About the Contributors

**Pandian Vasant** is an Executive Editor of *Global Journal of Technology and Optimization* and Editor-in-Chief of *International Journal of Energy Optimization and Engineering*. His main research interests are in the areas of Optimization Methods and Applications to Decision Making and Industrial Engineering, Fuzzy Optimization, Computational Intelligence, and Hybrid Soft Computing. Pandian Vasant has co-authored 200 research papers and articles in national journals, international journals, conference proceedings, conference paper presentations, and special issues as lead guest editor, lead guest editor for book chapters’ project, conference abstracts, edited books, and book chapters. In 2009, Pandian Vasant was awarded top reviewer for the *Journal of Applied Soft Computing* (Elsevier). He has been Co-Editor for AIP Conference Proceedings of PCO (Power Control and Optimization) conferences from 2008 until 2013 and editorial board member of international journals in the area of Soft Computing, Hybrid Optimization, and Computer Applications. Google Scholar Citations: h-index is 17; i10-index is 28 (Citation Indices).

***

**Basir Alaqeband** was born in 1989, he received bachelor’s degree in Information Technology from the University of Kurdistan, Sanandaj, Iran, in 2013. Then he continued his studies in the field of Artificial Intelligence, particularly in OCR.

**Saima Ali** received her bachelor’s degree in Electronics Engineering from COMSATS Institute of Information Technology Abbottabad, Pakistan, in 2007. She did MS in Electrical Power Engineering from COMSATS Institute of Information Technology, Abbottabad, in 2012. Her current research interests include Nonlinear Adaptive Control, Embedded Systems, Artificial Intelligence, FACTS Controllers, and Power System Stability and Control.

**Hamid Allaoui** is currently a full professor (Professeur des Universités) at the University of Artois in France. After graduating with an engineering degree in Electro-Mechanical Engineering (option industrial maintenance) in 2000, he joined ST-MicroElectronics Company as a Manufacturing Engineer. He received a PhD in Computer Science and Management Science in 2004. His current research covers design, management, and optimization of supply chains, especially scheduling and planning of operations. He is involved in several research projects as well as projects with industrial companies dealing with creating a green supply chain. He has published in several international journals such as the *International Journal of Production Research*, *Journal of Computers and Industrial Engineering*, and *Operations Research*. 
Rabiah Badar received her Master’s degree in Electronics from Quaid-I-Azam University, Islamabad, in 2005. She did MS Computer Engineering from COMSATS Institute of Information Technology, Islamabad, in 2009. She is currently pursuing her PhD degree in Electrical Engineering from COMSATS Institute of Information Technology, Abbottabad, Pakistan. Her current research interests include Nonlinear Adaptive Control, Embedded Systems, Artificial Intelligence, FACTS Controllers, and Power System Stability and Control.

J. Behnamian was born in Hamedan, Iran on 20 October 1980. He obtained his PhD in Industrial Engineering from Amirkabir University of Technology, Tehran, Iran, in 2012. Currently, he is an assistant professor at Industrial Engineering Department, Bu-Ali Sina University, Hamedan, Iran. His main research areas are production scheduling, distributed systems, multicriteria decision making, and soft computing.

Khaoula Besbes has obtained, jointly, a Doctoral degree in Computer Engineering and Automatic from the University of Artois in France and a Doctoral degree in Quantitative Methods from the University of Sfax in Tunisia. She is a member of the research laboratory LGI2A (Laboratory of Computer Engineering and Automatic of Artois) at the Faculty of Applied Sciences in Béthune in France and a member of the research unit LOGIQ (Logistics, Industrial Management, and Quality) in the Higher Institute of Industrial Management in Sfax in Tunisia. Her research interest is in product-driven supply chain design.

Kouamana Bousson received a Master’s degree in Aeronautical Engineering from the Ecole Nationale de l’Aviation Civile (ENAC) in 1988, an MSc degree in Computer Science (majoring in artificial intelligence) from Paul Sabatier University in 1989, and a PhD degree in Control and Computer Engineering from the National Institute of Applied Sciences (INSA) in 1993, all in Toulouse, France. He received the Habilitation degree in Aeronautical Engineering in 2010 from the University of Beira Interior in Covilhã, Portugal. He was a researcher at the LAAS Laboratory of the French National Council for Scientific Research (CNRS) in Toulouse, from 1993 to 1995, and has been a professor in the Department of Aerospace Sciences at the University of Beira Interior, Covilhã, Portugal, since 1995. His current research activities include flight trajectory optimization and control, analysis and control of uncertain systems, neuro-statistical data processing, and chaotic dynamics.

Tianxing Cai is a researcher in the Dan F. Smith Department of Chemical Engineering, Lamar University. Tianxing specialized in the research fields of modeling, simulation, and optimization for the industrial operation, process safety and environment protection. His major research is the development of optimization models (Linear Programming, Quadratic Constraint Programming, Nonlinear Programming, Mixed Integer Programming, Relaxed Mixed Integer Programming, Mixed Integer Quadratic Constraint Programming, Mixed Integer Nonlinear Programming, Relaxed Mixed Integer Quadratic Constraint Programming) to realize the synthesis of energy and water systems, manufacturing planning, and scheduling and plant wide optimization. Besides that, he also involves the software application of Aspen, HYSYS, ProII, MATLAB, and gPROMS to conduct simulation and optimization for the process design, environment impact reduction, and safety assessment.

Carlos Magnus F. Carlson is a Full Professor at the São José do Rio Preto Technology College (FATEC, São José do Rio Preto, Brazil) since 2004. He holds a Doctorate degree in Electrical and Computer Engineering (State University of Campinas, FEEC/UNICAMP, 1998). His main research interest
About the Contributors

is the application of Operations Research techniques to the mobile telecommunications planning, steel industry, agro-industrial plants, and transportation. He also has been working as a consultant partner in the design of data structures for information and decision-support systems, fuzzy modeling, and optimization.

**Eric Châtelet** is Professor at Troyes University of Technology (UTT, France) from 1999. He received his PhD (1991) in Theoretical Physics (Cosmic Rays Physics) from Bordeaux I University, France, and has worked in Cosmic Rays and Neutrinos Physics until 1994. He was Director of studies of the UTT (2001-2004) and Director of Academic Programs (2005-2006). He was co-manager (2006-2007) of the national program of the National Agency of the Research in Global Security (UTT is in charge of the program management). He was vice-director (2009-2013) of the Charles Delaunay Institute (ICD, UMR CNRS from 2014, grouping the whole research teams of the UTT). He is the head of the “Sciences and Technologies for Risk Management” team from 2010 (UMR CNRS from 2010 to 2013). Its research is focused on stochastic modelling and optimization for maintenance and reliability, the performance analysis (risk) of complex systems and security analysis. He is member of the IMdR (French institute of risk management), of ESRA (European Safety and Reliability Association), and of the Scientific Council of the CSFRS.

**Huseyin Yıldırım Dalkılıç** is a Civil Engineer by profession and has worked as a Research Associate in the Civil Engineering Department of DEU Faculty of Engineering between 1998 and 2012. He received his BSc in Civil Engineering in 1997 and his MSc in 2001 and PhD in 2010. He is currently studying at Erzincan University as an Assistant Professor Doctor in division of Hydraulic, Hydrology, and Water Resources. His basic fields of research are hydrologic modelling, optimization of water power schemes, stochastic time series analysis, water resources economics, and planning and management. He is involved in a number of research projects in the relevant areas, supported by UNDP, EU, and TUBITAK, and many scientific papers and books in Turkish and English.

**Fatemeh Daneshfar** received BSc degree in Electrical and Computer Engineering from University of Tehran, Tehran, Iran, in 2003, and after several years work in industry, she received her MSc degree in Artificial Intelligence at the Department of Electrical and Computer Engineering in University of Kurdistan in 2009. Her research interest is on multi-agent systems and intelligent solutions for control systems. Mrs. Daneshfar is one of the UoK IEEE student branch stabilizers, and she is the chairperson of university of Kurdistan IEEE student branch from fall 2008 until fall 2009. She has been an academic member at University of Kurdistan (Iran) from fall 2010 until now.

**Marcos Antônio de Sousa** received his BSc degree in Electrical Engineering from the Federal University of Goiás (UFG) in 1996, the MSc degree in Electrical and Computer Engineering from the State University of Campinas Electrical and Computer Engineering at State University of Campinas (FECC/UNICAMP) in 1999, and the Doctorate degree in FECC/UNICAMP in 2004. He is professor in the Department of Engineering, Pontifical Catholic University of Goiás (ENG-PUC-Goiás) and in the Electrical, Mechanical, and Computer Engineering School, Federal University of Goiás (EMC-UFG), Brazil. He has experience in Electrical Engineering and Operations Research. His main research interests are mathematical modeling, optimization, decision-support systems, computational intelligence, economic engineering, and telecommunication systems.
Zigh Ehlem received the engineering degree from the National Institute of Telecommunications, Information Technologies and Communication of Oran, INTTIC, Algeria. She received the Master’s degree from the University of Sciences and Technology Mohamed Boudiaf of Oran-USTOMB, Algeria. She obtained the PhD in Electronic from the same university in 2014. She has been an Assistant Professor in Electrical Engineering at University of Mascara in Algeria from 2004 to 2006 and at INTTIC from 2006 until now. She is a member of the Research Team of Data, Signals, and Systems Laboratory in USTOMB. She is also a researcher member in a team of the laboratory of applied ICT at INTTIC. Her research interests focus on image processing, remote sensing, soft computing, and neural networks.

Umar Farid received his BSc degree in Electronics Engineering from COMSATS Institute of Information Technology Abbottabad, Pakistan, in 2010, and the MS degree in Electrical Engineering from COMSATS Institute of Information Technology Abbottabad, Pakistan, 2013. Currently, he is a lecturer in Electrical Engineering Department of COMSATS Institute of Information Technology Abbottabad, Pakistan. His current research interests include Nonlinear Control, Artificial Intelligence, and Power System Stability and Control.

Wirya Fathi was born in 1989. He received bachelor’s degree in Information Technology from the University of Kurdistan, Sanandaj, Iran, in 2012. Then he continued his studies in the field of Artificial Intelligence, particularly in OCR.

Virginie dos Santos Felizardo is currently a MSc Researcher in Assisted Living Computing and Telecommunications Laboratory, ALLab, a research laboratory within the Networks Group of the Instituto de Telecomunicações at the University of Beira Interior, Covilhã, Portugal. She graduated in Biomedical Sciences (University of Beira Interior, Covilhã, Portugal), and in 2010, received MSc in Electrotechnical Engineering, Bionic Systems (University of Beira Interior, Covilhã, Portugal). She is involved in researcher activities in the Department of Electromechanical Engineering at University of Beira Interior, Covilhã, Portugal. Her research interests include sensors for biomedical applications, biomedical instrumentation, health monitoring, medical signal acquisition, analysis, and processing.

Nuno M. Garcia holds a PhD in Computer Science Engineering from the University of Beira Interior (UBI, Covilhã, Portugal, 2008), and he is a 5-year BSc in Mathematics/Informatics (UBI, 1999-2004). He is Assistant Professor at UBI and Invited Associate Professor at the Universidade Lusófona de Humanidades e Tecnologias (Lisbon, Portugal). He was founder and is coordinator of the Assisted Living Computing and Telecommunications Laboratory (ALLab, Instituto de Telecomunicações, UBI). He was also co-founder and is coordinator of the BSAFE LAB, Law Enforcement, Justice and Public Safety Research, and Technology Transfer Laboratory (UBI). He is Head of EyeSeeLab in EyeSee Lda. (Lisbon, Portugal). He is also Chair of the COST Action IC1303 AAPELE, Architectures, Algorithms, and Platforms for Enhanced Living Environments. He is the main author of several international, European, and Portuguese patents. His main interests include next-generation networks, algorithms for bio-signal processing, and distributed and cooperative protocols.
Harish Garg is a Lecturer at Thapar University Patiala, India. Prior to joining Thapar University, Patiala, Dr. Garg received a PhD in Applied Mathematics with specialization of reliability theory and soft computing techniques, from Indian Institute of Technology Roorkee, India, in 2013, and an MSc in Mathematics from Punjabi University, Patiala, India, in 2008. His research interests are in the field of computational intelligence, reliability theory, optimization techniques, various nature inspired algorithms (e.g. genetic algorithms, swarm optimization), fuzzy and intuitionistic fuzzy set theory. Application areas include a wide range of industrial and structural engineering design problems. Dr. Garg is the author of over 44 scholarly publications in the top-tier reputed journals such as Applied Soft Computing, Expert Systems with Application, Computer and Industrial Engineering, ISA Transactions, Journal of Manufacturing Systems, International Journal of Uncertainty, Fuzziness and Knowledge-Based System, Journal of Intelligent and Fuzzy Systems, Journal of Industrial and Management Optimization, Mathematics and Computers in Simulation, Japan Journal of Industrial and Applied Mathematics, etc. He has also published three book chapters.

Gilles Goncalves, since 1994, is a full professor at the University of Artois. He studied Computer Science at the University of Lille1 and obtained his PhD in 1985. During 14 years, he was lecturer and his works concerned parallel and distributed computing. His current research interests include information systems, security management, simulation modelling, discrete optimisation, and metaheuristics. He manages a research laboratory named “LGI2A” whose main topics are organization and management of logistic processes. Sustainable aspects of the supply chain are taken into account in his works.

Güney Gürsel was born in 1972 in İzmir, Turkey. He graduated from Military Academy in 1994 as Systems Engineer. He had his MSc degree in Information Systems field in 2003 in Middle East Technical University (METU) and PhD in Medical Informatics field in 2012 again in METU. He is working in Department of Medical Informatics, Gülhane Military Medical Academy, as Medical Informatics Specialist. He speaks advanced English. He is working in the fields of Healthcare Information Systems (HIS), evaluation of HIS, end user expectations from HIS, fuzzy logic application in HIS, interoperability in HIS. He is married and has two kids.

Kristoko Dwi Hartomo is a lecturer in Department of Information Technology, Satya Wacana Christian University, Indonesia. He received his Bachelor of Information Technology from The Duta Wacana Christian University (INA), Master in Computer Science from Faculty of Mathematics and Natural Sciences, Gadjah Mada University (INA). Currently, he is a Doctoral student of Computer Science in Faculty of Mathematics and Natural Sciences, Gadjah Mada University (INA). His research interests are in the field of spatial modeling, GIS, database, and data mining. He has published several papers in international journals and conferences.

Yulin He received the PhD degree in Optical Engineering from Hebei University, China, in 2014. From August 2013 to August 2014, he served as the research assistant at Department of Computing, The Hong Kong Polytechnic University. Currently, he is a Post-doctoral Fellow at College of Computer Science & Software Engineering, Shenzhen University, China. His research interests include extreme learning machine, uncertain information processing, fuzzy reasoning, etc.
About the Contributors

Yanxing Hu received the degree of Master of Science from The Hong Kong Polytechnic University, Hong Kong, in 2011, where he is working toward the PhD degree in the Department of Computing. Currently, he is also serving as the research assistant at Department of Computing, The Hong Kong Polytechnic University. His research interests include the theory and application of neural networks, and rough set theory.

Gerrit K. Janssens received Degrees of MSc in Engineering with Economy from the University of Antwerp (RUCA), Belgium, MSc in Computer Science from the University of Ghent (RUG), Belgium, and PhD from the Free University of Brussels (VUB), Belgium. Currently, he is Professor of Operations Management and Logistics at the Hasselt University within the Faculty of Business Administration. Over the last 25 years, he has been many times Visiting Faculty in universities in Thailand, Vietnam, the Philippines, Cambodia, South Africa, Zimbabwe, and Suriname. His main research interests include the development and application of operations research models in production and distribution logistics. His teaching is in the fields of logistics, distribution (physical distribution and retailing), simulation, and operations research.

Laiq Khan received his BSc (Hons) degree in Electrical Engineering from Pakhtoon Kwah University of Engineering and Technology, Peshawar, Pakistan, in 1996 and his PhD degree (Power System Dynamics and Control) from University of Strathclyde Glasgow, UK, in 2003. Before PhD, he worked in Siemens Pakistan as a Field Engineer for two years. He worked as an Assistant Professor in the Faculty of Electronic Engineering Ghulam Ishaq Khan Institute of Engineering Sciences and Technology, Swabi, Pakistan from June 2003 to Feb. 2008. Then he joined the Faculty of Electrical Engineering COMSATS Institute of IT, Abbottabad, Pakistan and worked as an Associate Professor until June 2011. Currently, he is a Professor of Power System Dynamics and Control in COMSATS IIT, Abbottbad, Pakistan. His research interests include Power System Stability and Control using PSSs, FACTS Controllers and HVDC, Robust Control Theory, Intelligent Control Systems, Nonlinear Adaptive Intelligent Control and Adaptive Predictive Intelligent Control, Fault Tolerant Control, Power System Planning, and Advanced Optimization Techniques.

Goran Klepac, PhD, University College Professor; University College for Applied Computer Engineering Algebra in Zagreb, Croatia; works as a head of strategic unit in sector of credit risk in Raiffeisenbank Austria Inc, Croatia. In several universities in Croatia, he lectures subjects in domain of data mining, predictive analytics, decision support system, banking risk, risk evaluation models, expert system, database marketing, and business intelligence. As a team leader, he successfully finished many data mining projects in different domains like retail, finance, insurance, hospitality, telecommunications, and production. He is an author/coauthor of several books published in Croatian and English in domain of data mining.

Robert Kopal, PhD, is a Vice Dean for R&D at University College for Applied Computer Engineering Algebra in Zagreb, Croatia; University College Professor; lecturer at several university colleges in Croatia, and at CROMA (Croatian Managers’ and Entrepreneurs’ Association) EduCare Program; Chief Science Officer (CSO) at IN2data Ltd.; author and co-author of 8 books (on competitive intelligence analysis, game theory, etc.), numerous chapters in books of various authors, and more than 40 scientific and professional papers; workshop manager and trainer at more than 100 business and intelligence
analysis workshops; designer of several specialized IT systems; certified trainer in the area of structured intelligence analysis techniques and SW; member of SCIP and IALEIA; held presentations at various national and international conferences; participated in, and led a number of national and international intelligence analysis projects.

**Alfredo Lambiase** is Full Professor in Design and Management of Industrial Plants at Department of Industrial Engineering of the University of Salerno, Italy. He is President of the Spin Off University’s committee. His main research interests are: technical-economical issues in automation of discrete industrial processes; process simulation; vision system in not structured industrial environment; time, cost, and quality optimization in planning and management of complex industrial systems; use of parametric costs in evaluation of planning costs; maintenance in industrial systems; factory planning and control in complex manufacturing environment; ergonomic analysis across digital factory approach; applications of digital factory approach in optimization of manufacturing activities; virtual reality system in product developed and production planning; virtual factory applications for logistic optimization; and supply chain management.

**James N. K. Liu** received the PhD degree in Computer Science from La Trobe University, Melbourne, Australia, in 1991. He is currently an Associate Professor with the Department of Computing, The Hong Kong Polytechnic University, Kowloon, Hong Kong. He was a Research Scientist with the Aeronautical Research Laboratory, and the Defence Science and Technology Organizations, Australia, in the early 1990s. His research interests include forecasting technology, deep learning systems, uncertainty-based decision support, ontology modeling for content management, e-learning systems, and e-commerce development and applications. Dr. Liu was the Chairman of the IEEE SMC Hong Kong Chapter and Special Sessions Co-Chair of IEEE International Conference on Systems, Man, and Cybernetics (SMC) during 2012-13. He has been the Session Chairs including that of the IEEE ICDM International Workshop on Reliability Issues of Knowledge Discovery (RIKD’06, 08, 10, 12), International Conference on Fuzzy Systems and Knowledge Discovery (FSKD’09), and World Congress on Computational Intelligence (WCCI’08).

**Taicir Loukil** is the head of the research unit Logistique, Gestion Industrielle et de la Qualité. She worked as a chief of the department development and studied at the Office des Ports Aériens de Tunisie prior to joining the University of Sfax. She received her Doctorate from the Faculty of Economics and Management of Sfax, Tunisia. Her research activities include combinatorial optimization, multi-criteria optimization, and applications in scheduling problems. She acted as a guest editor of a special issue called “Developments in Multiple Objective Programming and Goal Programming” at *International Transactions in Operations Research* (ITOR). Taicir Loukil has authored or coauthored more than 20 scientific papers published in specialized reviews. She has supervised twenty PhD theses and more than 30 master theses. In 2003, she received the best paper award for the conference of the Administrative Sciences Association of Canada.

**Abhishek Majumder** received his BE Degree in Computer Science and Engineering from National Institute of Technology, Agartala, and MTech degree in Information Technology from Tezpur University, Assam, in 2006 and 2008, respectively. He is currently working as an Assistant Professor in the Department of Computer Science and Engineering, Tripura University (A Central University), Suryamaninagar, India. His areas of interest are wireless network and soft computing.
Arindam Majumer received his BE Degree in Mechanical Engineering from North Maharashtra University, Jalgoun, and ME degree in Mechanical Engineering (Machine Design) from Indian Institute of Engineering Science and Technology, Shibpur (Formerly Bengal Engineering and Science University, Shibpur) in 2007 and 2009, respectively. He is currently working as an Assistant Professor in the Department of Mechanical Engineering, National Institute of Technology, Agartala, India. His areas of interest are the effect of process parameters on the material properties of various materials during welding and machining, as well as nonlinear optimization.

Tharinee Manisri received her MEng and the DEng in Industrial Engineering from Kasetsart University, Thailand. She is the director of Supply Chain Intelligence Institute and an Instructor in the Department of Industrial Engineering, at Sripatum University, Thailand. Her research interests are in the areas of developing algorithms for complex, real-world logistic problems using heuristics and meta-heuristic techniques. She is also interested in simulation modeling and analysis. Her research is directly applicable to practical problems. Currently, she is working in the areas of developing algorithms for the vehicle routing problem.

Kunjal Mankad, PhD, has worked as senior assistant professor at Master of Computer Applications Department of Institute of Science & Technology for Advanced Studies & Research (ISTAR), Vallabh, Gujarat, India, from 2002 to 2013. She has been awarded Doctorate in Computer Science from Sardar Patel University, Vallabh Vidyanagar, Gujarat, India in October 2013. She received Master’s in Computer Applications from Saurashtra University, Rajkot, India, in 2001. Her research area is Genetic-Fuzzy System. She has published and presented several book chapters and research papers in peer reviewed journals and conferences. One of her research paper has received 2nd best paper award. She has also worked as member of board of studies of Sardar Patel University, Vallabh Vidyanagar. She is serving as a member of editorial board of many international computer science and engineering journals and served as program committee member for various international conferences. Her research interest includes software engineering, intelligent system design, and management information systems.

Ernesto Mastrocinque is a Research Fellow in the Simulation and Modelling of Supply Chain at the School of Management of Royal Holloway, University of London. Before joining Royal Holloway’s School of Management, he was a Research Fellow at the Department of Industrial Engineering of University of Salerno (Italy) and Visiting Researcher at the School of Engineering of Cardiff University (UK), where he worked on the development and application of swarm-based algorithm for supply chain optimisation. His research interests include modelling, simulation and optimisation of supply chain, intelligent manufacturing systems, single machine and job-shop scheduling, lean and agile manufacturing, swarm-based and meta-heuristic optimisation algorithms. He is an author of several papers in the field of operations management, technology and manufacturing systems, artificial intelligence. He also acts as a reviewer for international peer-reviewed journals and for book chapters. He received a Postdoctoral Research Fellowship and a PhD Scholarship from the University of Salerno. He received his Bachelor’s Degree and Master’s Degree in Mechanical Engineering (both cum Laude) and his PhD in Mechanical Engineering from the University of Salerno in 2006, 2008, and 2012, respectively.
Ujjwal Maulik is a Professor in the Department of Computer Science and Engineering, Jadavpur University, Kolkata, India, since 2004. Dr. Maulik has worked in Tsinghua University, China, 2007, University of Heidelberg, Germany in 2009, German Cancer Research Center (DKFZ) in 2010, 2011, and 2012, and ICM, Univ. of Warsaw, Poland in 2013. He has also visited many institutes/universities collaborative research. Dr. Maulik is a co-author of 7 books and more than 250 research publications. He is the recipient of GOI BOYSCAST in 2001, Alexander Von Humboldt Fellowship for Experienced Researchers in 2010, 2011, and 2012, and Senior Associate of ICTP, Italy, in 2012. He is in editorial board of reputed journals, including IEEE Transaction on Fuzzy Systems, Information Sciences, Protein & Peptide Letters. He is a Fellow of INAE, WAST, IETE, IE, and Senior Member IEEE. His research interests include Computational Intelligence, Bioinformatics, Combinatorial Optimization, Pattern Recognition, and Data Mining.

T. T. Mirnalinee is currently employed as a Professor in the Department of Computer Science and Engineering, SSN College of Engineering, Chennai, India. She completed her BE degree from Bharathidasan University, Trichy, India, and ME degree from College of Engineering Guidy, Anna University, Chennai, India. Then she obtained her PhD degree from IIT Madras in 2010. Her current areas of research interests are Data Mining, Computer Vision, Pattern Recognition, Artificial Neural Networks, and Soft Computing. She has published more than 30 technical papers in international and national journals and conferences. She has reviewed several papers in international journals and chaired several sessions in conferences. She has received Best Paper Award by Journal of Indian Society of Remote Sensing during the National Symposium on “Space Technology for Food and Environment Security” at New Delhi.

Leo Mršić, PhD, university college professor, graduated with a major in Insurance; earned Master of Science degree with a major in Business Statistics; earned PhD degree in Data Science all at University of Zagreb, Croatia. Combining business and technology approach has great field experience related to many industries like insurance, finance, ICT, business law, and project management, he has relevant top management and consulting experience participating in many projects across the supply chain with focus on retail. Active in conferences and guest lecturer on several university programs related to various aspects of business like management, consumer behavior, data science/data mining, and managing business risks, he is co-author on several books in area of data science and its application in business. He is a member of the board at Croatian Oracle Users Group, member and mentor at Young Executives Society in Croatia, and member of Croatian Association of Court Expert Witness in Croatia.

Anan Mungwattana is an Associate Professor at the Department of Industrial Engineering, Kasetsart University. His research interests include lean manufacturing system, logistics management, and quality management system. He received a PhD in Industrial and System Engineering from Virginia Tech, USA.

Michael Sylvester Packianather is a Senior Lecturer at Cardiff University, School of Engineering. His research interests are in the area of intelligent manufacturing systems, neural networks, pattern recognition, expert systems, fault diagnosis, quality control, signal processing, feature selection, data mining and machine learning, intelligent optimisation methods, bio-informatics, medical engineering, design of experiments, and micro/nano technologies. He has several journal and conference publications. He has managed a number of research projects and acted as a technical consultant to them. He has been involved in research collaboration networks between Europe-Asia and Europe-Latin America funded by the EU.
About the Contributors

He has given keynote lectures and guest lectures both in the UK and abroad. He is an Associate Editor of *IEEE Systems Journal*. He served as a steering group member of the Welsh Mechatronic Forum. He is a Chartered Engineer and Corporate Member of the British Institution of Engineering Technology (IET). He is a committee member of the IET South Wales Manufacturing & Management Technical Network.

**Duc Truong Pham** obtained his Bachelor of Engineering (Mechanical) degree with First-Class Honours, PhD degree, and DEng degree from the University of Canterbury, New Zealand. Between 1979 and 1988, he held a lectureship in Control Engineering at the University of Birmingham where his research focused on robotics and automation. In 1988, he joined Cardiff University following his appointment to the Chair in Computer-Controlled Manufacture there. In 1996, he founded the Manufacturing Engineering Centre at Cardiff University. Under his leadership, the centre won numerous awards for its innovative manufacturing research and industrial collaboration. Notable accolades include the Secretary of State for Trade and Industry’s First Prize for “success in building lasting research partnerships with industry” and the Queen’s Anniversary Prize for creating an “exceptional programme of support for firms” using the centre’s research expertise and state-of-the-art facilities. At Cardiff, his research encompassed the areas of intelligent systems and advanced manufacturing engineering. His projects covered topics such as knowledge-based systems for manufacturing design and quality control, robot vision and automated visual inspection systems, neural networks for non-linear systems identification and control, rapid prototyping and tooling, micro fabrication, virtual reality, and multi-media intelligent product manuals. He returned to the University of Birmingham in 2011 to take up the position of Head of the School of Mechanical Engineering and Chance Professor of Engineering.

**Danúbia Soares Pires** received the Bachelor in Electrical Engineering from Federal Institute of Education, Science and Technology, São Luís-MA, Brazil, in 2009 and Master’s degree in Electrical Engineering from Federal University of Maranhão, São Luís-MA, Brazil, in 2013. She is currently professor at the Federal Institute of Education, Science and Technology (IFMA), São Luís-MA, Brazil. Her research interest includes topics on fuzzy systems, genetic algorithm, applications in industrial automation and control.

**Nuno Pombo** is CTO at Qualify Just/IPS. He received the PhD in Computer Science from the University of Beira Interior (UBI, Covilhã, 2014). He was also co-founder and is coordinator of the BSAFE LAB – Law Enforcement, Justice, and Public Safety Research and Technology Transfer Laboratory (UBI). He is member of Instituto de Telecomunicações, UBI. He is also Member of COST Actions: TD1307 “European Model Reduction Network (EU-MORNET),” TC1307 “The European Network on Integrating Vision and Language (iV&L Net): Combining Computer Vision and Language Processing for Advanced Search, Retrieval, Annotation, and Description of Visual Data.” His current research interests include cloud computing, big data, data fusion, machine learning, ubiquitous computing, eHealth, clinical decision support systems, and model reduction methods.

**Sri Yulianto Joko Prasetyo** is a lecturer in the Department of Information Technology, Satya Wacana Christian University, Salatiga, Indonesia. He received his BSc in Biology from The Duta Wacana Christian University (INA) in 1995. He received his Master’s in Computer Science from Faculty of Mathematics and Natural Sciences, Gadjah Mada University (INA), in 2002, and Doctoral degree in
About the Contributors

Computer Science at Faculty of Mathematics and Natural Sciences, Gadjah Mada University, in 2013. His research interests are in the field of spatial statistic, GIS, simulation and modeling, data mining, and their applications. He has published several papers in international journals and conferences.

**Hindriyanto Dwi Purnomo** is a lecturer in Department of Information Technology, Satya Wacana Christian University, Indonesia. He received his BEng in Physic Engineering from Gadjah Mada University (INA) and Master’s of Information Technology from The University of Melbourne (AUS) and PhD from the Department of Industrial and Systems Engineering, Chung Yuan Christian University, Taiwan. His research interests are in the field of optimization, intelligence systems, and application of soft computing. He has published several papers in refereed journals, conference papers, books, and book chapters. He also serves as reviewer for a number of international journals.

**Abdelkader Rami** received, from Sidi Bel Abbes University of Technology, Algeria, his Dipl-Ing in Electrical Engineering in 2003, his Magister diploma in 2006, and his PhD in 2010. He is currently a Senior Researcher at Sidi Bel Abbes University. His research interests include reliability optimization, planning, and economics of electric energy systems, as well as optimization theory and its applications.

**Pjush Samui** is a professor at Centre for Disaster Mitigation and Management in VIT University, Vellore, India. He obtained his BE at Bengal Engineering and Science University, MSc at Indian Institute of Science, and PhD at Indian Institute of Science. He worked as a postdoctoral fellow at University of Pittsburgh (USA) and Tampere University of Technology (Finland). He is the recipient of CIMO fellowship from Finland. Dr. Samui worked as a guest editor in *Disaster Advances* journal. He also serves as an editorial board member in several international journals. Dr. Samui is editor of *International Journal of Geomatics and Geosciences*. He is the reviewer of several journal papers. Dr. Samui is a Fellow of the International Congress of Disaster Management and Earth Science India. He is the recipient of Shamshere Prakash Research Award for the year of 2011.

**Anasua Sarkar** has completed her Ph D work on Bioinformatics in Jadavpur University, Kolkata, India. She was also awarded EMMA-EPU fellowship, 2011, to pursue her research work at LabRI, University Bordeaux1, France. She is presently an Assistant Professor in IT Department, Government College of Engineering and Leather Technology, Kolkata, since 2007. She has published 10 original research papers in peer-reviewed journals. She is also a co-author in 11 book chapters and 16 conference papers. She is also reviewer in journals of *Parallel and Distributed Computing* (JPDC), Elsevier, and IEEE SMCC-C. She is also a Student member, ISCB, 2010-2011, SMIEEE since 2014, member CSTA, ACM Chapter, ACM IGUCCS, and IAENG. She has worked with INRIA MAGNONE group for 18 months in France for the expansion of Genolevures database for inclusion of PISO and ARAD species. Her research interests include Proteomics, Phylogenetics, Computational Biology, Pattern Recognition, Data Mining, Bioinformatics, Embedded, and Parallel Systems.

**Ginalber Luiz de Oliveira Serra** received the Bachelor and Master’s degrees in Electrical Engineering from the Federal University of Maranhão, São Luis-MA, Brazil, in 1999 and 2001, respectively. He received a PhD in Electrical Engineering from the State University of Campinas (UNICAMP), Campinas-SP, Brazil, in September 2005. He completed his Postdoctoral research in Neuro-Fuzzy Adaptive Control of Nonlinear Multivariable Systems, from Department of Machine, Components and Intelligent Systems,
State University of Campinas (UNICAMP), Campinas-SP, Brazil, in September 2006. He was researcher at the Department of Electrical Engineering, University of Santiago (USACH), Santiago, Chile, in 2006-2007. He is currently professor and head of the research group in Computational Intelligence Applied to Technology, at the Federal Institute of Education, Science and Technology (IFMA), Sao Luís-MA, Brazil. Dr. Serra is the author of the book *Frontiers in Advanced Control Systems* (InTech, 2012), and acts as reviewer for several international prestigious journals and conferences. His research interest includes topics on fuzzy systems, neural networks, evolutionary computation, control instrumentation for high-performance, real-time control, signal processing, applications in industrial automation and control.

**Li Shi** received his PhD in Computer Science from the University of Technology of Belfort-Montbéliard (UTBM), France, in 2013. He also holds a BS from the Hohai University, China, and a MS from the Beijing Jiaotong University, China. His main research interests lie in the field of combinatorial optimization, particularly in crew scheduling, vehicle routing, and job shop scheduling problems. He has published in journals and conferences that focus on the application of metaheuristics. He currently serves as a research and teaching fellow at the University of Technology of Belfort-Montbéliard.

**Bistok Hasiholan Simanjuntak** is a senior lecturer in Department of Agriculture and Business, Satya Wacana Christian University, Indonesia. He received his Bachelor in agronomy from Satya Wacana Christian University (INA) and Master’s in Soil Science from Bogor Agricultural Institute (INA) and Doctoral in Soil and Land Management from Brawijaya University (INA). His research interests are in the field of geographical information science and soil and land management. He has published several papers in journals and conferences.

**Kusuma Soonpracha** received Degrees of BEng and MEng in Industrial Engineering from Suranee University of Technology and Chulalongkorn University, respectively. She has been conducting a PhD in Industrial Engineering. Her major research focuses on developing the algorithms for solving real-world logistics problems. She has worked for a warehouse and logistics company as being in the managerial level. She is an executive partner of a value-added consulting firm emphasized on development of new strategy and improvement of the processes.

**Carlos Velosa** received the Licentiate’s and the Master’s degrees in Aeronautical Engineering from the University of Beira Interior (UBI) in 2009 and 2011, respectively, and currently, he is a PhD candidate in Aeronautical Engineering with emphasis on dynamical systems control at the same university, Covilhã, Portugal. He co-operated with OGMA (Alverça) and with LusoSpace (Lisbon), all in Portugal, in previous working experiences. His current research interests include chaotic systems, constrained nonlinear control, and state/parameter estimation. Eng. C. Velosa is Vice-President of the Armed Forces Communications and Electronics Association Students Club in Covilhã (AFCEA).

**Flávio Henrique Teles Vieira** received his BSc degree in Electrical Engineering from the Federal University of Goiás (UFG) in 2000, the MSc degree in Electrical and Computer Engineering from UFG in 2002, and the Doctorate degree in Electrical and Computer Engineering at State University of Campinas (FEEC-UNICAMP) in 2006. Since 2008, he has been a Professor at the Federal University of Goiás in Brazil. He acts in the following research areas: communication networks, network traffic modeling and control, and soft computing.
Megha Vora received her BSc degree in Computer Science and MCA (Gold Medallist) from Guru Ghasidas University, Bilaspur, India, in 2000 and 2004, respectively. She is currently pursuing her PhD from SSN College of Engineering, Anna University, Chennai. She has worked in Jadavpur University and IIT Madras on R&D projects sponsored by Department of Science and Technology and Defence Research and Development Organization. She has 14 publications in international and national journals and conferences. Her area of research includes Computer Vision, Ant Colony Optimization, Particle Swarm Optimization, Pattern Recognition, Soft Computing, Evolutionary Computation and Remote Sensing, and Image Analysis.

Xizhao Wang received the PhD degree in Computer Science from Harbin Institute of Technology in 1998. He is presently the professor at College of Computer Science & Software Engineering in Shenzhen University. His main research interests include fuzzy decision tree, learning from examples with neural network and extreme learning machine, multi-classifier fusion, and the recent machine learning with big data. He is an IEEE fellow.

Zheng Yahong was born on September 1984 in Macheng City, Hubei Province, China. She received his BS and MS degrees in Mechanical Engineering and Logistics from the Southwest Jiaotong University, China, in 2006 and 2008, respectively. She obtained her Doctor’s degree in 2013 from the Ecole Centrale de Lille in France. Now she is a lecturer at Wuhan University of Technology.

Baris Yuce obtained his BSc and MSc of Engineering (Industrial) degree with First Class Honours from Sakarya University. He has then been awarded his PhD degree from Cardiff University in 2012. During his MSc, he has also worked as a teaching and research assistant at Industrial Engineering Department, Sakarya University on 2006-2008. After he completed his PhD from Cardiff University, he started to work as a Research Associate at Cardiff University, School of Computer Science on 2012. In 2013, he then started to work in Institute of Sustainable Construction, School of Engineering, Cardiff University. His research interest focuses on intelligent systems, in particular intelligent optimisation algorithms, such as the Bees Algorithm, Genetic Algorithm, Ant Colony Optimisation, Hill Climbing, and Simulated Annealing. Further, he is interested in Intelligent Buildings, Energy Management Systems and Supply Chain Management. He has published several papers on intelligent systems and its applications in the area of Intelligent Systems, Optimisation, Supply Chain Management, Building Management Systems, and other Intelligent System Applications on Manufacturing Systems. He has worked on several EU and Building Research Establishment (BRE) funded projects on intelligent building management systems including SPORTE2, KnoholEM, Estate Energy.

Abdelkader Zeblah is Professor at Sidi Bel Abbes University of Technology (UDL, Algeria) from 1996. He received his BS in Electrical Engineering from Sidi Bel-Abbes University, Algeria, in 1990, MSc in 1994, and PhD in 2001 from the University of Sciences and Technology, Oran, Algeria. He is currently a Senior Researcher at Electrical Network Optimization (LORE) Oran University and researcher at LMS2 Lab Troyes University. His research interests include reliability optimization, planning, and economics of electric energy systems, as well as optimization theory and its applications.
