**Kehinde David Adejuwon** holds Master of Science (MSc) in Political Science from University of Lagos, Nigeria, Bachelor of Science degree (BSc) and Diploma in Public Administration, respectively, from Lagos State University, Lagos, Nigeria. He is currently a Doctoral student of Public Administration at Lagos State University, Lagos, Nigeria. He has published widely in local and international journals.

**Brendan E. Asogwa** is a Principal Librarian at the Nnamdi Azikiwe Library University of Nigeria Nsukka. He holds a Diploma in Public Administration/Local Government, a BSc Degree in Education and Political Science, and Master’s Degree in Library and Information Science of the university. He is a Chartered Librarian of Nigeria (CLN) and a member Nigeria Library Association (NLA). Mr. Asogwa has attended and presented papers at conferences and has also published in many reputable local and international journals. Presently, Asogwa is a doctoral student of Library and Information Science at the University of Nigeria, Nsukka. His research interest includes library administration, e-government, e-records/archives management. He is married with children.

**Fredrick Awuor** is currently pursuing a PhD in Business Information Systems at Jaramogi Oginga Odinga University of Science and Technology in Kenya. He holds an MTech degree in Electrical Engineering (Telecommunication Engineering) from Tshwane University of Technology, S. Africa, an MSc in Electrical and Electronic Systems from ESIEE, France and a BSc in Computer Science from Moi University in Kenya. At present, he is lecturer in the Department of Computing Sciences, Kisii University, Kenya. His research interests are in ICT4D, machine learning, data mining, resource optimization and allocation in wireless networks, cellular networks engineering, and cloud computing. He has authored and co-authored more than 20 internationally peer-reviewed journals and conference papers.
Deusdetus Mfungo Bahati was born in 1975 at Ukerewe district, Mwanza region, Tanzania. He is an Assistant Lecturer in the field of Community Development at the Local Government Training Institute – Dodoma, Tanzania, where he has been working since 2008. He holds MA in Public Policy from Meiji University, Japan with varieties of short courses training from inside and outside Tanzania. He holds BA on Rural Development from Sokoine University of Agriculture in Tanzania. Apart from teaching at the college level, he has been substantially involved in facilitating different andragogical training throughout the country. He works also as a consultant in the areas of Training Management and Public Administration. Mr. Mfungo has published some papers in the field of good governance and management in general.

Mesfin Belachew is currently working at Ethiopian Ministry of Communication and Information Technology (MCIT) as a Technical Advisor to the Minister. He also worked at MCIT as Director of Electronic Government Directorate from 2009 until early 2013. He has a PhD degree in Computer Science from School of Technology and Computer Science, Tata Institute of Fundamental Research (TIFR), India. His Bachelors and Master’s Degree in Computer Technology is from Technische Universitat Ilmenau, Germany in 1990. He has a teaching and research experience for more than 15 years in different Universities in Ethiopia. He is an Assistant Professor in Computer Science since January 2004 and collaborator in a PhD program at Addis Ababa University. He is also advising students at HiLCoE Collage, Adama, Bahir Dar, and Jimma Universities in Ethiopia. He has diplomas and certifications in ICT Project Management, Business Management and Administration, and Monitoring and Evaluation of IT projects.

Karin Hansson has a PhD in Computer and systems sciences from Stockholm University. She has been working with various aspects of risk and decision analysis. Of particular interest to her research are multi criteria analyses of flood mitigation strategies, especially in developing countries. The emphasis is on computer-based modeling and simulation techniques combined with methods for evaluating strategies where numerous stakeholders are incorporated in the process. She has published in journals as well as book chapters and presented at several conferences.

Onesimus Kamau is the current Head of eHealth Development Unit and Health Systems Strengthening at the Ministry of Health. He has a background in Information Technology and also holds MSc Epidemiology. His specialties are in health IT, systems development, systems and data security. Mr. Kamau started as a health information officer, worked at various hospitals in the country as a health information systems officer and currently heading eHealth Development Unit where he is involved in the coordination of health innovations to support service delivery and improve quality of care. His achievements include setting up the e-Health development Unit at the Ministry of Health, Systems Service desk and developing of first Kenya e-Health systems interoperability guidelines. He is currently working on use of mobile technology monitoring of vital events by use of information technology. His research interests include Health informatics, Electronic Health Records, Mobile Health, Electronic Medical Records/Electronic Health Records, Data Mining, and Data Security in Health Information Systems.
Davies Kimanga, MD, MSc, is a trained medical epidemiologist with a first degree in Medicine and Surgery and a Master’s in Applied Epidemiology. He is proficient in data collection, analysis, and interpretation. He has worked for the Ministry of Health in Kenya for more than ten years rising through the ranks to manage strategic information, evaluation and research in the national HIV program and lastly to head the health information systems unit at the Headquarters. Mr. Kimanga designed and developed data collection and reporting tools for HIV programs. He chaired the Electronic Medical Records (EMR) technical working group spearheading the roll out of EMR systems. He played a leading role in development of standards and guidelines for electronic medical and health records in Kenya. He coordinated the second Kenya AIDS indicator survey that utilized an electronic data collection. His interests include health informatics, operational research, public health, data quality and use, surveillance in health.

Felistus Kinyanjui is currently teaching in the Department of History, Archaeology and Political Studies at Kenyatta University, Kenya. Previously she taught at Egerton University and Rhodes University. She holds a PhD in humanities and has a wealth of experience as a social and development consultant. She is well published in the area of governance and subaltern studies. Her current research interest is in the area of international security with a bias on population displacement in Eastern and the Horn of Africa.

Godfrey Robert Kisusu was born in 1973 at Musoma Municipality, Mara region, Tanzania. He is the Chief Executive Officer of Mirage Computer Systems in the city of Dar es Salaam, Tanzania since February 2014. He holds BSc in Computer Science from Open University of Tanzania, with varieties of short course training from Tanzania. He is a computer consultant with ten years of experience teaching ICT in public schools. He is currently substantially involved in securing availability of ICT training facilities in rural areas so that the majority of population can have the basic ICT literacy to participate in good governance. He is also involved in creating Management Information Systems for efficient running of public and private institutions in Tanzania.

Robert W. Kisusu is a Senior Lecturer/Consultant on rural economic allied subjects in the private training academy after retiring from public institutions in Tanzania subsequent attaining PhD from Sokoine University of Agriculture Tanzania, MSc (Agric. Econ.) from University of East Anglia, UK, Post Graduate Diploma in Financial Management from Institute of Financial Management, and Advanced Diploma in Economic Planning both in Tanzania. Dr. Kisusu was a Civil Servant/Senior Lecturer after a successive serving of more than 35 years in a distinguished service in rural economic development. With such wide academic and practical experience, he has published a long list of publications in local and international publications which an emphasis on how to improve rural livelihood in local government authorities in Tanzania as well on crosscutting issues. He has published chapters in a book on policy factors influencing reduction of stigma HIV/AIDS and on alcohol policy on population variables, Tanzania.

Mercy Mlay Komba (PhD) is a Lecturer at Mzumbe University, Faculty of Science and Technology, Department of Information and Communication Technology in Tanzania. Dr. Komba has been working as a member of academic staff for the past 13 years. She is teaching information systems management, e-commerce, and e-business and ICT. Her area of research interests includes e-government, e-learning, information literacy/ search techniques, Web 2.0 technologies. Dr. Komba has published in several peer-reviewed journals.
**About the Contributors**

**Lemma Lessa** is a Lecturer at the School of Information Sciences, Addis Ababa University, Ethiopia. He holds MSc degree in Information Sciences and has joint the internationally supported Doctoral program in Information Systems at Addis Ababa University, Ethiopia. His teaching interest is on the social and management aspects of the design, adoption and use of Information Systems. His research interest is on the socio-cultural and organizational aspects of Information Systems in general and the adoption and evaluation of e-Government in particular.

**Benard Maake** is currently pursuing a PhD in Business Information Systems at Jaramogi Oginga Odinga University of Science and Technology in Kenya. He holds a Master of Science in Computer Science (MSc Computer Science) from Periyar University, India and a Bachelor of Computer Applications (BCA) from the same university. At present, he is a Lecturer in the Computer Science Department, Faculty of Information Science and Technology, Kisii University, Kenya. He has lectured at various public and private universities in Kenya. His research interests are Mobile for Development (M4D), M-Governance, E-Governance, Computer and Mobile Programming Languages, Software Engineering, Indigenous Knowledge (IK), Computer Networks, and Cloud Computing. He has authored and co-authored journals and conference papers in the above-mentioned disciplines.

**Paul Macharia**’s background is in Computer Science and Information and Communication Technologies. His specialties are programming, systems development, biometric systems, data warehousing, and ethical issues/concerns relating to information systems. Macharia started as a Computer Technician in 2005, served as an Information Technology administrator in a leading University and is currently working as a Data Manager in Kenya’s Ministry of Health; National AIDS/STIs Control Programme. His achievements include the setup of a research computing infrastructure in a Kenyan University, geo-mapping of health facilities, first electronic data collection on HIV/AIDS in Kenyan prisons, use of smartphones to collect behavioral data among key populations and the integration of biometric identification to monitor access to HIV care services to a key population. His research interests include research computing clusters/infrastructure, health informatics, electronic health, mobile health, electronic medical records/electronic health records, data warehousing, ethics in information systems, geographical information systems, biometric systems, open source and Android applications.

**Babalwa Magoqwana** is an Andrew Mellon Scholar and lecturer with the Department of Sociology at Rhodes University, South Africa. She has taught courses on the Sociology of Labour Markets and the Sociology of Work Studies. She holds a Bachelor of Social Science (Honors) and Master of Social Science from Rhodes University. In addition, she is a doctoral candidate with the Department of Sociology at Rhodes University. Her doctoral research focuses on call center labour processes within local government in South Africa. Her main research interest areas are critical service work studies, labour process theory, local government, workplace restructuring and labour markets in South Africa.

**Frank Makoza** is a Teaching and Research Associate in the Department of Information System at University at University of Cape Town. He holds a Master’s degree in Information Systems from University of Cape Town, South Africa and Bachelor of Science (Honours) degree in Business Information Technology from London metropolitan University, United Kingdom. He has worked in Telecommunications and Higher Education sectors. His research interests are in assessing societal impact of Information and Communication Technologies (ICT) in context of developing countries and ICT use in small businesses. He has published peer reviewed journal articles and presented at international conferences.
Guy Maurille Massamba holds a PhD in Political Science. For five years, he taught political theory at Howard University in Washington, DC, before working as a World Bank Consultant in the field of leadership development, training and advising African public administration officials. His areas of expertise also include project strategic review and monitoring and evaluation, governance, capacity building training, which he performed through the World Bank and a number of institutions, such as Development International, Inc. He has also worked as an expert consultant in the field of democracy analysis for the University of Gothenburg, Sweden, and contributed to the identification of lessons learned from public administration reforms in Africa, with the Government Institute of the African Union. He continues to work in these areas and others, such as political strategy, through the Model Praxis, LLC, a consulting firm based in the Washington, DC area.

Sandra Matatu is a doctoral candidate with the Department of Sociology at Rhodes University, South Africa. Her doctoral research focuses on electronic government and worker experiences of workplace restructuring in South African municipalities. She received a Bachelor of Social Science in Organizational Psychology and Industrial Sociology and a Master of Social Science in Industrial Sociology from Rhodes University. Through her association with Rhodes University, she has been involved in numerous public service accountability enhancing projects. Over the years, her main research interest areas have been in electronic government, electronic governance, social accountability, political accountability, public administration, new technologies and workplace changes, and labour relations.

Avelino Mondlane is a senior researcher in Risk Management at Stockholm University and also is working with Eduardo Mondlane University in the field of Project Management in the last 20 years. His field of interest is Muticriteria Decision Analysis with focus to scenario planning for flood risk management at Limpopo River Basin in Mozambique.

Solomon Negash is Information Systems Professor and Executive Director of the Mobile Application Development Lab at Kennesaw State University. His PhD is from Claremont Graduate University. He was instrumental in creating the Ethiopian National ICT Advisory Body and the Information Systems PhD program at Addis Ababa University, served as first chairman and first international coordinator, respectively. The charitable organization he founded delivered 400,000 books and 3,000 computers to Ethiopia. Prof. Negash has published over a dozen journal articles, two edited books, several book chapters, and over three dozen conference papers. His current research is in mobile technology, instructional technology, and ICT for economic development. Prof. Negash is the recipient of the 2007 distinguished intellectual contribution award, the 2005 and 2007 distinguished e-Learning award, the 2007 distinguished graduate teacher award, the International Goodwill and Understanding award, and the 2010 Distinguished Service award. He currently leads an outsourcing venture in Ethiopia.

Cathrine Nengomasha is an Associate Professor in the Department of Information and Communication Studies at the University of Namibia. She holds a PhD in Information Science and her dissertation was on electronic records and e-government in Namibia. She has experience in managing records, archives, and information spanning over 20 years. Prior to joining the University of Namibia in 2001, she worked for the National Archives of Zimbabwe and Botswana National Archives. Her research interests include electronic records management; knowledge management and e-government.
About the Contributors

Patrick Ngulube (PhD) is a professor in the Department of Interdisciplinary Research and Postgraduate Studies at the University of South Africa (UNISA), Honorary Professor, University of KwaZulu-Natal, South Africa, and Visiting Professor National University of Science and Technology, Zimbabwe. He has presented numerous papers at conferences and published significantly in scientific journals. His research interests are indigenous knowledge systems, knowledge management, records management, e-government, and the preservation of access to information.

Naftal Oino Nyarangi is currently pursuing a Master of Business Administration (Finance) at the Daystar University in Kenya. He holds a Bachelor of Commerce (BCom) from Kenyatta University, Kenya. He has more than four years of experience in the Kenyan Banking Industry working as an Entrepreneurship Trainer and a relationship supervisor in the Business Smart Card Department. He is currently an Acquiring Supervisor at the Equity Bank, Kenya. Having this industry experience, he has lectured at the Institute of Internal Auditors – Kenya Chapter, Augustana College, Jomo Kenyatta University, and Kisii University. Naftal Nyarangi is married to Lynn Tendo, and they are blessed with a daughter, Esther Pendo.

Wilson Okaka is a Ugandan Professor (Communication) who is dedicated to public policy communication campaign, community media (including community radio and television), gender equality, climate change and environment protection, public, renewable energy, and social inclusion. Prof. Okaka worked as the Organisation Development Advisor, Communication Strategy, Bangladesh (Dhaka). Wilson Okaka is a communication professional was educated and trained in Uganda, UK, Italy, Sweden, and USA. He has published many books, peer-reviewed articles, and presented conference papers. Prof. Okaka is a member of many research, training, alumni, scientific, and education networks. He has been to African, Asian, American, and European countries for studies, research, conferences, and work.

Oliver Popov is a professor at the Department of Computer and Systems Sciences (DSV), Stockholm University, and a professor at the Department of Information Technology and Media, Mid Sweden University. Since 1998, he has been a full professor at Faculty of Informatics and Computing Engineering, Saints Cyril and Methodius, where now is a visiting professor. As of July 2010, he is a director of the Systems Analysis and Security (SAS) unit within Department of Computer and Systems Sciences, Stockholm University. He holds a PhD in Computer Science from the Missouri University of Science and Technology (University of Missouri, Rolla), USA, and his research inclinations converge towards Internet technology, modeling and simulation, ICT4D, security, data and systems integrity, and cyber forensics, as well as their impact on contemporary societies. He has been author and co-author of more than 200 scholarly articles, 7 books, and the recipient of many teaching awards, including Master of Academia from MSU, in 2006.

Dorothy Rambim is currently pursuing a PhD in Business Information Systems at Jaramogi Oginga Odinga University of Science and Technology in Kenya. She holds an MTech degree in Electrical Engineering (Telecommunication Engineering) from Tshwane University of Technology, S. Africa and a BSc in Computer Science from Moi University in Kenya. At present, she is lecturer in the School of Innovative and Information Systems at Jaramogi Oginga Odinga University of Science and Technology, Kenya. Her research interests are in resource optimization and allocation in wireless networks, ICT4D, and data mining. She has authored and co-authored a number of internationally peer-reviewed journals and book chapters.
Shawren Singh has over ten years of experience with ICT education. Currently he is a senior lecturer in the School of Computing at the University of South Africa, where he has been involved with the following modules: Information Systems Development, Object-Orientation Approaches, Introduction to Computer Science, Human-Computer Interaction, and End-User Computing. He is actively conducting research in the e-Government space, with special focus on the design and development of e-Government applications. In addition, he has an interest in human-computer interaction and usability. He is also a member of SAICSIT (South African Institution for Computer Scientists and Information Technologists).

Surenrda Thakur (Colin) was the Treasurer of the Computer Society of South Africa (CSSA) for a year, and the Chapter Chair of the CSSA (three years). He was commissioned by the Electoral Commission of South Africa (IEC) to undertake an international study of electronic voting practices in 2012. This was called “Electronic Voting: The Cross-National Experience.” This was a comprehensive study of all countries trialing, piloting, implementing, and abandoning e-voting. He evaluated the effectiveness of Voter Registration practices with a particular focus on technology for UNDP (2013). Colin delivered 6 keynote addresses on this topic and was an international observer in the 2011 Zambian election. He is developing a multimodal biometric voter validation system to leverage the ubiquity of mobile devices as a voting tool. Colin is a director at the iNeSI e-Skills CoLab at Durban University of Technology tasked with e-government and e-democracy research.

Wilhelm Elinashe Uutoni is a librarian by profession and currently a staff development fellow in the Department of Information and Communication Studies at the University of Namibia. He holds a Bachelor Degree of Arts in Library Science and Records Management and a Master’s Degree in Library and Information Sciences: Digital Libraries and Information Services from the University of Borås in Sweden. His research interests are digital libraries, libraries and Web 2.0, and e-government.

Jared Wanyonyi is currently pursuing a Master of Science in ICT Project Management at Jomo Kenyatta University of Agriculture and Technology in Kenya. He holds a Bachelor of Computer Science with Education from Kampala International University in Uganda. He is currently a part time instructor at Jomo Kenyatta University of Agriculture and Technology, where he lectures on Information Technology. He is also a competent and qualifies teacher of computer studies at high school. His research interests are in ICT4D and ICT project management, machine learning, data mining, data structures, compiler design, and cloud computing. He has authored and co-authored some internationally peer-reviewed conference papers and journals.
