Pedro Antunes is associate professor at the University of Lisboa. His research interests address the design, development and assessment of collaborative technologies, focusing in particular on complex socio-technical interactions such as electronic meetings and group decision and negotiation. He has published more than 70 papers on these topics and participated in more than 40 conference program committees. He is Steering Committee Member of CRIWG - International Workshop on Groupware. Since 2000, he has also been project evaluator and reviewer for the European Commission in several thematic areas.

Gert-Jan de Vreede is Kayser distinguished professor at the Department of Information Systems & Quantitative Analysis at the University of Nebraska at Omaha, where he is director of the Institute for Collaboration Science. His research focuses on collaboration engineering, the theoretical foundations of (e)-collaboration, and the transfer of collaborative technology and work practices. His articles have appeared in journals such as Journal of Management Information Systems, Communications of the ACM, Communications of the AIS, Small Group Research, DataBase, Group Decision and Negotiation, Journal of Creativity and Innovation Management, International Journal of Technology and Management, Journal of Informatics Education and Research, Simulation & Gaming, and Simulation.

Fredrik Elgh is assistant professor in Product Development at the department of Mechanical Engineering at the School of Engineering, Jönköping University. He holds a MSc in mechanical engineering from Jönköping University, Sweden and PhD in product and process development from Chalmers.
University of Technology. His research interests include design methodology, computer supported engineering design, cost engineering, and design for producibility. Prior to the academic career he worked in the furniture industry as a production engineer.

Lior Fink is a faculty member in the Department of Industrial Engineering and Management, Ben-Gurion University of the Negev. He holds a bachelor’s degree in psychology and economics, a master’s degree in social-industrial psychology – both from Bar-Ilan University – and a PhD in information systems from Tel Aviv University. Prior to his doctoral studies, Lior gained substantial industry experience working as an organizational development consultant. In his last position, he headed the organizational development unit in one of Israel’s largest IT organizations. After receiving the Fulbright Post-Doctoral Scholar Award in 2006, he spent one year at the UCLA Anderson School of Management. Lior’s articles have been published or accepted for publication in a number of journals including the Data Base for Advances in Information Systems, International Journal of e-Collaboration, Journal of the Association for Information Systems, and Journal of Information Technology. His current research interests focus on the strategic value of IT infrastructure, enterprise-wide systems, and collaborative technologies and on strategic aspects of IT markets.

David Gefen (gefend@drexel.edu) is associate professor of MIS at Drexel University, Philadelphia USA, where he teaches Strategic Management of IT, Database Analysis and Design, and VB.NET. He received his PhD in CIS from Georgia State University and a Master of Sciences in MIS from Tel-Aviv University. His research focuses on trust and culture as they apply to the psychological and rational processes involved in ERP, CMC, and e-commerce implementation management, and to outsourcing. David’s wide interests in IT adoption stem from his 12 years of experience in developing and managing large information systems. His research findings have been published in MISQ, ISR, IEEE TEM, JMIS, JSIS, The DATA BASE for Advances in Information Systems, Omega: the International Journal of Management Science, JAIS, CAIS, and elsewhere. David is an author of a textbook on VB.NET programming. David is on the editorial boards of MISQ, DATABASE and IJeC.

Nitza Geri is head of Undergraduate Management Studies at the Department of Management and Economics at The Open University of Israel and a member of the Chais Research Center for the Integration of Technology in Education. She holds a BA in accounting and economics, an MSc in management sciences and a PhD in technology and information systems management from Tel-Aviv University. She is a CPA (Israel) and prior to her academic career she had over 12 years of business experience. Her research interests and publications focus on various aspects of the value of information, and information systems adoption and implementation, which include: strategic information systems, e-business, value creation and the Theory of Constraints, managerial aspects of e-learning systems adoption and use. Personal site: http://www.openu.ac.il/Personal_sites/nitza-geri.html

Julia E. Hoch works as research and teaching assistant at the Department of Work-, Organizational- and Social Psychology at the University of Technology, Dresden, Germany. She studied psychology at the University of Kiel and University of Wuerzburg, Germany, and holds a doctor in psychology from the University of Kiel, Germany. She worked as research and teaching assistant at the University of Kiel and the University of Technology, Munich, Germany. Her research interests include leadership in virtual teams, shared leadership and work motivation in teams.
Heikki Karjaluoto (heikki.karjaluoto@econ.jyu.fi) is research professor of Marketing at the University of Jyväskylä, Finland. He received his DSc in marketing from University of Jyväskylä, Finland in 2002. His research interests concern electronic business in general and mobile business in particular. He has published extensively on electronic business in marketing and information system journals, and has collaborated with several researchers in Finland and abroad and with Finnish high-tech companies in research projects.

Elias T. Kirche is associate professor of Computer Information Systems and Decision Sciences at the Lutgert College of Business, Florida Gulf Coast University. He received a PhD in operations management from University of Houston (2002). Dr. Kirche is a member of the Decision Science Institute and the Production and Operations Management Society. His professional work experience includes project management and quality control systems. He is recipient of Aspen Technology scholarship to develop Advanced Planning and Scheduling (APS) case studies. Dr. Kirche research interests are: activity-based costing, supply chain optimization models, empirical research and theory testing.

Udo Konradt is a full professor and chair of the Department of Work and Organizational Psychology at the University of Kiel, Germany. He holds a doctor in psychology from the University of Bochum, Germany. He has authored several books on electronic human resource management, and published in scholarly journals including *International Journal of Human-Computer Interaction, Behavior and Information Technology, European Journal of Work and Organizational Psychology, Journal of Applied Social Psychology*, and *Small Group Research*. His research interests include collaboration in distributed (virtual) teams, electronic human resource management, and dispersed leadership.

Magnus Löfstrand (PhD) is a researcher at the Division of Computer Aided Design at Luleå University of Technology in Sweden. He holds an MSc in mechanical engineering from Luleå University of Technology. His research interests include product development and in particular functional product development in a business-to-business, extended enterprise setting. The focus is on supporting product development processes with tools and methods in order to enable faster development of new and innovative solutions to industrial needs and opportunities. Application areas are mainly in the aerospace and automotive industry.

Patricia Mcmanus (p.mcmanus@ecu.edu.au) is a PhD student in the School of Management Information Systems. Her PhD is investigating the decisions related to the adoption of m-services. She is currently lecturing in business information systems and marketing at the University of Western Sydney.

Narasimha Paravastu is an assistant professor of MIS at the Metropolitan State University, Minneapolis, MN. He received his PhD from Drexel University, Philadelphia PA.

Walter Rodriguez is director of research and professor of Information Systems at the Lutgert College of Business, Florida Gulf Coast University. He received his PhD in engineering project management from University of Florida in 1982. Dr. Rodriguez was holder of the Alico Chair in Operations and chair of the Information Systems and Decision Sciences Department at FGCU. He founded and chaired the Engineering Computer Graphics Program at Georgia Tech (1985-1993) and was awarded the Harvard Foundation Medal (1994) and a postdoctoral fellowship (Information Technology) at the Massachusetts Institute of Technology.
Institute of Technology (1996), while holder of the Louis Berger Endowed Chair at Tufts University. During the last 25 years, he has obtained continuous National Science Foundation, NASA and private industry sponsored grants in the systems development, collaborative decision-support, distributed learning technologies, and multi-project management areas. Dr. Rodriguez has published over 120 refereed articles in prestigious business and engineering journals and proceedings.

Craig Standing (c.standing@ecu.edu.au) is professor of Strategic Information Management in the School of Management at Edith Cowan University, Australia. His current research interests are in the areas of electronic markets, IS evaluation and mobile commerce. He has published in the European Journal of Information Systems, IEEE Transaction on Engineering Management, Information & Management and European Journal of Operational Research.

Susan Standing (s.standing@ecu.edu.au) is a research assistant in the Web Centre, School of Management, Edith Cowan University, Western Australia. She holds a degree in accounting and information management and has worked on a number of funded research projects. Her research interests include accounting information systems and electronic marketplaces.

Staffan Sunnerrsjö is professor of Machine Design in the department of Mechanical Engineering at the School of Engineering, Jönköping University. He holds a MSc and a PhD in mechanical engineering from Aston University, Birmingham UK, 1976. He has published three books and more than 40 papers in scientific journals, conference proceedings and other technical publications. Earlier works are oriented towards structural dynamics and stress analysis, while later works deal with design methodology and computer support. Prior to the academic career he worked in the power generation industry and the shipbuilding industry and subsequently became manager for the Engineering Design division at the Swedish Institute for Production Engineering Research.

Vladimir Tarasov is assistant professor at the Centre for Evolving IT in Networked Organisations (CENIT), Jönköping University. He received PhD in computer science from Petrozavodsk State University, Russia, in 1996. He took a PhD course in St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences, Russia, in 1991-1993. He received MSc in mathematics from Petrozavodsk State University in 1990. He works in a number of research projects in the fields of information logistics, ontological engineering, and collaborative engineering. He also manages the master's programme in information engineering and teaches in the areas of: software engineering, development of distributed applications, and information logistic. He has published 28 scientific papers.

Janusz Zalewski is professor of Computer Science and Engineering at Florida Gulf Coast University. He holds a PhD in computer science from Warsaw University of Technology (1979). Previously, he held academic positions at Embry-Riddle Aeronautical University and University of Central Florida. Dr. Zalewski worked on projects for Superconducting Super Collider, Lawrence Livermore National Laboratory, NASA, FAA and Nuclear Regulatory Commission, as well as for a number of private companies, including Lockheed Martin, Harris, Boeing and others. His research interests are: software engineering, real-time systems, computer networks and distributed systems.
Halbana Tarmizi is a PhD candidate in the College of Information Science and Technology at the University of Nebraska at Omaha. He holds a Master’s degree in Telecommunications from Michigan State University and a Dipl.-Ing. in electrical engineering from Aachen University of Technology (Germany). His research interests include collaboration technology, online communities, and virtual teams. He is currently working on participation issues in communities of practice. He has published and presented his work in the *International Journal of e-Collaboration, e-Service Journal* as well as conferences such as the AMCIS, HICSS and MWAIS.

Ilze Zigurs is professor and Department Chair of Information Systems and Quantitative Analysis in the College of Information Science and Technology at the University of Nebraska at Omaha. She holds the Mutual of Omaha distinguished chair of Information Science and Technology, and also served as the founding director of the doctoral program in Information Technology. In 2007, she was named a fellow of the Association for Information Systems. Dr. Zigurs’ research examines design, implementation, and use of collaboration technologies, particularly in virtual teams and projects. She has co-published with Deepak Khazanchi a book on patterns of effectiveness in virtual projects. Professor Zigurs was formerly a senior editor for the *MIS Quarterly* and Department Editor for the *IEEE Transactions on Engineering Management*.
