About the Contributors

Ettore Bolisani has a degree in electronic engineering ("Laurea") and a PhD in innovation studies at the University of Padua (Italy). He is associate professor at the Faculty of Engineering at the University of Padua. Prior to this position, he was assistant professor at the University of Trieste (Italy) and, in 1997, research fellow at PREST (University of Manchester–UK), where he conducted a research project funded by the European Commission on the developments of electronic commerce. His research centres on technology assessment and technology management, with an emphasis on information and communication technologies. He has worked in several research projects funded by the European Union, by Italian public institutions, and private organisations as well. His current interest focuses on the economic implications of knowledge management and electronic commerce. On such topics, he has published various articles in international journals and chapters in books, and has been editor of Special Issues.

* * *

Eileen G. Abels is Master's Program director and associate professor in the College of Information Science and Technology at Drexel University. Prior to joining the faculty at Drexel in January 2007, Dr. Abels spent more than 15 years at the College of Information Studies at the University of Maryland. Dr. Abels received her PhD from UCLA. Her dissertation work explored the information behaviors of scientists and engineers in Mexico. Her current research focuses on access to information in electronic environments, remote reference services, and automated question answering services. She teaches courses related to information access and access in electronic environments.

Jaesoon An is a research scientist in the Pervasive Technology Labs at Indiana University. She formerly worked at Microsoft and Samsung Electronics as a member of research and development division. She completed her master’s and doctoral programs in instructional technology at the University of Georgia and Indiana University-Bloomington, respectively.

Pierre Barbaroux is senior researcher at the Research Center of the French Air Force (CReA), in the Defense and Knowledge Management Department. He is also associate researcher at the GREDEG – UMR CNRS 6227, University of Nice – Sophia Antipolis, DEMOS laboratory. He holds a PhD degree...
in economics from the University of Nice – Sophia Antipolis. His privileged research fields are cognitive economics and complex adaptive systems theory. His current research interests focus on industrial organization, organization theory and innovation.

**Jengchung V. Chen** is assistant professor in telecommunications management at National Cheng Kung University, Tainan, Taiwan. He holds a PhD in communication and information sciences from the University of Hawaii. He has published articles dealing with privacy and trust issues in 20 refereed journals, including *Industrial Management and Data Systems, International Journal of Organizational Analysis, Information, Communication and Society, International Journal of Mobile Communications,* and *Labor Law Journal.*

**Kimiz Dalkir** is currently an assistant professor in the McGill School of Information Studies where she developed a specialization stream in knowledge management. Dr. Dalkir has published extensively on knowledge sharing and organizational memory challenges, including *Knowledge Management in Theory and Practice* (June 2005, Butterworth-Heineman). Dr. Dalkir pursues research on the effectiveness of knowledge processing in both profit and non-profit organizations, learning in peer networks, and measurement frameworks for assessing knowledge management success. Dr. Dalkir has developed and teaches courses on knowledge management, knowledge taxonomies, intellectual capital management, and communities of practice, and was awarded the Distinguished Teaching Award in 2007.

**Margarita Echeverri** is a research assistant professor at the School of Public Health and Tropical Medicine at Tulane University. Before this position, Dr Echeverri was the coordinator of the master in information management at the College of Information Studies at the University of Maryland and currently teaches as adjunct professor in the same program. Dr. Echeverri received her PhD in international development from Tulane University, and is a specialist in information technology and social management, with experience in national and international organizations in administration and organizational analysis, design, and implementation of information systems, electronic libraries, virtual classrooms, and WEB-based training. Her interests focus on the use of information technology to foster knowledge transfer, education, health, and research, as the main pillars for social development.

**G. Scott Erickson** is associate professor and chair of marketing/law in the School of Business, Ithaca College. He holds a PhD from Lehigh University. Research interests include knowledge management, intellectual property, and trade secrets. His book with Helen Rothberg, *From Knowledge to Intelligence: Creating Competitive Advantage in the Next Economy,* was published by Butterworth-Heinemann/Elsevier in 2005.

**Samer Faraj** is associate professor in the Desautels Faculty of Management, McGill University. He received his doctorate in MIS from Boston University’s School of Management and an MS in technology and policy from MIT. Prior to getting his doctorate, he spent a decade working in a variety of consulting and IS positions. His research interests include the coordination of expertise in software development and health care, the development of online knowledge communities, and the organizational impact of IT. His work has appeared in journals, such as *Information Systems Research, Management Science, MIS Quarterly, Journal of Applied Psychology, IEEE Transactions on Engineering Management, Journal of Strategic Information Systems,* and *Information Technology & People.* He is senior editor at *Organization*
Science, an associate editor of Information Systems Research and on the editorial board of Information and Organization. In addition, he is currently coediting the special issue of Organization Science on IT and organizational form and function. He has received three NSF grants and a Fulbright award.

Elli Georgiadou is a principal lecturer in software engineering at the School of Computing, Middlesex University, London. Her teaching includes software quality, software measurement (metrics & estimation), methodologies, case, project & knowledge management, and software development. She is engaged in research in software measurement for product and process improvement, methodologies, knowledge management, metamodelling, cultural issues, and software quality management. She is a member of the university’s Global Campus project (developing and offering ODL). She has extensive experience in academia and industry, and has been active in organising/chairing conferences and workshops under the auspices of the British Computer Society and the ACM British Chapter. She is her school’s coordinator of european activities, projects and international exchanges.

Cécile Godé-Sanchez holds a PhD degree in economics from the University of Aix-Marseille III. She is currently senior researcher at the Research Center of the French Air Force (CReA), in the Defense and Knowledge Management Department. She is also associate researcher at the GREDEG – UMR CNRS 6227, university of Nice – Sophia Antipolis, DEMOS Department. Her privileged research fields are information systems management and technological change. Her current researches focus both on the cultural aspect of technological change and the coordination in network-centric organizations.

Deogratias Harorimana is a PhD student and part-time lecturer at Southampton Solent University (UK). Prior to that, Deogratias worked for some of the largest organisations in Africa and Europe. These include The American Rescue Committee and United Nations. Deogratias graduated in business information management. His doctorate’s primary research focuses on the “Role of Gatekeepers in the Knowledge Creation and Transfer Process.” He publishes in the area of knowledge gatekeepers, knowledge networks and communities of practice, identity formation, and impact of culture on knowledge transfer. Deogratias chairs the United Kingdom’s Royal Geographical Society and the Institute of British Geographers Post Graduate Research Group, as well as a member of the Higher Education Research Group Committee of the Royal Geographical Society and the Institute of British Geographers. Harorimana is a member of the European Institute of Development Studies, a member of organising committee of the European Conference of Knowledge Management and a regular speaker and reviewer to the European Conference at Knowledge Management. Harorimana is the co author of the book “Le Café et les Caféiteurs du Rwanda, quels Sont les motivations?” Publibook, Paris (Forthcoming).

Anthony Ioannidis is an assistant professor of management at the Department of Business Administration, Athens University of Economics and Business, Greece. He has previously taught at the University of Patras, Greece, University of La Verne California, Athens Campus, and Baruch College, The City University of New York. He holds a BS from the University of Athens, Greece, and, an MBA, an MPhil, and a PhD from Baruch College, The City University of New York. He also possesses working experience as management consultant with leading consultancy firms in the United States and Greece, in the areas telecommunications, media, and technology. His current research interests include strategy formation, organizational design, knowledge management, reputation management and the role of CEO, and public-private partnerships.
Isa Jahnke, Dr. phil., studied social science in Germany. After this, she worked 3 years at a consultancy company. Later, from 2001 until 2004 she began her research in the field of socio-technical knowledge management and online communities at the University of Dortmund, Department Computer Science and Sociology. After her PhD, she moved as research assistant to the University of Bochum, Department of Information and Technology Management (IMTM). She works and researches about socio-technical systems, computer-supported cooperative work, as well as collaborative learning, and in particular knowledge management and cultivating Web-based communities. Further information: http://www.imtm-iaw.rub.de. Contact: isa.jahnke@rub.de

Shuhua (Monica) Liu is now a PhD Candidate in the Information School, University of Washington (Seattle, WA, USA). She graduated from Nankai University, China in 2002 with a master in management. She also got her bachelor in information sciences and bachelor in economics from Nankai University in 1999. Before coming to the University of Washington to pursue her research in knowledge management and employee knowledge sharing, Shuhua (Monica) worked as an assistant manager in Bridgestone China in Tianjin City and then a journalist in international news reporting in Xinhua News Agency, Beijing between 1999 and 2003. Shuhua (Monica) is now working on her doctoral dissertation on employee knowledge sharing and system integration. She will specifically investigate organizational factors influencing employees’ decisions in sharing knowledge and organizational processes that challenge business process reengineering efforts facilitated by mobile information systems.

Sheetal Narayanan is a graduate student in the School of Informatics. After completing the requirements for the computer science master's degree, she is pursuing her second master's in human computer interaction. She is a research assistant for professor David Wild.

Axel-Cyrille Ngonga Ngomo was born in 1983. He received his diploma (MSc) in computer sciences from the University of Leipzig in 2004 with a thesis on the theoretical foundations of information spaces. He is currently completing his doctoral studies at the same university. His domains of interest include knowledge management, knowledge-free natural language processing, extraction techniques for terminological ontologies and their practical application in the domain of business information systems.

Stavros T. Ponis is a lecturer in the Section of Industrial Management and Operations Research of National Technical University Athens (NTUA), where he is teaching a number of courses in a graduate and post graduate level (supply chain management, e-commerce and management of information systems among others). Dr. Ponis is also an expert reviewer for the European Community, the general secretariat of research and development and the Greek Information Society S.A.. His current research interests and publications move around the areas of virtual enterprises, knowledge logistics for empowering supply chain effectiveness and performance, UML and agent modelling, e-commerce, and supply chain management systems.

Muhammad A. Razi is associate professor of computer information systems at Western Michigan University, Kalamazoo, Michigan. He has published papers in various topics. His research appeared in several academic journals, including Journal of Small Business Strategy, International Journal of Industrial Engineering, Logistic Information Management, International Journal of Manufacturing Technology and Management and others.
Helen Rothberg is associate professor of strategy in the School of Management, Marist College. She holds a PhD from City University Graduate Center. She is also the principal consultant for HNR Associates, a network of knowledge focusing on strategic change, competitive intelligence, and knowledge management challenges. Her research interests include competitive intelligence and knowledge management.

Enrico Scarso received a degree in electronic engineering and a PhD degree in industrial innovation from the University of Padua. He is associate professor of engineering management at the University of Padua. His current research interests include economics and management of technology, and knowledge management. He has published in several journals and has presented various papers at international conferences. He is a member of IAMOT (International Association for Management of Technology) and IEEE (Institute of Electrical and Electronics Engineers – Engineering Management Society).

Kalpana Shankar is an assistant professor of informatics at Indiana University School of Informatics. She has a BS in molecular biology from Princeton University and a PhD in library and information science from the University of California, Los Angeles. She has worked in database design and management and government program evaluation. Her areas of expertise include data and knowledge management in research science, data sharing and research ethics, and the use of emerging technologies in establishing and maintaining communities of practice.

Sam S. Shoulders is a graduate student in the School of Informatics at Indiana University-Bloomington, completing his requirements in the master's degree program in human-computer interaction/design. His interests include context-aware computing, information security, and information searching in complex systems.

Evangelia Siachou is a PhD candidate at the Department of Business Administration, Athens University of Economics and Business, Greece. She holds a bachelor degree in international and European Studies from the Panteion University of Athens and an MSc in Industrial and personnel management from the London School of Economics. She possesses training experience in the DG Development of European Commission and work experience in the Strategic Planning Department of ATHOC 2004 (Athens Olympic Games). Her current research interests include knowledge transfer, business model innovation, and strategic human resources management.

Kerstin Siakas is an assistant professor at the Department of Informatics at the Alexander Technological Educational Institution of Thessaloniki, Greece since 1989. Her teaching includes management information systems (project & knowledge management), information society and software quality assurance. She is the project leader of the Entrepreneurship programme in the University and European coordinator of activities and exchange in the department. She has extensive experience in industry regarding development of large Information Systems projects in multicultural environments. She has a PhD in software quality management from London Metropolitan University. Her research spans a range of issues in information systems quality management, knowledge management and information society, in particular in human and cultural aspects, but also in pedagogic issues, such as technology based distance learning.
About the Contributors

J. Michael Tarn is associate professor of computer information systems at Western Michigan University, Kalamazoo, Michigan. He holds a PhD and an MS in information systems from Virginia Commonwealth University, Richmond, Virginia. He taught at Chowan College, North Carolina for 3 years before he became a member of Broncos in Summer 1999. Dr. Tarn is the major adviser and coordinator for the new interdisciplinary and inter-collegial telecommunications & information management (TIM) program.

Ilias P. Tatsiopoulos is a professor in the School of Mechanical Engineering - National Technical University Athens (NTUA). He has been a member of the Senate of NTUA and he serves in the Editorial Board of the Production Planning & Control Journal. His research interests move around supply chain management and enterprise information systems.

June Tolsby works as a project manager, researcher and lecturer at Ostfold University College, Faculty of Engineering. June Tolsby holds a BSc in Computation from UMIST (University of Manchester Institute of Science and Technology, UK) and a MA within ESST (Education in Society Science and Technology) from Oslo University. She has worked as a programmer, consultant, and researcher for 18 years within various organizations in Norway. She affiliated with Aalborg University, Department of Business Studies in Denmark as a PhD student. Her research topics cover grounded theory, use of ICT, organizational learning and communication, learning theories, product development and design.

George Vagenas is a mechanical engineer of the National Technical University of Athens (NTUA), who specialized in industrial engineering. He is also a doctoral researcher in the Sector of Industrial Management and Operational Research of the NTUA’s Mechanical Engineering School. His current research interests include the areas of supply chain management and knowledge management, with an emphasis on Web-based technological support.

Molly Wasko is an associate professor in the Department of Management Information Systems at Florida State University where she teaches primarily strategic information technologies, corporate information security, and research methods. She received her doctorate in MIS from the University of Maryland, College Park, and she holds an MBA from Averett University. Prior to getting her doctorate, she spent 8 years working in production and operations management. Her research interests include the intersection of digital and social networks, social network analysis, the development of online communities, and open source software projects. Her work has appeared in the Journal of Strategic IS, Decision Sciences, MISQ, JAIS, JCMC and JITTA, and has been presented at ICIS, ECIS, AOM, and AMCIS. She is a member of the Academy of Management, AIS and INFORMS.

David Wild is an assistant professor of informatics at Indiana University School of Informatics. After graduating with a BSc in Computing Science from Aston University, U.K., he completed a PhD and postdoctoral research in Information Studies at Sheffield University, U.K., specializing in chemical information handling. He worked for 6 years in the pharmaceutical industry, applying informatics techniques to science and drug design, before joining the School of Informatics in 2004.

Giuseppe Zollo is full professor of business and management at the Faculty of Engineering of the University of Naples Federico II, Italy and director of the Center for Communication and Organizational
Innovation at the University of Naples Federico II. During the years 1985-86 he was visiting research associate at the Dept. of Economics of Northeastern University, Boston (MA), USA. His research interests include Management of Technological Innovation, Small Innovative Enterprises, Information Technology Management, Competencies Management, soft computing for business and economics. He received several awards for his scientific activity such as: Entrepreneurship Award from the Universitat Autonoma de Barcelona (1992); RENT Award from the European Institute for Advanced Studies in Management, Brussels (1993, 1995, & 2000); Best Paper Award from FGF Universitat of Dortmund (1994); European Quality Award for research on T.Q.M from EFQM (1997), 2005 GITM conference Best paper award. He is Vice President of the International Association for Fuzzy Sets Economy and Management (SIGEF) and serves as editorial board member in the Fuzzy Economic Review, the Journal of Information Technology: Cases and Application, and the Journal of Global Information Technology Management. He is coauthor of the book Organizational Cognition and Learning Building Systems for the Learning Organization (ISP 2007).
