the Marketing, E-Commerce, and International Business areas at the College of Business Administration, University of Rhode Island, USA. He has published extensively in various international journals in the fields of marketing and technology, telecommunications, e-commerce, and m-commerce. His latest edited book is M-Commerce: Global Experiences and Perspectives (Idea Group Publishing, 2006).

Henry H. Emurian is an associate professor of IS at UMBC. He is a licensed psychologist in Maryland, and he is interested in exploring the applications of information technology to education, health, and public service. He has published in The Journal of the Experimental Analysis of Behavior, Journal of E-Commerce in Organizations, Computers in Human Behavior, International Journal of Distance Education Technology, and The International Journal of Information Technology and Communication Education. His editorials have appeared in the Information Resources Management Journal. He is a member of the American Psychological Association, IRMA, and the Association for Behavior Analysis.

Eliezer M. Fich is in the Department of Finance at the LeBow College of Business, Drexel University. He received his PhD (Hons.) from the NYU Stern School of Business in 2000. His research interests include corporate governance, merger and acquisitions and electronic commerce. His research has been published in the Journal of Finance, Journal of Business, Journal of Corporate Finance, Journal of
Electronic Commerce in Organizations, International Journal of Electronic Commerce and other journals.

**Jing Gao** is currently working as a full-time research fellow/lecturer for the school of computer and information science at the University of South Australia. He has also been working as a professional trainer/consultant for many Australian leading organizations including the Defence Science and Technology Organisation (DSTO) of Australia, SA water, etc. His research interest is about how to obtain an alternative view to appreciate complex social and technical problems.

**David Gefen** is an associate professor of MIS at Drexel, where he teaches strategic management of IT, database analysis and design, and VB.NET. He received his PhD from GSU and a master’s degree from Tel-Aviv. His research focuses on psychological and rational processes in IT implementation which stem from 12 years developing and managing large IT projects. His research findings are published in *MISQ, ISR, IEEE TEM, JMIS*, among others. David is SE at DATABASE and a VB.NET textbook author.

**Matthew Hinton** is a senior lecturer in information and knowledge management at the Open University Business School. His research interests include the impact of electronic commerce on operations and information technology evaluation, especially the performance management of e-business applications. In addition he is interested in the system implementation dynamics of customer relationship management (CRM) systems. He holds a PhD in innovation and technology assessment from Cranfield University and a BSc (Hons.) in business information technology from Kingston University. Prior to his academic role he worked in the petrochemicals industry providing computer support and IT training.

**Soongoo Hong** is an assistant professor at the Department of Management Information Systems at Dong-A University, Korea. He received his PhD in MIS in 2000 and a Mater of Arts in management in 1996 from the University of Nebraska–Lincoln. Prior to joining Dong-A University he was an assistant professor at Texas A&M International University. His research interests include electronic commerce, knowledge management, data warehousing, and IT impacts on organizations.

**Tino Jahnke** received his diploma in business information systems from the University of Cooperative Heidenheim, Germany, and his bachelor’s degree from Open University, London (2001). He received his master’s degree in advanced software technology from University Lueneburg, Germany and the University of Wolverhampton, UK (2005). Apart from his teaching experience in universities and
different companies, Jahnke has been appointed to examine students in their diploma exams. Since 2001 he has been done research in digital watermarking technology, motion pictures and audio signals. Furthermore he has developed the knowledgebay e-learning framework and manages his own software company. Since 2005, he has been CEO of two companies specialized on the development of tools and products for the tourism industry in Germany, Poland and The Netherlands.

Salim Jiwa is a senior lecturer in international fashion marketing at the Department of Clothing Design and Technology, Manchester Metropolitan University. He is also project manager at the Retail Enterprise Network and quality and learning manager for the Retail Academy. Jiwa has an ongoing interest in the design development of management simulation games and virtual world contexts, and has previously presented and published papers on various aspects of simulation gaming design, student experience and pedagogy.

Pairin Katerattanakul is an assistant professor in the Department of Business Information Systems, Western Michigan University. He received his PhD in MIS in 2000 and Master of Arts in marketing in 1996 from the University of Nebraska–Lincoln. His research, focused on electronic business, marketing aspects of electronic commerce, enterprise systems, and management information systems, has been published in such journals as Communications of the ACM, European Journal of Information Systems, Communications of the AIS, and INFOR.

Wing Lam is an associate professor at U21Global and MISM program director. He was previously at the National University of Singapore where he was a faculty member at the Institute of Systems Science. In addition to holding other academic positions in the UK, Dr. Lam has held consultancy positions with Logica-CMG, Fujitsu (formerly ICL) and Accenture (formerly Andersen Consulting). He has over 75 publications in peer-reviewed journals and conference proceedings. His work appears in the European Journal of Information Systems, Journal of Knowl-
edge Management and Communications of the Association of Information Systems, among others. Dr. Lam’s current research interests include enterprise integration, knowledge management and software engineering management. Dr. Lam currently serves on the editorial review boards of the Journal of E-Government and Online Information Review. He has a PhD in computer science from Kings College, University of London.

Dawn Lavelle is a principle lecturer in retail management at the University of the Arts, London. She is also manager of the Centre of Vocational Excellence (COVE) in retailing. Lavelle has an ongoing interest in the design development of management simulation games and virtual world contexts, and has previously presented and published papers on various aspects of simulation gaming design, student experience and pedagogy.

In Lee is an associate professor in the Department of Information Management and Decision Sciences in the College of Business and Technology at Western Illinois University, USA. He received his MBA from the University of Texas at Austin and Ph.D. from University of Illinois at Urbana-Champaign. He is a founding editor-in-chief of the International Journal of E-Business Research, the primary objective of which is to provide an international forum for researchers and practitioners to advance the knowledge and practice of all facets of electronic business. He has been serving on the Executive Council of the Information Resources Management Association since 2003. He has published his research in such journals as Communications of the ACM, IEEE Transactions on Systems, Man, and Cybernetics, IEEE Transactions on Engineering Management, Computers and Operations Research, Computers and Industrial Engineering, Business Process Management Journal, Journal of E-Commerce in Organizations, and International Journal of Simulation and Process Modeling. His current research interests include e-commerce technology development and management, agent-oriented enterprise modeling, and intelligent simulation systems.

Sang M. Lee is the university eminent scholar, Regents distinguished university professor, and chair of the Management Department at the University of Nebraska—Lincoln. He has authored or co-authored 55 books, more than 200 journal articles, and has presented over 2,000 speeches. His current research interests include value networked organizations, interorganizational information systems, and new enterprise models. He is a fellow of the Academy of Management, Decision Sciences Institute, and Pan-Pacific Business Association. He has organized 27 international conferences as the program chair, is on the editorial board of 23 journals, and has received numerous honors including three honorary degrees.
Qi Li has a PhD in economics, is a professor of electronic commerce, and published *China Electronic Commerce* which was the first e-commerce book in China in 1997. Until now, more than 50 papers and over 10 books have been published, 20 projects accomplished, and one patent certified. There are 13 doctoral students and 22 postgraduates under his instruction. He is also the director or dean of the following organizations: vice-president of School of Economics and Finance, Xi’an Jiaotong University; E-Commerce Research Institute of Xi’an Jiaotong Uni (the first e-commerce research center in China); E-Commerce Commission of Chinese Information and Economics Association; The Coordination Group for the Establishment and Development of Electronic Business Specialty of China’s Higher Education Institutes.

Zhangxi Lin, PhD, is an assistant professor with the Department of ISQS, Texas Tech University. Lin’s research interests include online reputation, electronic commerce, IT strategy for China, and information economics. Lin acted as the member of Advisory Board for Digital Fujian since 2002, was a guest professor of Fujian Institute of Technology, has been affiliated as a senior researcher of the Network Research Center for CERNET since 1998, has been affiliated as an associate professor of the Computation Center of Tongji University since 1995 and has published a large number of papers in international journals and conference proceedings.

Anil M. Pandya is an associate professor of marketing in the College of Business and Management, Northeastern Illinois University in Chicago, USA, and an adjunct professor of marketing in the College of Industrial Engineering and Management Science, Northwestern University in Evanston, Illinois. His scholarly research has appeared in the *Journal of Electronic Commerce and Organizations*, *European Journal of Marketing*, *Journal of Finance and Strategy*, *Research in Marketing*, and *Journal of Macromarketing*.

Paul A. Pavlou is an assistant professor of IS at the University of California at Riverside. He received his PhD from the University of Southern California in 2004. His research focuses on information systems strategy in turbulent environments and institutional trust building in electronic commerce and online marketplaces. His research has appeared in *MIS Quarterly*, *Information Systems Research*, *Journal of the Academy of Marketing Science*, *Journal of the Association of Information Systems*, *International Journal of Electronic Commerce*, and *Journal of Strategic Information Systems*, among others. His research has been cited over 400 times in Google Scholar and over 150 times in the Institute of Scientific Information (ISI). Pavlou received the 2003 *MIS Quarterly* ‘Reviewer of the Year’ award, and the ‘Best Reviewer’ award of the 2005 Academy of Management Conference (OCIS Divi-

**Pauline Ratnasingam** is an associate professor of MIS, Department of Computer Information Systems, Harmon School of Business Administration, Central Missouri State University (CMSU). Before joining CMSU, she was an assistant professor at the School of Business Administration, University of Vermont. She received her PhD titled “Inter-organizational Trust in Business to Business Electronic Commerce” from Erasmus University, Rotterdam School of Management, The Netherlands (2001). She lectured on topics such as project management, MIS, and e-Commerce in Australia, New Zealand, Europe and America. She is an associate member of the Association of Information Systems, and is a member of the Information Resources Management Association and Academy of Management. Her research interests include business risk management, Internet-based B2B e-Commerce, small business e-commerce adoption, security in knowledge management, and organizational behavior and trust. She is a recipient of a National Science Foundation Grant and has published several articles related to this area in national and international conferences, refereed journals and chapters in books. Her biography is also published in the 58th Edition of Marquis Who’s Who – Who’s Who in America.

**Juergen Seitz** received his diploma in business information systems from the University of Cooperative Education Stuttgart, Germany, and in economics from the University of Stuttgart-Hohenheim. He received his PhD from Viadrina European University, Frankfurt (Oder), Germany. He is a professor for business information systems and finance, and chair of business information systems, especially e-commerce/e-business and m-business/telematics, at the University of Cooperative Education Heidenheim, Germany.

**Ye Diana Wang** is a doctoral student of IS at the University of Maryland, Baltimore County (UMBC). In addition to research in online trust, her research interests include electronic commerce, information retrieval, and decision support. She has published in various journals including *Information Processing & Management, Computers in Human Behavior, Journal of Electronic Commerce in Organization*, and *International Journal of Healthcare Technology and Management*. She is a member of the American Society for Information Science and Technology, the Association for Information System, and the Information Resources Management Association.

**Xianfeng Zhang** is a PhD student in the School of Economics and Finances, Xi’an Jiaotong University. Zhang’s research interests focus on trust building mechanism in the Internet environment, electronic commerce theories, and e-commerce educa-
tion. In addition to those published in China, Zhang’s papers have also been issued in such international conference proceedings as ICEC 2000, PACIS 2001, IRMA 2002, ECIS 2003 and so on.
