About the Contributors

**Liliane Esnault** is professor in information systems management, e-business and project management at E.M.LYON, and project manager in e-learning development. She graduated from Ecole Supérieure de Physique et Chimie de Paris (ESPCI) and has a PhD in fundamental molecular physics. She is also teaching an e-business course in a French-Chinese Executive MBA organized by the Rhône-Alpes Region and Shanghai University. She is involved in the European research project "EQUEL" (e-quality in e-learning), after several other European projects in the same area. She is the author of several writings linked with her areas of expertise: e-learning and pedagogy, information systems and technology management, project management, management of organizational networks. She also is a member of several associations devoted to information resources management, e-learning and network learning, and international projects management.

**Adams Bodomo** is associate professor of linguistics and director of the Cognitive Science Program at the University of Hong Kong. He specializes in theoretical linguistics, human language technology (HLT), and language and literacy education in the age of information technology. His research projects include *The Use of Information Technology in Teaching Language and Linguistics Courses*, *Linguistic Features of Mobile Phone Communication*, and *Complex Predicates and Serial Verbs across Languages: Issues of Syntax, Semantics, and Information Structure*. You can reach him via e-mail at abbodomo@hku.hk or via his homepage at http://www.hku.hk/linguist/staff/ab.html.
Klarissa Ting-Ting Chang is a doctoral candidate in the Tepper School of Business at the Carnegie Mellon University. She holds an BSc (first class honors) degree in computer & information sciences and an MSc in information systems from the National University of Singapore, and a MSIA degree in organizational behavior from the Carnegie Mellon University. Her research interests include social networks in distributed teams, psychological contracts of knowledge sharing, organizational learning, and educational application of collaborative technology.

Charlie Chen is an assistant professor in the Department of Computer Information Systems at Appalachian State University. He received his PhD in management information systems from Claremont Graduate University. Dr. Chen likes to view the field of management information systems from infrastructural, managerial, and operational perspectives. He is working on improving information system solutions in each of these three areas. His current main research areas are online learning, social learning technology, mobile commerce, and security awareness.

Sara Genone received her university degree in modern literature with a specialization in pedagogy from the Università Statale di Milano in 2000. She attended a course of Multimedia Online Design at Dida*El S.r.l.–Multimedia Technology for the Communication of Knowledge, where she worked as instructional designer from July 1999 to April 2000. From April 2000 to January 2002 she worked for EKIP S.r.l. as an e-learning tutor, designer, and system administrator. Since 2003 she has worked with the Research Center on Information and Communication Technology and Economics at the Università Cattaneo as an e-learning designer and developer. Her research work mainly concerns the application of ICT to higher education through the development of blended learning solutions as a supplement to traditional classroom teaching. She is coauthor of several papers on e-learning published in the proceedings of national and international conferences. She also collaborates with the Università Cattaneo in activities of teaching and coordination for courses of information technology.

Michael Y. Hu holds a PhD from the University of Minnesota in management science/marketing. Currently he holds the Bridgestone chair in international business and is a professor of marketing at Kent State University. He has published more than 120 academic articles in the areas of applications of artificial neural networks, international business, and marketing. His research has appeared in Decision Support Systems, Journal of Marketing Research, Marketing Letters, Annals of Operations Research, Decision Sciences, and European Journal of Operational Research, among many others. He won the University Distinguished Teaching Award (1994) and the University Distinguished Scholar Award (2006).
Nory Jones is an assistant professor of management information systems in The Maine Business School. Her areas of research involve knowledge management and knowledge sharing via collaborative Web-based technologies. She teaches classes in knowledge management, electronic commerce, and management information systems. She has published articles on knowledge management in the *Journal of Knowledge Management, Journal of Organizational and End User Computing,* and *Online Information Review,* among others.

Claire Khek is currently a consultant at Deloitte & Touche (Singapore) Enterprise Risk Services.

John Lim is an associate professor in the School of Computing at the National University of Singapore. Concurrently, he heads the Information Systems Research Lab. Dr. Lim graduated with first class honors in electrical engineering, and holds an MSc in MIS from the National University of Singapore and a PhD from the University of British Columbia. His current research interests include e-commerce, collaborative technology, negotiation support, IT and education, and IS implementation. He has published in MIS and related journals including *Journal of Management Information Systems, Journal of Global Information Management, Decision Support Systems, International Journal of Human Computer Studies, Organizational Behavior and Human Decision Processes, Behaviour and Information Technology, International Journal of Web-Based Learning and Teaching Technologies, Journal of Database Management,* and *Small Group Research.*

Xueguang Ma was a senior system analyst during the 1990s at several international firms in Beijing, China. He earned his PhD in information systems from the University of Maryland, Baltimore County (2005). He worked as technology lead for the university’s Department of Education from 2001 to 2005, during which time he developed the education accountability system. Dr. Ma was an assistant research scientist of the Department of Education at UMBC. His research interests are in educational information systems. Now he works as a software architect leading a team to design compliance software for special education.

Cecilia Mari received her university degree (cum laude) in foreign languages and literature with a specialization in information and social communication science (2001) from the Università Cattolica del Sacro Cuore di Milano, where she also attended the Specialization School for Higher Teaching and received her professional qualification for teaching the English language (2004). She has been teaching English in a professional high school and at the Università Cattaneo since 2002. In 2002 she also started to work with the Research Center on Information and Communication Technology and Economics at the Università Cattaneo as an e-learning designer and developer. Her research work mainly concerns the application of ICT to higher
education through the development of blended learning solutions as a supplement to traditional classroom teaching. She is co-author of several papers on e-learning published in the proceedings of national and international conferences. She also collaborates with the Università Cattaneo in activities of teaching and coordination for courses of information technology.

Luca Mari received his university degree in physics from the Università Statale di Milano (1987) and his PhD in measurement science from the Politecnico di Torino (1994). He is professor of foundation of measurement and system theory and professor of information technology in the Faculty of Management Engineering at the Università Cattaneo, and professor of information technology in the Faculty of Linguistic Science, Università Cattolica del Sacro Cuore di Milano, where he also coordinates the curriculum of information technology. His research activity is mainly focused on measurement science and e-learning. He is coordinator of the e-learning activities at Università Cattaneo and of the technological development at the Research Center on Information and Communication Technology and Economics. He has been director, coordinator, designer, and teacher in projects of research and development. He has also been consultant for public and private organizations for the designing of information systems and their implementation, and he has developed various software systems. Dr. Mari is author and coauthor of several scientific papers and books.

Lorne Olfman is dean of the School of Information Systems and Technology and Fletcher Jones chair in Technology Management at Claremont Graduate University. He came to Claremont in 1987 after graduating with a PhD in business (management information systems) from Indiana University. Dr. Lorne’s research interests include how software can be learned and used in organizations, the impact of computer-based systems on knowledge management, and the design and adoption of systems used for group work.

Claus Pahl is a senior lecturer and the leader of the Web and Software Engineering Research Group at Dublin City University which focuses on Web technologies and e-learning applications in particular. Dr. Pahl is a graduate from the University of Technology in Braunschweig and holds a PhD from the University of Dortmund. He has published more than 125 papers including a wide range of journal articles, book chapters, and conference contributions on e-learning. He is on the editorial boards of the International Journal on E-Learning and the International Journal of Technology-Enhanced Learning, and is a regular reviewer for journals and conferences in the areas of software, Web, and learning technologies and their applications. He has extensive experience in educational technologies, both as an instructor using technology-supported teaching and learning at undergraduate and postgraduate levels, and as a researcher in Web-based learning technology. The
IDLE environment, developed by him and his students, is in use in undergraduate teaching since 1999.

**Katia Passerini** is an assistant professor and the Hurlburt chair of management information systems at the School of Management of the New Jersey Institute of Technology, where she teaches courses in MIS, knowledge management, and IT strategy. She has published in refereed journals such as *Computers & Education, Communications of the ACM, Campus-Wide Information Systems, Communications of AIS, Society and Business Review, Journal of Educational Multimedia and Hypermedia,* and *International Journal of Knowledge Management,* and in several peer-reviewed proceedings, particularly in the areas of computer-mediated learning, IT productivity, and mobile communications. Her professional IT experience includes multi-industry projects at Booz Allen Hamilton and the World Bank. Dr. Passerini earned both an MBA and a PhD in information & decision systems from George Washington University. While there, she was part of the learning and technology unit that supported the creation and deployment of distance learning courses university wide. She worked as an instructional and multimedia specialist focused on faculty training and pedagogical effectiveness.

**Roy Rada** earned his MD (1977) at Baylor College of Medicine and his PhD in computer science from the University of Illinois (1980). He was a professor of computer science at the University of Liverpool (from 1988 to 1995). His team developed the Many Using and Creating Hypermedia System in the early 1990s that was used for online education. He came to the University of Maryland, Baltimore County in 1999 as the founding director of the online master’s degree in information systems. His research has focused on information systems applications to education and to healthcare. He is co-editor of the journal *Interactive Learning Environments.*

**Terry Ryan** is an associate professor in the School of Information Systems and Technology at Claremont Graduate University. His teaching and research interests are in the design, development, and evaluation of information systems to support teaching and learning, online discussions and dialogues, and preparing for and responding to emergencies.

**Gloria Vollmers** is the associate dean of the College of Business Public Policy and Health and an associate professor of accounting at The Maine Business School. She earned her PhD in accounting from the University of North Texas (1994) and a Master of Administrative Science from the University of Texas at Dallas (1985). Her undergraduate career was spent at Brown University, graduating with a BA (1973). She has been at the University of Maine since 1992. Her research area is accounting history, particularly cost accounting. She has published articles in the *International*
Journal of Web-Based Learning and Teaching Technologies, Accounting History, and Accounting, Business and Financial History.

Yingqin Zhong is currently a PhD candidate in the Department of Information Systems, School of Computing at the National University of Singapore. She received a Bachelor of Computing (Honors) (June 2003) and an MSc in MIS in 2005 from the National University of Singapore. Her primary research interests include cultural issues in e-collaboration, IT and education, and adoption of collaborative learning technology.
