Frédéric Adam is Professor in Business Information Systems and Head of the Graduate School of the College of Business and Law at University College Cork in Ireland. He holds Doctorates from the National University of Ireland and Université Paris VI (France). His research interests are in decision-making and decision support and in ERP. He has over 25 journal papers published in international journals including Information and Management, the Journal of Strategic Information Systems, Decision Support Systems, and the Journal of Information Technology. He is the Editor-in-Chief of the Journal of Decision Systems and the Chair of the Working Group 8.3 on DSS of the International Federation for Information processing (IFIP).

Ameen Kamel Alazzam is a lecturer of Information System at Technical College in Tai’f. He obtained his Master’s degree in Management Information Systems from Yarmouk University, Jordan (2012), and his bachelor degree in Management Information Systems from Al- Balqa’ Applied University, Jordan (2006). Ameen has research interest in e-government topics like trust, security issues, and adoption of e-government. In addition, he works on research projects in e-marketing and E-CRM and knowledge management systems.

Li-Minn Ang received his PhD and Bachelor degrees from Edith Cowan University, Australia, in 2001 and 1996, respectively. He is currently an Associate Professor at the University of Nottingham Malaysia Campus. His research interests are in the fields of visual information processing, intelligent processing techniques, hardware architectures, reconfigurable computing, and engineering education. He has authored or coauthored a number of journal and conference papers in these areas. Currently, he...
About the Contributors

leads the research activities at the Visual Information Engineering Research Group at the University of Nottingham Malaysia Campus. He has received research grants from the Malaysian government and industry for his research activities and has served as a reviewer and committee member for a number of journals and conferences. Dr. Ang is a Senior Member of the IEEE and a Fellow of the Higher Education Academy (UK).

Barbara Aquilani is Associate Professor of Management at the Department of Economics and Management (DEIM) of ‘Tuscia’ University of Viterbo (Italy) where she held the courses of Management and International Marketing. She worked as Assistant Professor at the Siena University from 2005 to 2009, Communication Department, Faculty of Letter and Philosophy, where she held the courses of Marketing and Marketing Communication. She has been involved, as presenter, in several national and international conferences and in several national/international research projects, as member or scientific coordinator. Her research interests refer to: (1) firm management and especially on firm growth (on which she published a book) and corporate governance; (2) marketing (among others she published papers on university marketing and online marketing); (3) innovation and open innovation.

Anteneh Ayanso is an Associate Professor of Information Systems at Brock University. He received his PhD in Information Systems from the University of Connecticut. His research interests are in data management, business analytics, electronic commerce, and electronic government. He has published many articles in leading journals such as European Journal of Operational Research, Decision Sciences, Decision Support Systems, Journal of Database Management, Communications of the AIS, International Journal of Electronic Commerce, Journal of Computer Information Systems, Government Information Quarterly, AIS Transactions on Human-Computer Interaction, Information Technology for Development, and in Proceedings of major international conferences in information systems and related fields. Dr. Ayanso’s research in data management and business analytics focuses on efficient search and retrieval methods for customer-centric exploratory database queries in application domains such as product recommendation and business intelligence systems. This research has been funded by a Discovery Research Grant by the Natural Sciences and Engineering Research Council (NSERC) of Canada. His research in the electronic commerce and electronic government involves several colleagues at Brock University as well as researchers in the USA, and primarily investigates Web-based technologies and functionalities and their impacts on business performance. His current related studies include topics such as search engine advertising, the role of social media technologies and applications in the commercial as well as public sector, and methods for profiling and measuring ICT positions and e-government readiness of world nations. He has edited a book on social media and Web analytics, published by IGI Global, and he also contributed many book chapters to other titles. He currently serves as an editorial review board member of the Journal of Database Management, International Journal of Convergence Computing, and International Journal of Electronic Commerce, and regularly reviews articles for many leading journals in information systems and related fields.

Martin Bastek holds a BSc from the Technical University of Munich and a MCom from the University of Auckland. His current research and work interests include IS services, requirements engineering, and project management. Martin is working as business architect for a large insurance company in Germany. Prior to this, he worked as information manager for a leading utilities company and as consultant for a Big Four professional services firm.
Richard Brunet-Thornton, FRSA, MIM, MBA, PhD, holds two full-time positions in both Montréal (Canada) and Prague (Czech Republic). As an assistant professor at VŠE, his expertise encompasses Cross-Cultural Management and Communications, Knowledge Management, Project Management, and Academic Writing. His area of specialty is the Czech Republic. In addition, he is a native speaker of both French and English. He has published numerous articles in various scholarly journals and textbooks as well as holding various editorial positions in numerous journals. On the application side, he is responsible for an international business practice with the fifth largest global IS/IT consultancy. In this field, his expertise is in telephony. During his many years of business tenure, Dr. Brunet-Thornton has worked on every continent within the telecommunications domain.

Vladimír Bureš was born in Jaroměř, Czech Republic on 4th August 1977. He earned his bachelor degree in Financial Management (1999), Master’s degree in Information Management (2001), and PhD in Information and Knowledge Management (2005) at the University of Hradec Králové, Czech Republic. He has already published five books (as author or a member of the authoring team) and dozens of scientific papers published at several journals or in conference proceedings. He has attended both international and national research projects (e.g. 6th or 7th European Framework Program projects). In his research, he focuses on knowledge management, systems theory, and application of ICT in areas such as education or business administration. Associate Professor Bureš is a member of program committees and editorial boards of several scientific conferences and journals, respectively.

Hira Cho is an Associate Professor in the Department of Family and Consumer Sciences at California State University, Northridge. She has earned a PhD in Merchandising from Florida State University. Her research area lies in apparel customization, e-retailing, cross cultural consumer behavior, and international retailing. She has been published in International Journal of Market Research, Journal of Consumer Marketing, International Journal of Retail and Distribution Management, Journal of Retailing and Consumer Services, and Journal of the Korea Society of Clothing and Textile. Her teaching expertise includes Fashion Merchandising, Fashion Industry, Fashion Promotion and Visual Merchandising, and Textiles and Apparel in the Global Economy.

Barry J. Davies is Professor Emeritus of Marketing in the University of Gloucestershire. Previously Associate Dean, Faculty of Business, Education and Professional Studies for the same institution, he was formerly MFI Professor of Retail Marketing at Manchester Metropolitan University. Prior to becoming an academic, he worked in department and chain store management. His research centres on service environments, interactions within them, and decision-making. Topics include service quality measurement and management; dramaturgy and interaction in service environments; olfaction and ambient odour; visual design in retail; HCI in decision-making for retailing. He has published widely in the marketing, decision-making and retailing literatures. He serves on the editorial boards of EuroMed Journal of Business, International Journal of Management and Decision Making, International Journal of Management Cases, Journal of Services Marketing, and Service Business: An International Journal. He received his formal business education at the universities of Bolton, Central Lancashire, Lancaster, and Cranfield.

Lesley Gardner is a Senior Lecturer in Information Systems in the Department of ISOM in the Faculty of Business and Economics at the University of Auckland. Her research interest cover areas relating to the Internet mediated commerce, social, technical, and governance applications of ICT. Through the
study of gendered ICT, education and career issue of technology supported social inclusion are also studied. Through modelling multimedia heritage, data sources to facilitate decision support for planning and governance of heritage sites are enabled. She is a director of the research unit HISTRU and a member of the research unit Technology and Social Inclusion (TSI).

**Stephen Glavin** is a mathematical modeller working in Unilever’s Safety and Environmental Assurance Centre. He holds a PhD in mathematical modelling from University College London. His research interests lie in applying mathematical modelling and in particular multiscale modelling techniques to biological systems as well as in vitro to in vivo extrapolation for use in alternatives to animal testing. He also has prior experience in consumer modelling for prediction of consumer choice.

**Kevin Hapeshi**, head of The School of Computing and Technology at The University of Gloucestershire, has many years experience of working in a multidisciplinary environment combining human psychology with computer technology to research design and develop products that are well designed and enhance the user experience. He has worked at a number of UK Universities researching and lecturing in human factors engineering, cognitive ergonomics, research methods, human-computer interaction, multimedia and web design and mobile applications development.

**Ciara Heavin** is a College Lecturer in Business Information Systems at University College Cork, Ireland. She also holds a BSc and MSc in Information Systems from UCC. Her main research interests include the development of the ICT industry, primarily focusing on Ireland’s software industry and knowledge management in software SMEs. She is the Managing Editor of the Journal of Decision Systems since 2011.

**Abu Baker Hussain** is associate professor at the College of Business Administration, department of economics and finance, Taibah University, KSA. Before joining CBA in 2010, he was a senior lecturer at Sohar University, Oman, where he served as an acting dean for two years. He taught several courses in the fields of Economics, Strategic, and Knowledge Management, and SME courses. In additions, he supervised many graduate and postgraduates’ projects. He has consulted for various companies and institutions around the world, including Aluminum Smelter in Oman, State governments in the Eastern region Sudan. Hussain’s research interests encompass principally the interference between development finance and local socioeconomic institutions including SMEs and Zakat institutions. He published many articles in the fields of microfinance, economics of Zakat, knowledge management and local economic development institutions. Dr. Hussain is currently a member of many microfinance organizations and networks.

**Geoffrey Jalleh** is Associate Professor in the Faculty of Health Sciences at Curtin University. His primary research interests are in health communication and social marketing.

**Rawan Tayseer Khasawneh** is a full time lecturer in the department of Computer Information Systems at Jordan University of Science and Technology. She obtained her master degree in Management Information Systems from Yarmouk University in Jordan (2013), and her bachelor degree in Management Information Systems from Yarmouk University in Jordan (2011). Khasawneh’s research interests include e-government, social media and sentiment analysis, e-marketing and E-CRM, knowledge management systems, and group decision support systems.
Jose Carlos Korelo is Assistant Professor of Marketing at the Federal University of Parana, School of Business, since 2013. He was a PhD visiting scholar at Sauder School of Business, The University of British Columbia, Canada, in 2012. He is member of the research group in Consumer Behavior and Marketing Relationship Strategies and teaches Relationship Marketing in Masters Program at the Federal University of Parana. His research areas of interest are consumer affective responses, consumer goals, consumer decision-making, and transgressions in consumer-brand relationship.

Chad Lin is a Senior Research Fellow of the Centre for Behavioural Research in Cancer Control at Curtin University, Australia. Dr Lin has conducted extensive research in the areas of e-commerce, e-health, health communication, health informatics, IS/IT investment evaluation and benefits realization, IS/IT outsourcing, IT adoption and diffusion, RFID, social marketing, strategic alliance in healthcare, and virtual teams. He has authored more than 100 internationally refereed journal articles (e.g. Decision Support Systems, European Journal of Information Systems, Information and Management, International Journal of Electronic Commerce, European Journal of Marketing, Technovation, Medical Journal of Australia, and ANZ Journal of Public Health), book chapters, and conference papers in the last five years. He has served as an associate editor or a member of editorial review board for 8 international journals and as a reviewer for 15 other international journals. His research has guided the development (formative research), implementation and evaluation (impact and outcome research) of numerous public health campaigns and programs in a broad variety of health areas including tobacco control, mental health, nutrition, physical activity, substance use, cancer screening, and health informatics. He and his colleagues’ research for the Cancer Council WA has demonstrated support for strengthening of tobacco control policy and legislation including the Tobacco Products Control Amendment Bill, and highlighted areas for further attention.

Sandra Maria Correia Loureiro is Professor of Marketing at the Instituto Universitário de Lisboa ISCTE-IUL and a researcher in the Business Research Unit (BRU/UNIDE) and SOCIUS Research Centers. Her current research interests include consumer-brand relationships, online purchase behaviors, tourism marketing, and corporate social responsibility issues. Her papers have been published in a variety of peer-reviewed journals that include International Journal of Hospitality Management, Journal of Travel and Tourism Marketing, Journal of Service Management, Journal of Cleaner Production, and Journal of Brand Management. Her work has also been presented at respected international conferences such as EMAC, ANZMAC, and KAMS-GMC. Sandra serves as a reviewer for several international journals and conferences and has participated in several research projects funded by the EU and FCT (Foundation for Science and Technology). She recently won the 2012 Best Paper Premier Award presented by the Global Marketing Conference (comprised of EMAC, ANZMAC, KSMS, and the Japanese Association of Marketing).

Danielle Lucena da Silva is Assistant Professor of Marketing at the Federal University of Parana, School of Business, since 2011. She was a visiting researcher at the PhD Program in Business at the Concordia University in Montreal, Canada, between 2009 and 2010. She is member of the group research in Consumer Behavior and Marketing Relationship Strategies at the Federal University of Parana. She teaches Consumer Behavior at the Master Program and Consumer Judgment and Decision Making at the PhD Program. Her research interests are in the area of consumer goals, self-regulation, consumer decision-making, and transgressions in consumer-company relationship.
Petra Marešová, PhD (Principal investigator of the project), has been a member of the Department of Economics at the Faculty of Informatics and Management since 2006 when she finished Faculty of Economics and Management, Czech University of Life Sciences Prague and the Pedagogical Faculty, University of Hradec Kralove. In her thesis “The Evaluation of the Benefits of Knowledge Management in Czech Companies,” she focuses on efficiency benefits of adopting knowledge management with an emphasis on the method of Cost Benefit Analysis (CBA). As a lecturer, she teaches Microeconomics, Macroeconomics, Business Economy, Introduction to Economics, and Public Finance. Her work is focused on the expression of qualitative benefits in various fields (IT projects, knowledge management).

Pier Massa is a Director of Pilot Lite Ventures, a global Venture Management firm and Managing Partner and co-founder of M2 - Business Frameworks, an independent international consulting firm specialising in organisation transformation. He also serves as Chairman of ABC-NEXUS with EuroMed Business Research Institute. His corporate experience includes executive roles at Virgin in the US, CIBC, S.C. Johnson, and MolsonCoors in Canada, as well as consulting roles with The Boston Consulting Group. Pier’s experience is multi-disciplinary and he has led enterprise-wide change initiatives in large and mid-sized organisations in Europe, North America, and the Middle East, with a focus on complex service businesses, such as financial services, health care and hospitality. Pier also has extensive experience in consumer goods. Pier graduated with honours from the University of Toronto and received his MBA from the Rotman School of Management in Canada.

António C. Moreira obtained a Bachelor’s degree in Electrical Engineering and a Master’s degree in Management, both from the University of Porto, Portugal. He received his PhD in Management from UMIST-University of Manchester Institute of Science and Technology, England. He has a solid international background in industry leveraged working for a multinational company in Germany as well as in Portugal. He has also been involved in consultancy projects and in research activities. He is an Assistant Professor at the Department of Economics Management and Industrial Engineering, University of Aveiro, Portugal, where he headed the Bachelor and Master Degrees in Management for five years.

Paulo Prado has a PhD in Marketing - Management at São Paulo Business School - Fundacao Getulio Vargas - Brazil. Electronic Engineer at UNICAMP-Brazil. Associate Professor of Marketing at Federal University of Parana - Brazil. His research interests focus on Consumer Motivation and Goals, and Consumer-Brand Relationship.

Nelson Oly Ndubisi is internationally recognised for his expertise in the fields of Marketing and Entrepreneurship. His professional experience includes among others, Chair Professor of Marketing and Chair Professor of Entrepreneurship in Australian, Asian, African, Saudi Arabian, and UK universities. His research has appeared in top quality Marketing and Entrepreneurship/Small Business Journals. He has won numerous teaching and research awards locally and internationally, and sits on the editorial board of several journals. He is listed in Marquis Who’s Who in the World since 2007.

Chien Shing Ooi received the Bachelor (First Class Honours) degree from the Faculty of Engineering, The University of Nottingham (Malaysia Campus), Malaysia, in 2011. He is currently a researcher and postgraduate student of the Department of Computer Science and Networked Systems in Sunway
University, Malaysia. He is also one of the members of Intelligent and Visual (IVC) Research Group in Sunway University. He has a background of both electronic engineering and computer science. His research interests include the fields of intelligent visual and audio processing, affective computing, and business intelligence. He has a number of journals and conference papers published in these related areas.

Tereza Otčenášková is a PhD candidate at the Faculty of Informatics and Management at the University of Hradec Králové, Czech Republic, where she received Master’s Degree in Information Management. She received BA Diploma at the University of Hull, United Kingdom. Alongside with her studies, she participates in various research projects and leads tutorials and seminars. Among others, she cooperated as a researcher with the Faculty of Military Health Sciences, University of Defence, and worked as an ICT specialist in particular educational projects. Her main research fields comprise knowledge management and knowledge intensity. Moreover, her areas of interest include decision-making, decision-support systems, and ambient intelligence.

Mohammad Fateh Ali Khan Panni is an Assistant Professor in the School of Business at City University, Bangladesh. He has an MPhil degree (by research) in the area of marketing from Multimedia University, Malaysia. He has published many research articles in the area of consumerism, CRM, CKM, brand loyalty, online shopping behavior, Internet banking green consumer behavior index, and educational marketing, etc. in numerous international journals like JLERI, IJEBP, IJECRM, WJBAM, JIKM, JITEM, Amfiteatru Economic. Currently, he is a research committee member of three different research interest committees such as marketing, ethics and social responsibility and green economy consortium of Euromed Research Business Institute (EMRBI). He is also regularly involved as a track chair of Annual Euromed Conferences. He regularly reviews paper for different international refereed journals and has already served as a reviewer in AJBM, AJAR, WREMSD, IJEBr, AJMM, JIKM, etc. He has co-edited two reference books-one on customer centric marketing strategies and the other on consumerism (IGI Global). He is an editorial team member of African Journal of Marketing Management (AJMM) (Academic Journal series) and a listed reviewer of Journal of Information and Knowledge Management (JIKM) (World Scientific Publication).

Robert Pennington, PhD (University of Wisconsin, 1991), is Emeritus Professor of Communication at Fo Guang University, Taiwan. He has held faculty positions at several universities in the USA and Taiwan in departments of communication, management, and foreign languages and cultures. He specializes in the cultural development implications of communication technology. His general interest concerns consumption and marketing communication as cultural processes for satisfying basic human needs. He has written previously about marketing communication development, advertising and brands within consumer culture, the meanings of consumer brands and psycho-linguistic methodology. His research extensively explicates a theory of culture as a system of symbolic forms. The methodology selects influential literature from a range of disciplines to form a synthesis of various perspectives.

José Luis Pineda has been a contributor to newspapers in Mexico as a reporter, columnist, and cartoonist. In mass media, he has produced and hosted promotional programs for institutions of higher education. He has taught courses and seminars on Advertising and Marketing Communications. He is currently an Associate Professor and Director of the Bachelor in Advertising and Marketing Communications. He
holds a Doctorate in Audiovisual Communication and Advertising from the Autonomous University of Barcelona. His research interests focus on the consumption and domestication of communication technologies, both in the private life and in the workplace. Among his studies are the domestication of digital television in Mexican homes, as well as the use of digital technologies in knowledge transfer in organizations.

**Alessandro Ruggieri** is Full Professor of Commodity Science at the Department of Economics and Management (DEIM) of University ‘Tuscia’ in Viterbo (Italy) where he holds the courses of Technology, Innovation and Quality, Quality Management and Certification, and Quality Management Techniques. From 21st July 2011 to date, he is the Director of the Department of Economics and Management (DEIM) at the University of Tuscia. His research has developed mainly under the following guidelines: (1) Quality of goods, products, and services: Studies and research on the quality according to the approaches of “Total Quality Management” and “Quality Certification” by “ISO 9000” standards; (2) The relationship between quality and consumer, with particular reference to customer satisfaction; (3) Quality and innovation in the agro-food industry; (4) Environmental issues, with particular reference to management and environmental certification; (5) Innovation and technology transfer, with particular attention to the role of innovation for regional development.

**Kah Phooi Seng** received the BEng (1st class) and PhD from University of Tasmania, Australia, in 1997 and 2001, respectively. She is currently an Adjunct Professor at School of Engineering, Edith Cowan University. She is also an adjunct professor at Faculty of Science and Technology, Sunway University. She was a Professor at Sunway University before returning to Australia. Prior to joining Sunway University, she was Associate Professor at School of Electrical and Electronic Engineering, Nottingham University. Her research interests include the fields of visual processing, multi-biometrics, artificial intelligence, and wireless visual sensor networks.

**Abhijit Sengupta** is based in Essex Business School at the University of Essex. His research interests lie in studying markets and market dynamics, organizational behaviour, behaviour within large complex systems and social networks, interactions within social groups and group dynamics. He uses multiple quantitative and computational methodologies in his research, such as agent-based modelling, applied game theory, econometrics, and is interested in interdisciplinary research. He has extensive experience of working in private sector R&D with close connections to marketing and product development. Prior to joining University of Essex, he worked as a Senior Scientist within Unilever R&D, UK. He has a PhD in Economics from Stony Brook University in New York.

**Elsa Serpico** is enrolled for the third year of the PhD in “Economics and local development” at the University of Tuscia, Viterbo (Italy). She graduated in 2009 from the University of Tuscia with a Bachelor’s Degree in Economics and Management. In 2010 she obtained her Master’s Degree in Marketing and Quality Management from the University of Tuscia with a thesis titled “Quality Standards in the Agri-Food Sector: The Case of C.I.L.C.A. Srl,” with the final degree mark 110 (out of 110) cum laude. Her research interests include quality management systems in the public sector, quality in the agro-food sector, innovation and online marketing and communication.
Rocco Servidio is an assistant professor in Psychology at the Department of Languages and Education Sciences, University of Calabria (Cosenza, Italy). His current research interests are on the Media Psychology, Human-Computer Interaction (HCI), and cognitive approach to consumer behaviour. More specifically, he currently works on to explore the social and cognitive impact of media technologies promoting a positive use. The HCI research methods are applied to examine the interaction between final user and system interface. Media psychology and HCI look at the whole system; there is a continual loop including developer, content producer, and user perception and evaluation. Finally, he is interested to investigate the cognitive approach to consumer behaviour and in particular the affective aspects that influence the tourist destination image formation.

Siti Haryati Shaikh Ali is Associate Professor and Head of Academic Studies at Universiti Teknologi MARA (Terengganu), Malaysia. She received her PhD from Nottingham University, Malaysia Campus. She is currently involved with numerous projects with the State government of Terengganu, Malaysia, responsible to motivate, educate, and thus, uplift the standard of living of people in rural areas. Apart from that, research and writing has always been her passion as evident in many academic journals and international conferences. Her research interests are in entrepreneurship and marketing, focusing on relational, hospitality, and humanistic values.

Cecilia Silvestri is Researcher of Commodity Science at the Department of Economics and Management (DEIM) at the University of Tuscia, Viterbo (Italy), where she held the course Quality and Customer Relationships. She had her PhD in 2011 in “Economics and Local Development” at the University of Tuscia. Consistent with carried out studies, her research has developed along the following guidelines: (1) Quality of goods, products, and services: Studies and research on the quality according to the approaches of “Total Quality Management” and standards “ISO 9000,” (2) The relationship between quality and consumers, with particular reference to satisfaction and loyalty, (3) Quality and innovation in the agro-food, (4) Innovation and technology transfer, with particular attention to the role of technological innovation for territorial development.

Bryan Soh Yuen Liew is an online entrepreneur who has been doing business in Web hosting and website development industry since 2005. He attained his Master’s in Business Administration from Universiti Sains Malaysia (USM) in 2006 and is currently working as an IT lecturer at Han Chiang College, Penang. He teaches mainly courses in computer security and system analysis and design. In his spare time, he also writes about computer related news and IT product reviews at his blog www.sapiensbryan.com.

Jerzy Surma is a Professor of Management Information Systems in Warsaw School of Economics. He completed IFP program at IESE Business School and Executive Program at MIT Sloan School of Management. In years 2011-2015, Dr. Surma was a visiting scholar at Harvard Business School and a visiting professor at University of Massachusetts Lowell. His research is focused on applying big data analysis (especially from social networks sites) for business applications. Professor Surma has been serving as editorial reviewer, track chair, and reviewer on many conferences, especially in Social Computing. Prior to his teaching career, Professor Surma was working in business consulting. He was vice president in IMG Information Management Poland, where he was responsible for ERP implementation, Business Process Re-Engineering, and Business Intelligence solutions.
About the Contributors

Marion Tenge is the Director of Corporate Development of Hanover Airport, Germany. She is a Doctoral candidate of the University of Latvia and University of Applied Sciences Kufstein, Austria. Her research interests focus on the convergence of social and technological networks, social business, social software, and social capital. Marion Tenge has lectured at universities in Germany and Austria and cooperates with universities on practical projects related to the aviation industry, while bridging science and managerial practice. She has more than ten years of experience in the travel industry holding different positions. Her responsibilities included among others the development of online distribution strategies and social software strategies for the hotel division of Europe’s leading travel group TUI.

Ramayah Thurasamy has an MBA from Universiti Sains Malaysia (USM). Currently, he is a Professor at the School of Management in USM. He teaches mainly courses in Research Methodology and Business Statistics. Apart from teaching, he is an avid researcher, especially in the areas of technology management and adoption in business and education. His publications have appeared in Computers in Human Behavior, Resources Conservation and Recycling, Journal of Educational Technology & Society, Direct Marketing: An International Journal, Information Development, Journal of Project Management (JoPM), Management Research News (MRN), International Journal of Information Management, International Journal of Services and Operations Management (IJISOM), Engineering, Construction and Architectural Management (ECAM), and North American Journal of Psychology. He is constantly invited to serve on the editorial boards and program committees of many international journals and conferences of repute. His profile can be accessed from http://www.ramayah.com.

Tuure Tuunanen is a professor in the Department of Computer Science and Information Systems at the University of Jyväskylä. He is also a global faculty fellow of the Center for Service Leadership at Arizona State University. He holds a DSc (Econ) from the Helsinki School of Economics. His research has been in the cross-sections of information systems, software engineering, and marketing science, and is interested in multi-disciplinary research in the area of service innovation. His current research interests lie in the areas of information systems development methods and processes, service engineering, and IT-enabled services. More about his research can be found at http://www.tuunanen.fi.

Eleni Tzoulia completed her postgraduate studies at the University of Heidelberg in the field of European Economic Law in 2006, and has participated in two traineeship programs in European Union institutions (European Parliament and European Ombudsman) between 2006 and 2007. Since 2008, she has been working as a legal advisor in Greece dealing mainly with commercial law and has been serving as a teaching assistant and research collaborator of the Technological Educational Institute (TEI) of Crete and the Greek National Center for Public Administration and Local Government (EKKDA). She is currently conducting scientific research with reference to Unfair Competition law on a PhD level, with relevant publications and lectures.

Eric Viardot is Director of the Global Innovation Management Centre and permanent professor of marketing and strategy at EADA Business School in Barcelona. He has a doctorate in management. He is a graduate of the HEC Business School, Paris, and the Institute of Political Sciences, Paris. He has been working in different marketing positions for Hewlett-Packard in France, Canada, and the US. He was then a financial director for a large international NGO in Asia and Central America. After that, he
joined Bain and Company as a senior consultant and had numerous assignments in Europe including a large international retail company. Eric Viardot has published various books and articles on strategic management and marketing. He is currently the co-editor of the *International Journal of Technology Marketing* and a member of the editorial board of *Technovation*. Eric Viardot teaches regularly in executive programs in Europe. He is an active consultant and trainer and has worked with several major multinational corporations.

**Amanda Xu** has been working in the field of content integration, analysis, and enhancement for highly esteemed academic libraries, library consortium, and online information service companies for over 18 years. She received her MS in 1992 from University of Illinois at Urbana-Champaign. She has been studying MS in Management and Systems at New York University for the past eight years. She regards herself as one of the millions of librarians defining the role of academic librarianship in information age as knowledge workers who are proficient in technology, information, and research, and making the strides to embrace changes in information technology and the way people search, discover, coordinate, understand, access, consume, and share information.

**Rachel Yager** is a Professor at the School for Business of Metropolitan College of New York. She specializes in developing strategies for using new emerging Web technologies to attain high impact business solutions. She is an engineer with specialization in electrical engineering, industrial automation, robotics and controls. She also has expertise in computational intelligence, knowledge engineering, and business analytics for decision support. With a Doctorate from French Ministry of Education—L’Association Nationale de la Recherche et de la Technologie (ANRT)—she earned her PhD in Computer Information Systems, and a Master’s Degree in Industrial Automation and Operations Management, from INSA de Lyon, Institut National des Sciences Appliquées de Lyon, France. She has a Bachelor Degree in Electrical and Electronic Engineering from the Nanyang Technological University of Singapore. Rachel has been an advisor to Fortune 100 senior executives in emerging technologies and new product R&D, helping companies to accelerate technology transfer from leading research and academic institutions. Rachel had directed Internet strategies and delivered client services for Citigroup, Lehman Brothers, and Ernst & Young. She has extensive experience in enterprise-wide financial services IT initiatives, enterprise architecture and engineering. She has served in the World Wide Web Consortium (W3C) advisory committee, and recently she was on the program committee of the IEEE conference on Computational Intelligence for Financial Engineering.

**Ronald R. Yager** has worked in the area of machine intelligence for over twenty-five years. He has published over 500 papers and 15 books in areas related to fuzzy sets, decision making under uncertainty, and the fusion of information. He is among the world’s top 1% most highly cited researchers with over 38,000 citations. He was the recipient of the IEEE Computational Intelligence Society Pioneer award in Fuzzy Systems. Dr. Yager is a fellow of the IEEE, the New York Academy of Sciences, and the Fuzzy Systems Association. He was given a lifetime achievement award by the Polish Academy of Sciences for his contributions. He served at the National Science Foundation as program director in the Information Sciences program. He was a NASA/Stanford visiting fellow and a research associate at the University of California, Berkeley. He has been a lecturer at NATO Advanced Study Institutes. He received honorary doctorate degrees, honoris causa, from the State University of Information Technologies, Sofia
About the Contributors

Bulgaria, and the Azerbaijan Technical University. He is a visiting distinguished scientist at King Saud University, Riyadh, Saudi Arabia. He is a distinguished honorary professor at the Aalborg University Denmark. He is an affiliated distinguished researcher at the European Centre for Soft Computing. He received his undergraduate degree from the City College of New York and his PhD from the Polytechnic University of New York. Currently, he is Director of the Machine Intelligence Institute and Professor of Information Systems at Iona College. He is editor and chief of the International Journal of Intelligent Systems. He serves on the editorial board of numerous technology journals.

Sharon Q. Yang works as Associate Professor and Systems Librarian in Rider University Libraries, New Jersey. In addition to her responsibilities for library systems, she teaches information literacy classes and serves as the library liaison to Rider Education Opportunity Program. Her research interests include next-generation catalog, discovery tools, library management platforms, and information literacy. Dr. Yang has given numerous presentations at conferences, published many journal articles, and actively serves on committees of professionals. She is the recipient of 2012 NJLA Research Award and 2012 CALA Award for Best Research in All Media.

Jasmine A. L. Yeap is a postdoctoral research fellow at the School of Management in Universiti Sains Malaysia (USM). Her research focuses primarily on the use and impact of technological innovations among individuals and organizations as well as the management of IT-based resources. Apart from that, she has also conducted studies in other areas ranging from consumer behaviour in the retailing industry, exporting to foreign markets, knowledge sharing, and service quality to instrument validation. Most of her works have been published in journals and presented at both local and international conferences.

Laura Zapata is currently associate professor of Management Department at EGADE Business School and Director of MBA Programs-Monterrey site since 2011. She teaches Business Strategy for the MBA program and Methodology and Strategy for the Doctorate of Business Administration. Her research work focuses in strategic management and knowledge management processes: generation and transfer. She has presented her research work at international conferences and has several publications in international journals, such as International Journal of Manpower, Estudios de Administración (Universidad de Chile), European Journal of International Management, and Journal of Knowledge Management. She has been distinguished with the 2008 Teaching and Research Award from Tecnológico de Monterrey, and The Carolina Fundation Posdoctorate Fellowship. Since 2009, Dr. Zapata is head of European Studies for Development and Competitiveness Research Chair, and since 2006, she is member of Mexico’s National Researchers System (CONACyT).

Ricardo Augusto Zimmermann received his degree in Management from the Federal University of Santa Catarina (UFSC), Brazil. He holds a Master’s in Management from the University of Aveiro, Portugal, and a Master’s in Business Administration from the National Service of Industrial Learning (SENAI), Brazil. Ricardo has management experience in companies in Brazil as a consultant and in senior positions, especially in the implementation of quality programs, strategic planning, costs management, and project management. He is ISO 9001 auditor and examiner of quality awards in Brazil. Currently, he is in the PhD program in Industrial Engineering and Management at Aveiro University.
