About the Contributors

**Saqib Saeed** is an assistant professor at University of Dammam, Saudi Arabia. He has a PhD in Information Systems from the University of Siegen, Germany, and a Master’s degree in Software Technology from Stuttgart University of Applied Sciences, Germany. Dr. Saeed is also a certified software quality engineer from the American Society for Quality. He is a member of advisory boards of several international journals besides being guest editor of several special issues. Dr. Saeed’s research interests lie in the areas of human-centered computing, computer supported cooperative work, empirical software engineering, and ICT4D, and he has more than 50 publications to his credit.

**Imran Sarwar Bajwa** is an Assistant Professor of Computer Science at The Islamia University of Bahawalpur, Pakistan. He has worked on various research projects in University of Birmingham, UK (2009-2012) and University of Coimbra, Portugal (2006-2007). His research interests are Natural Language Processing, Automated Software Modelling, Enterprise Computing, and Image Processing.

**Zaigham Mahmood** is a researcher and author. He has an MSc in Mathematics, MSc in Computer Science, and PhD in Modelling of Phase Equilibria. Dr. Mahmood is a Senior Technology Consultant at Debesis Education UK, a researcher at the University of Derby UK, and Professor Extraordinaire at the North West University in South Africa. He is, currently, also a Foreign Professor at NUST and IIU in Islamabad Pakistan. Professor Mahmood has published over 100 articles in international journals and conference proceedings in addition to seven books on cloud computing and reference texts on e-government. He is also the Editor-in-Chief of the *Journal of E-Government Studies and Best Practices* and Series Editor-in-Chief of the IGI book series on *Advances in Electronic Government, Digital Divide, and Regional Development (AEGDDRD)*. Professor Mahmood is an active researcher; he also serves as editorial board member of several journals, books, and conferences; guest editor for journal special issues; organiser and chair of conference tracks and workshops; and keynote speaker at conferences.

* * *

**Jens Alfredson** is since 2006 and in an earlier period from 1996-2001, employed by Saab, developing and evaluating novel presentations for fighter aircraft displays. He received a MSc in Industrial Ergonomics from Luleå University of Technology in 1995. He received a PhD in Human-Machine Interaction from Linköping University of Technology in 2007. Since 1999, he is certificated as an Authorized European Ergonomist, EurErg (CREE). He has previously (2001-2006) worked as a researcher at the department of Man-System-Interaction, Swedish Defense Research Agency.
José Joaquim Alvarelhão is Assistant of the Health Sciences School of the University of Aveiro. He received his BSc degree in Occupational Therapy in 1989, and his MSc degree in Public Health in 2010 from the University of Porto. He is currently member of the Direction Board of the Health Sciences School of the University of Aveiro. He also is member of the Executive committee of the International Cerebral Palsy Society and the Head of the Scientific Council of the Cerebral Palsy Portuguese Federation. His current research interests include human functionality, ambient assisted living services and disability issues. He has been involved in various European and national funded research projects, has more than twenty research publications distributed by books, book chapters, journals and proceedings of international conferences.

Muhammad Ahmad Amin has, for a very long time, worked as a Team Lead in the department of Software Development in both the public & private sector, and still is affiliated currently with various projects of public sector in Pakistan. He received his MCS degree from University of Arid Agriculture, Rawalpindi, Pakistan, in 2001 and MS in Software Engineering from Bahria University, Islamabad, Pakistan, in 2014. His current research interests are usability evaluation of open-source e-Learning and m-Learning systems.

Thiago Schumacher Barcelos earned his degree in Computer Science at Universidade de São Paulo (1999). He has a Master’s degree in Computer Science (Area: Human-Computer Interaction) also by Universidade de São Paulo (2002). Thiago is currently a PhD candidate at Universidade Cruzeiro do Sul in the area of Science and Mathematics Teaching. He is also a researcher and lecturer at Instituto Federal de Educação, Ciência e Tecnologia de São Paulo. His current research areas are: ICT for Education, Human-Computer Interaction and Software Engineering.

Noel Carroll works in the field of Knowledge Management at the University of Limerick, Ireland. He previously worked as a postdoctoral researcher at Dublin City University in Cloud Computing. Noels research is currently focused on developing service analytics and methods, which support the assessment of service ecosystems. He completed his PhD at Lero – the Irish Software Engineering Research Centre, University of Limerick, which focuses on the emerging discipline of Service Science. His research explores methods to examine the socio-technical dynamics of complex service systems. The research examines Service Science initiatives and identifies methods to investigate the value of IT across service networks. He is particularly interested in applying social network analysis and actor-network theory to examine the socio-technical influence of IT on service dynamics. He also holds a Master’s (research) in Business and a Degree (Hons) in Information Systems Management. His research activities cover a wide scope from Service Science, Software Engineering, Cloud Computing, and Education.

Zulaima Chiquín born in Venezuela, she studied for her BCompSc degree at the Central University of Venezuela (2002), she studied her degree from Antonio José of Sucre University in Attitudes facilitative of the teacher (2007). She obtained her MSc degree from “Simon Bolivar” University in Systems Engineering (2013). During these studies, she worked as a teaching at the University of Simón Bolívar on the Computer Engineering. She has served as teachers in the Antonio Jose de Sucre university of the vicerectorate Luis Caballero Mejias (2006-2009). Since 2008 she has been carrying out research in the fields of e-learning, Free/Libre Open Source software and software quality.
Laura B. Dahl is a doctoral candidate in Communication at the University of Utah. Her primary research and teaching focus has involved communication behaviors among and between design and development teams for Websites and software. She worked for 15 years in the Web development industry as a developer and database manager. Her research interests continue to grow into studying the communication aspects of design teams that either promote or discourage successful completion of software and Web projects.

Nelson Pacheco da Rocha is Full Professor of the University of Aveiro. He received his BSc degree in Electronics and Telecommunications Engineering in 1983 and his PhD in Electronics Engineering in 1992, from the University of Aveiro. He was the Head of Health Sciences School (2001-2011) and Pro-Rector of the University of Aveiro (2005-2010). Since 2001, he is the Head of the Health Sciences Department of the University of Aveiro. His current research interests include the application of information and communications technologies to healthcare and social services, the secondary use of electronic health records, and the interconnection of human functionality and ambient assisted living services. He has been involved in various European and national funded research projects, has supervised several PhD and MSc students and has a patent and more than one hundred research publications distributed by books, book chapters, international journals and proceedings of international conferences.

Margarida de Melo Cerqueira is Adjunct Professor in Health Sciences School of the University of Aveiro. She received her BSc degree in Educational Sciences in 1999, from University of Coimbra, and her MSc degree in Information Management in 2003 and his PhD in Health Sciences in 2010, from the University of Aveiro. Her current research interests includes social and educational gerontology, active ageing, the application of information and communications technologies to healthcare and social services, and the interconnection of human functionality and ambient assisted living services. She has some research publications distributed by books, international journals and proceedings of international conferences.

Kenyer Domínguez is a Integral Time Professor at Simón Bolívar University, Venezuela. He obtained his degree from Simón Bolívar University in Computer Engineering (2002) and he completed his MSc degree from Simón Bolívar University in System Engineering (2006). Since 2002, he has been carrying out research in the fields of Information Systems, Free/Libre Open Source software, and software quality.

Amir Hossein Ghapanchi is a tenured faculty member at the School of Information and Communication Technology, Griffith University, Australia. Dr Ghapanchi is a section editor for Australasian Journal of Information System, and an associate editor for International Journal of Enterprise Information Systems and International Journal of Strategic Decision Sciences. Amir has published over 50 referred publications including 40 journal articles in prestigious information systems and management journals such as Information and Organization, Journal of the Association for Information Science and Technology (JASIST), Electronic Markets, Journal of Medical Internet Research, Journal of Computer and System Sciences, International Journal of Project Management, Journal of Systems and Software, and International Journal of Information Management. Amir has been in receipt of several internal/external research and L&T grants.
**Rosario Girardi** earned her PhD (Computer Science) from University of Geneva, Switzerland in 1996 and her Master’s of Computer Science from UFRGS, Brazil in 1991. She served as Engineer (Computer Science) at UdelaR, Uruguay in 1982 and as Lawyer at OAB, Brazil in 2012. She is an Associate Professor (Computer Science Department) at Federal University of Maranhão. She acts as lecturer, researcher, and advisor on the Graduate course in Electric Engineering (Computer Science area) and on the Undergraduate course in Computer Science. Her specialization areas are: Artificial Intelligence, Legal Computing, Software Engineering, and Information Engineering. Since 2001, she coordinates research projects with support of the CNPq and CAPES federal funding agencies and receives a CNPq research productivity grant since 2008. Dr. Girardi has orientated more than 100 final degree, research works, and teaching apprenticeships at the graduate and undergraduate level. She has produced more than 100 publications in books, book chapters, journals, and proceedings of events related with her research activities. She has been participating as member of program committees, lecturer and moderator in several national and international events related with her specialties. More information can be found at http://buscatextual.cnpq.br/buscatextual/visualizacv.do?id=K4707610E5.

**Pankaj Kamthan** has degrees in mathematics, mathematics education, and computer science. His teaching and research interests include agile methodologies, conceptual modeling, requirements engineering, software engineering education, and software quality. He has been teaching in academia and industry for the past two decades. He has taught over 20 courses in undergraduate and graduate programs and is an avid user of information technology in his courses. He has been a technical editor, participated in standards development, and served on program committees of conferences and editorial boards of journals related to e-learning, information technology, and resource management. He has authored over 75 scholarly publications.

**Narayanan Kulathuramaiyer** is senior research fellow of the Institute of Social Informatics and Technological Innovations and currently a Professor of Computer Science at the Faculty of Computer Science and Information Technology, Universiti Malaysia Sarawak (UNIMAS).

**Adriana Leite** earned her Master’s of Electric Engineering (Computer Science area) from Federal University of Maranhão, UFMA, Brazil in 2009, her Especialist in Systems Analysis and Design from the Federal University of Maranhão in 2006, and her Undergraduate in Computer Technology from University Center of Maranhão in 2004. She has experience in Computer Science, focusing on Software Engineering, acting on the following subjects: Agent Architectures, Software Reuse, Domain Engineering, Application Engineering and Ontologies. More information can be found at http://lattes.cnpq.br/6606037022631240.

**Ana Isabel Martins** is a researcher at the Institute of Electronics and Telematics Engineering of Aveiro. She received her BSc degree in Gerontology in 2009 at the Health Sciences School of University of Aveiro and her MSc degree in Gerontology at the Health Sciences Department of the University of Aveiro in 2010. Currently, she is a PhD student in Health Sciences and Technology in the same department. She has been researching in the areas of use and commercialization of assistive products,
assessment of human functioning and environmental factors using the International Classification of Functioning Disability and Health, and more recently, the evaluation of Ambient Assisted Living products and services in a Living Lab approach.

**Sergio Ricardo Mazini** obtained his bachelor degree in Information Systems (FATEB, 1996), postgraduate in Analysis, Development, and Project Management Systems (UNILINS, 2000), and he is master in Production Engineering (São Paulo State University – UNESP, 2011). He acts as Professor of Business Administration and Information Systems courses. He acts, also, as a consultant and systems analyst at Orion Management Solutions. He has experience in business consulting, business management, production engineering, development of information systems, innovation management, knowledge management, and enterprise portals.

**Edumilis Méndez** is a Associate Lecturer at Simón Bolívar University, Venezuela. She’s Systems Engineer (1999) and obtained her MSc degree from Simón Bolívar University in System Engineering (2004). Since 2003, she has been carrying out research in the fields of software project management, software development methodologies, software testing, and software quality.

**Luis E. Mendoza** is a Titular Lecturer at Simón Bolívar University, Venezuela. He completed his MSc degree from Simón Bolívar University in System Engineering (2000) and his PhD degree from University of Granada, Spain, in Advanced Methods and Techniques for Software Development (2011). Since 1999, he has been carrying out research in the fields of business process modeling and verification, systems integration, software development methodologies, and software quality.

**Alexandra Queirós** is Coordinator Professor of the Health Sciences School of the University of Aveiro. She received her BSc degree in Information and Communication Technologies in 1998, her MSc degree in Information Management in 2001, and her PhD in Health Technologies in 2006 from the University of Aveiro. She is currently member of the Scientific Council of the University of Aveiro. Her current research interests include human functionality, ambient assisted living services, and the application of information and communications technologies to healthcare and social care services. She has been involved in various European and national funded research projects, has supervised several MSc students, and has more than 40 research publications distributed by books, book chapters, journals, and proceedings of international conferences.

**Anabela Gonçalves Silva** is Assistant Professor at the Health School, Aveiro University. She received her BSc degree in Physiotherapy in 1999 and took her PhD at the Center for Pain Research in 2009 at Leeds Metropolitan University. She worked as a physiotherapist at several clinics and rehabilitation centers and lectures at Aveiro’s University since 2001. Her current research interests include human functioning and disability and how they are affected by pain and environmental factors, methodologies of assessment related to pain and function, the interconnection of human functioning and ambient assisted living services and neck pain. She had a PhD scholarship from the Foundation of Science and Technology, has supervised several MSc students, and has several publications in International journals and conference proceedings.
About the Contributors

Ismar Frango Silveira earned his degree in Mathematics-Informatics at Universidade Federal de Juiz de Fora (1994), Master of Science (Area: Computer Graphics) by the Instituto Tecnológico de Aeronáutica (1997), and his PhD in Electrical Engineering by Universidade de São Paulo (2003). He is currently Professor at Universidade Presbiteriana Mackenzie and Universidade Cruzeiro do Sul, both in São Paulo, Brazil. His research concentrates on Digital Games, Learning Objects, Collaborative Virtual Environments, and ICT for Education in general.

Roberto Muñoz Soto earned his degree in Informatics Engineering at Universidad de Valparaíso (UV), Chile. He has a Master’s degree in Informatics Engineering (Area: Human-Computer Interaction) by the Pontificia Universidad Catolica de Valparaíso, Chile (2012). He is currently a full-time professor at Universidad de Valparaíso, and his research concentrates on Human-Computer Interaction and ICT for Education.

Shefali Virkar is postdoctoral researcher at the University of Oxford (UK) currently reading for a DPhil in Politics. Her doctoral research seeks to explore the growing use of Information and Communication Technologies (ICTs) to promote better governance in the developing world, with special focus on the political and institutional impacts of ICTs on local public administration reform in India. Shefali holds an MA in Globalisation, Governance, and Development from the University of Warwick, UK. Her Master’s thesis analysed the concept of the Digital Divide in a globalising world, its impact developing countries, and the ensuing policy implications. At Oxford, Shefali is a member of Keble College.

Alvin W. Yeo is the Director of the Institute of Social Informatics and Technological Innovations and an Associate Professor at the Faculty of Computer Science and Information Technology Innovations, Universiti Malaysia Sarawak (UNIMAS).

Tariq Zaman earned his PhD from the Faculty of Computer Science and Information Technology, Univeristi Malaysia Sarawak, Malaysia and currently works as postdoctoral research fellow in the Institute of Social Informatics and Technological Innovations Universiti Malaysia Sarawak (UNIMAS).
