About the Contributors

Sven Abels (sables@acm.org) started working as a freelancer about 12 years ago by founding his own software company Abelssoft. Within those activities, he conceptualized and implemented software products for end users and also offered IT consulting for small and midsized enterprises. Abels received a BSc, Dipl.-Inform, and a PhD from the University of Oldenburg (Germany). He organized several academic workshops and has over 40 publications in journals, proceedings, and books.

Lei-da Chen is associate professor of information systems and technology in the College of Business Administration of Creighton University. His research and consulting interests include electronic commerce, mobile e-commerce, Web-based systems development, data warehousing and mining, and diffusion of information technology in organizations. Dr. Chen is the author of a book, Mobile Commerce Application Development, and over 40 professional articles in refereed journals and national and international conference proceedings.

Jonathan Cowin is a business student of the College of Business Administration at Creighton University in Omaha, Nebraska, majoring in finance. Cowin was born and raised in Overland Park, Kansas, where he was the oldest of four children. Cowin plans to graduate from Creighton in May of 2009.

John R. Criswell II is a senior programmer with Shelter Insurance and adjunct faculty teaching computer information systems at Columbia College in Columbia, Missouri. He received a BS (computer information systems), MBA, and MS CIS from Missouri State University. His research has appeared in the Journal of Electronic Commerce in Organizations and Journal of Business and Behavioral Sciences. His current research interests include privacy policy statements, e-commerce, and ethics in information systems.

Martin D. “Marty” Crossland is the chairman of distance programs for the School of Business at Oral Roberts University. He earned a PhD in management information systems from Indiana University, an MBA from Oklahoma City University, and a BS in geology from Texas Tech University. His research interests include decision making effectiveness and human factors in decision support system usage, particularly with spatially reference information (geographic information systems), telecommunications and networking, and systems security. His research has been published in various journals, including MIS Quarterly, Decision Support Systems, Journal of End User Computing, and Technology Studies.
**Yanqing Duan**, PhD, is a reader in information systems at The University of Bedfordshire Business School. Her principal research interest is how the emerging information and communication technologies (ICT) can be effectively used in, and their impact on, supporting decision making, facilitating knowledge transfer, and improving skills development. This research focus is reflected in the context of ICT based knowledge management and transfer, use of intelligent systems in supporting organizational and individual decision making, small to medium enterprises (SMEs) adoption of e-commerce/e-business, and Web-based training systems for SMEs. She has coordinated many European Commission funded research projects and published about 90 papers in journals, books, and international conference proceedings.

**Zetian Fu**, PhD, is a professor and vice president of China Agriculture University, Beijing, China. He has a wide range of research interests, including agriculture systems engineering, agriculture information technologies, agriculture structure adjustment in China, agriculture policies and strategies, and so forth. He has received numerous research grants and supervised many doctoral students. He has over 100 publications in journals, books, and conference proceedings.

**Axel Hahn** (hahn@wi-ol.de) is head of the working group business information systems of the University of Oldenburg in northern Germany. He owns the professorship business informatics. His main research areas are interoperability in virtual organizations and information processing at the product development.

**Qile He** is a research associate at Middlesex University Business School, London. He received his first degree, a BA in economics, from the University of Colorado at Denver. Subsequently, he gained an MSc in financial decision management from the University of Luton and an MSc in research methods from Middlesex University. He is now pursuing his PhD at Middlesex University. His principal research interests include organizational learning, strategic partnership, and knowledge transfer processes and practices in the context of firms’ supply chain management.

**Luiz Antonio Joia** is an associate professor and MBA head at the Brazilian School of Public and Business Administration, Getulio Vargas Foundation, and an adjunct professor at Rio de Janeiro State University, Brazil. He has published two books, several chapters, and more than 50 scientific papers in international journals and conferences. He holds a BSc in civil engineering from the Militar Institute of Engineering, Brazil, and an MSc in civil engineering and DSc in engineering management from the Federal University of Rio de Janeiro, Brazil. He also holds an MSc in management studies from Oxford University, UK.

**Norbert Jurkiewicz** is an undergraduate student in information sciences and technology at Penn State University and expects to graduate in May 2007. Currently he is an APL developer for The Carlisle Group, a Scranton, Pennsylvania-based software developer that provides solutions for the financial industry.

**Young-Gul Kim** is the director of the Knowledge Management Research Center at the Graduate School of Management of the Korea Advanced Institute of Science and Technology (KAIST). He has a BS and MS from Seoul National University and a PhD from University of Minnesota’s Curtis L. Carl-
About the Contributors

Professor Kim taught at the Katz Graduate School of Business, University of Pittsburgh, USA as a faculty for three years. He has published in numerous academic journals such as *MIS Quarterly, Communications of the ACM, Journal of MIS, IEEE Transactions on Engineering Management, Business Process Management Journal, Journal of Strategic Information Systems*, and so on.

**Kathryn M. Kimery** is associate professor of information systems and chair of the Department of Finance, Information Systems, and Management Science at Saint Mary’s University in Halifax, Nova Scotia. She earned her PhD from the Michael F. Price College of Business at the University of Oklahoma in 1998. Her research interests focus on electronic commerce, computer-assisted instruction in higher education, computing careers, and ethical issues in computing and business education. She has published articles in numerous journals, including the *Journal of Electronic Commerce in Organizations, Journal of Business Research, Journal of Information Technology Theory and Application, International Journal of Business and Economic Research*, and *Journal of Management Education*.

**Assion Lawson-Body** is an assistant professor at the University of North Dakota. He obtained his PhD and MBA in MIS from Laval *University, Quebec, Canada*. He also received a DESS-CTCI from IAE, University of Montpellier 2, France. His publications have appeared or will appear in the *Journal of Electronic Commerce in Organizations, Journal of Computer-Mediated Communication, Journal of E-Business, E-Business Review, Academy of Information and Management Science Journal, Encyclopedia of E-commerce, E-Government and M-commerce, Encyclopedia of Multimedia Technology and Networking, Journal of Comparative International Management, “Revue des Sciences de Gestion,”* and so forth. He has also published in several conference proceedings such as Association of Information Systems, IRMA, Association for Information and Management, Business, Economics and Management Disciplines, and so on. He has consulted for the Small Business Development Center (SBDC) and Government Rural Outreach Initiative (e-government) in North Dakota.

**Daoliang Li**, PhD, is a professor at the China Agricultural University. His principal research interest is the development and use of intelligent systems in environment and agriculture, especially for decision support systems, remote sensing, and GIS in revegetation/rehabilitation of abandoned lands. He is also interested in knowledge management and e-learning. He has published widely in international journals and books.

**Robert MacGregor** is an associate professor in the School of Information Technology and Computer Science at the University of Wollongong in Australia. He is also the former head of discipline in information systems. His research expertise lies in the areas of information technology (IT) and electronic commerce (e-commerce) in small to medium enterprises (SMEs). He has authored a number of journal and conference publications examining the use and adoption of IT in SMEs. MacGregor is also the founding editor of the *Australasian Journal of Information Systems* and was conference chair of the Australian Conference of Information Systems in 1992. In his spare time, Rob writes music. His most recent work is the symphony “Alba.”

**Maria Madlberger** (maria.madlberger@wu-wien.ac.at) is an assistant professor at the Institute for Management Information Systems at the Vienna University of Economics and Business Administration.
She received her PhD in commerce from the Department of Retailing and Marketing at this university in 2002. Madlberger’s research activities follow an interdisciplinary approach as she concentrates on the links between information systems and marketing, especially in the field of e-commerce. Her research interests are focused on the application of inter-organizational information systems and information sharing in supply chain management, strategic and operational benefits of electronic data interchange (EDI), multichannel retailing, distribution in B2C e-commerce, and Internet marketing. She has published her research results in journals and refereed conferences in the fields of e-commerce, marketing, and supply chain management. Her dissertation has been published as a book titled Electronic Retailing. Before Madlberger joined the institute, she gained practical experience as a specialized journalist at a trade journal for the grocery and FMCG sector.

Mary McCord is associate professor of computer information systems at the University of Central Missouri. After an entrepreneurial career in oil and gas production, she received her PhD in business administration from the University of Oklahoma. Her research areas include e-commerce, service learning, and team-based learning. She is currently teaching management of information systems through the Integrative Business Experience program, which combines team-based learning methods with real world business endeavors. She has published articles in journals such as Journal of Electronic Commerce in Organizations, Journal of Informatics Education Research, Journal of Information Technology Theory and Application, To Improve the Academy, MBAR Journal, and Handbook of Research on Electronic Surveys and Measurements.

Ravi Nath is the associate dean for graduate programs and the holder of the Jack and Joan McGraw Endowed Chair of Information Technology Management in the College of Business Administration at Creighton University. He has published numerous research papers in the area of electronic commerce and information systems in various national and international publications. Dr. Nath teaches and conducts research in information systems, electronic commerce, and data mining. Also, Dr. Nath serves on the boards of several for-profit and nonprofit organizations. He holds a master’s degree from Wichita State University and a PhD from Texas Tech University.

Timothy P. O’Keefe, PhD, is associate professor and chairman of the Department of Information Systems and Business Education at the University of North Dakota. He is an experienced IT consultant and cofounder of a successful Internet services company. His research interests include electronic business and commerce, database design and optimization benchmarking, Internet business efficacy and assessment, and the relationship between the information systems and records management functions in organizations, among others. He has published and presented at numerous national and international
About the Contributors

Dr. O’Keefe has been active in conferences as well as in journals ranging from *Communications of the ACM* to the *Journal of Forensic Accounting*. Recently, Dr. O’Keefe spent several months as a visiting professor at the University of Shanghai for Science and Technology teaching database design and management information systems. He has been actively involved in the Wuhan International Conference on E-Business and has been active in recruiting Chinese students to graduate programs in the United States.

**Chung-Hoon Park** is the senior consultant of the Office of Strategy Consulting at Samsung SDS. He has a BS, MS, and PhD from the Korea Advanced Institute of Science and Technology (KAIST). He has published in the *International Journal of Retailing and Distribution Management and Business Process Management Journal*. His interest is in customer relationship management, knowledge management, and electronic commerce. His paper on customer relationship management has received the best paper award from the *Business Process Management Journal* in 2004.

**Alan R. Peslak** is an assistant professor of information sciences and technology at Penn State University. He received his PhD in information systems from Nova Southeastern University, Fort Lauderdale, Florida. His research areas include information technology social, ethical, and economic issues as well as information technology pedagogy. Publications include the *Communications of the ACM, Information Resources Management Journal, Journal of Business Ethics, Journal of Computer Information Systems, Journal of Information Systems Education, Team Performance Management, Information Research*, and *First Monday*. He has over 25 years of diverse manufacturing and service industry experience. He is on the editorial boards of numerous journals.

**Dane K. Peterson** is a professor of quantitative business analysis at Missouri State University. He received his PhD in quantitative methods and applied psychology from Southern Illinois University. He has published in numerous journals such as *Journal of Applied Psychology, Organizational Behavior and Human Decision Processes, International Journal of Information Management, Business & Society, Journal of Electronic Commerce in Organizations, Information Resources Management Journal, Business & Psychology, Personnel Review, and Information Technology & People*.

**Christopher G. Reddick** is an assistant professor of public administration at the University of Texas at San Antonio. He was a recipient of the President’s Distinguished Achievement Award for Research, UTSA 2005. He formerly taught at Murray State University in Kentucky where he was MPA director. Dr. Reddick’s research interests are in e-government, public budgeting, and employee health benefits. Some of his publications can be found in the academic journals *Public Budgeting & Finance, Government Information Quarterly, Financial Accountability and Management, Social Science Computer Review, e-Service Journal, Journal of E-government, International Journal of Electronic Government Research, Municipal Finance Journal, and the Review of Public Personnel Administration*. Dr. Reddick holds a BA and MA in political science specializing in public administration, and a MBA in business studies at the University of Guelph in Canada. He has a PhD in political science from the University of Sheffield in the United Kingdom.

**Han Reichgelt** holds degrees in philosophy and psychology from the University of Nijmegen in The Netherlands, and a PhD in cognitive science from the University of Edinburgh in Scotland. Previously, he was a research fellow at the University of Edinburgh, lecturer in Psychology at the University of
Nottingham, and professor of computer science at the University of the West Indies, Mona, Jamaica. His current position is associate dean of the College of Information Technology at Georgia Southern University. Reichgelt is the (co-)author of over 70 journals and refereed conference papers, as well as of a textbook on knowledge representation in artificial intelligence. His research interests include IT and economic development, IT application delivery quality, and computing education. He currently chairs the ACM Special Interest Group on IT Education.

**Jari Salo** is currently an assistant professor of marketing at the University of Oulu. He received his DSc (econ. & bus. adm.) from the University of Oulu. Previously, he has published in *Business Process Management Journal*, *Journal of Business and Industrial Marketing*, *Journal of Euromarketing*, and other journals. Besides journal articles, Salo has also published several book chapters and has participated in leading conferences in the marketing and information technology area. He has served as a reviewer for many journals, conferences (AMA, HICSS, EMAC, ANZMAC, IRMA), and books. His present research interests include business relationship digitization, electronic commerce including mobile marketing, and new product development and innovation.

**Paulo Sergio Sanz** is a researcher at the Brazilian School of Public and Business Administration, Getulio Vargas Foundation, Brazil, and an IT consultant. He teaches executive education courses of the Getulio Vargas Foundation. He has published several papers in national and international journals and conferences. He holds a BSc in systems analysis and an MBA from the Brazilian School of Public and Business Administration of Getulio Vargas Foundation.

**Lejla Vrazalic** is an associate professor in information systems at the University of Wollongong in Dubai (UOWD). She is also the chair of the UOWD Research Committee and coordinator of the Program for the Enhancement of Learning and Teaching (PELT). Her research interests are in human computer interaction and e-commerce, and she was awarded the University Medal in 1999 for her research. Lejla received the Vice Chancellors Award for Outstanding Contribution to Teaching and Learning (OCTAL) in 2004 and a Carrick Citation for Outstanding Contributions to Student Learning in 2006. She is also the recipient of the 2004 Australian Prime Minister's Award for Excellence in Business Community Partnerships (NSW) for her work on community portals in Australia.

**Aimao Zhang** is a faculty member at Department of Information Technology, Georgia Southern University. She earned her Doctor of Philosophy from Southern Illinois University at Carbondale with a major in management information systems (2001) and a minor in production/operations management. She is specialized in teaching Web design, middle layer programming, and integrated Web applications. Her research covers e-commerce, industrial economics, banking and health care studies, and cross culture studies. Dr. Zhang’s publications include book chapters, papers in refereed journals, national and international conferences.
