About the Contributors

**Shang Gao** is an Associate Professor through the School of Business Administration with Zhongnan University of Economics and Law, China. He obtained his PhD (2011) in Information Systems from the Norwegian University of Science and Technology (NTNU), and his MSc (2006) in Engineering and Management of Information Systems from the Royal Institute of Technology (KTH), Sweden. His research interests include mobile information systems, technology diffusion, business process modeling, and information systems modeling. He has published more than 30 refereed papers in journals, books and archival proceedings since 2006.

**Lazar Rusu** is a Professor of Computer and Systems Sciences with Stockholm University, Sweden. He holds a PhD in Management from the West University of Timisoara, Romania and the title of Docent in Information Systems from the Royal Institute of Technology (KTH) in Stockholm, Sweden. His primary research interest is in IT management, an area in which he boasts over 25 of professional experience. He is Co-Editor of the International Journal of Knowledge Society Research and the Associate Editor of the International Journal of IT/Business Alignment and Governance.

**Deepa Varghese Baby** is the Operations and IT Director for an international NGO based in Cambridge, MA, where she is responsible for operational and technical management of the company. Her areas of interest include agile project management, business analytics, and IT strategy. Her research has appeared in the International Journal of Information Technology and Decision Making. She holds an MBA with a specialization in Information Systems and Operations Management from the University of Massachusetts, Boston. She has several years of work experience in project management, IT infrastructural setup, and vendor management.

**Anna Bengtson** is an Associate Professor and Senior Lecturer at the Department of Business Studies, Uppsala University. Her research interest lies in the area of industrial and international marketing, focusing especially on studies of business change from a network perspective.

**Linda Bergkvist** earned her PhD from the Karlstad Business School, Sweden where she is currently a Senior Lecturer in the department of Information Systems. Her major research interests include information systems (IS), distributed IS development projects, IS outsourcing management, management of distributed IS development processes, and remote leadership. She is also engaged in looking at co-creation of value in inter-organisational relationships and cross-boundary innovation. This includes the integration of various fields of expertise for the improvement of inter-organisational collaboration in distributed IS development projects.
**Roger Blake** is an Associate Professor in the College of Management’s Department of Management Science and Information Systems at the University of Massachusetts, Boston. His primary areas of interest are related data mining, data and information quality, text analysis, and predictive analytics. His research has appeared in numerous journals including Behaviour & Information Technology, the Journal of Information Technology Theory and Application, and the ACM Journal of Data and Information Quality. He holds an MS from the Massachusetts Institute of Technology and a PhD from the University of Rhode Island. He has also worked for over twenty years in line management and consulting, specializing in the areas of operations research and business analytics.

**Michael A. Chilton** is an Associate Professor of Management Information Systems at Kansas State University. He received his PhD from the University of Arkansas. His research interests include project management, systems analysis and design, knowledge management, IT personnel and performance metrics, and IT pedagogy. He has published in a variety of journals including the *Journal of Management Information Systems*, the *Database for Advances in Information Systems* and the *Journal of Information Systems Education*, among others.

**Andreas Drechsler** holds a PhD from the Institute of Computer Science and Business Information Systems at the University of Duisburg-Essen in Germany, where he is currently a Postdoctoral Researcher. His research focuses on understanding and enhancing current practices in areas of IS/IT management and IT project management with an emphases on agile methodologies and the context of small and medium enterprises.

**Georg Hodosi** is a Lecturer with the Department of Computer and Systems Sciences at Stockholm University. He holds an MSc in Engineering from Lund University, an MSc in Education in Technology and Mathematics from Stockholm Institute of Education, and a PhLic in Computer and Systems Sciences from Stockholm University. He has more than 25 years of professional experience with mobile communication companies such as Ericsson and Mannesmann, where he gained experience in strategic sourcing, project management, quality assurance, line management and software development. His primary research interest is in IT outsourcing.

**Sid Huff** is Professor Emeritus of Information Systems at Victoria University of Wellington, New Zealand and at the Ivey Business School in Canada. He received his PhD in Information Systems from the MIT Sloan School of Management. His teaching and research address IS strategy, IT governance, and IS management. His work has appeared in numerous academic and practitioner journals, including *MIS Quarterly, Information Systems Research, Journal of MIS, Journal of Strategic Information Systems*, and *Communications of the ACM*. He recently served as Senior Editor for *Information Systems Management Journal* and *Journal of Information Technology*, and as Associate Editor for *MIS Quarterly*. He has also written over sixty teaching cases for educational use.
Tomas Jansson has been teaching Project Management at Karlstad University since 2002, and he is currently preparing his doctoral thesis. Prior to joining the university, he acquired 23 years of professional experience, including fifteen years with Ernst & Young and eight years with the Ericsson Telecom group. At Ericsson, he was responsible for the development of its world-wide project management training school, and he was one of two main authors of Ericsson’s project management model PROPS. He is also co-author of three project management textbooks, one of which was awarded the Project Management Book of the Year prize in 2011 by Svenskt Projektforum (the Swedish IPMA association).

Robert Kaye holds a Master of Science in Computer Science from the Royal Institute of Technology, Sweden. He has professional experience in both the telecommunications and information technology industries, specializing in customer communication, operations, and support. He is currently working in the motor vehicle industry and contributing to the design of a world class global software support structure.

Konstantinos Koukaditis is a Research Associate at the University of Piraeus in the Department of Digital Systems. His research focuses on Service Oriented Architecture (SOA) and especially SOA Governance in Healthcare Information Systems (HIS). Koukaditis holds a Bachelor’s degree in Electronic Engineering from the University of Portsmouth, UK, a Master’s degree with specialization in Electronics and Digital Systems from the University of Hertfordshire, UK, a Master’s degree in Engineering Management with honors from Brunel University, UK and a Ph.D. from the University of Piraeus, Greece. In the past, he has worked as an educator of new technologies/ICT in numerous settings, including primary education and public colleges. He has also worked as a Seminar Trainer in various management/IS/HIS subjects. He has presented his research through various international conferences and published numerous journal articles and book chapters, focusing on IS, SOA, SOA Governance, and HIS. His research interests include digital health services, HIS, EHR, SOA, SOA & Cloud Computing, Governance, IS and IS management.

John Krogstie holds a PhD (1995) and a MSc. (1991) in Information Systems from the Norwegian University of Science and Technology (NTNU), where he is currently a full Professor in Information Systems, leading the lighthouse on Open, Autonomous Digital Ecosystems (OADE) and the Information Systems group. John Krogstie is the Norwegian representative for IFIP TC8 and Chair of IFIP WG 8.1 on Information System Design and Evaluation (2010-2015). His research interests are information systems modelling, quality of models and modelling languages, eGovernment and mobile information systems. He has published over 200 refereed papers in journals, books, and archival proceedings since 1991.

One-Ki (Daniel) Lee is an Associate Professor in the College of Management’s Department of Management Science and Information Systems at the University of Massachusetts, Boston. His research interests include IT-enabled organizational agility, agile project management, knowledge management, and IT controls. His work has appeared in several journals such as Communications of the ACM, Information and Management, Journal of Global Information Management, Online Information Review, and International Journal of Information Technology and Decision Making. He holds an MS from the Korea Advanced Institute of Science and Technology and a PhD from the City University of Hong Kong. He also has several years of work experience as a project manager and consultant in the areas of information systems design and development.
About the Contributors

Emilene R. Leite is a PhD candidate in the Department of Business Studies, Uppsala University, Sweden. Her dissertation work concerns business networks’ inclusion of non-business actors in emerging economies, focusing especially on the Brazilian market. She holds a Master degree in Economics from Stockholm University, Sweden and a MBA in Marketing Management from University of Gävle, Sweden.

Marco Liberato received a Master’s Degree in Information Technology from the University of Trás-os-Montes e Alto Douro (UTAD), Portugal in 2007. His master’s thesis was “Implementation of the CMMI model in Espírito Santo Informática.” His main professional interests include system analysis, process and quality assurance, technical solution and requirements, definition and management. He has participated in two CMMI SCAMPI for maturity level 2 and maturity level 3 certifications. His research focuses on the definition and implementation of quality processes and methodologies based in international benchmark models for the maturity of organizational processes such as CMMI and Lean.

Paulo Martins received a BEng in Electric Engineering in 1992 from the University of Trás-os-Montes e Alto Douro (UTAD), Portugal, a MEng in Computer and Electric Engineering in 1996 from the University of Porto, Portugal, and a PhD in 2005 from UTAD, where he is currently an Assistant Professor lecturing on database systems and programming. The subject of his doctoral thesis was, “A model for distance learning in environments that support mobility.” His main research interests are Distance Learning, Mobile Environments, virtual worlds, data warehouses, and data mining. Martins has published extensively in the scientific field with articles in peer-reviewed conferences, journals, and books.

Joe McDonagh is an Associate Professor of Business at the University of Dublin, Trinity College where he also serves as Director of Doctoral Studies. He teaches at the University of Dublin, the Irish Management Institute and a number of international business schools. He holds a B.Sc. in Computer Science and a M.A. from the University of Dublin, a MBS in Management and Information Systems from the National University of Ireland, and a PhD in Organization Development and Change from the University of Warwick. He also holds FBCS and CITP qualifications. He is a regular conference speaker and contributor to the media whilst also publishing widely on the dynamics of large-scale change. McDonagh has published a wide range of conference papers, book chapters, journal articles, and government reports. Specific journals include Administration, Communications of the AIS, Irish Journal of Management, Organization Development Journal, Public Administration Quarterly, and Strategic Change.

Andreas Nilsson holds a PhD in Computer and Systems Sciences and works at Intelleqt AB as Head of Research & Innovation. His main interest lies in industry transformation towards platform-based innovation systems and platform strategies. Andreas has combined academic and industry work since 2001, playing an active role in several company start-ups. Additionally, he has served numerous research initiatives as advisor, researcher, and manager.

Pouyan Parvahan works as a consultant for Cassini Consulting GmbH, a management and technology consultancy in Germany. His main focus is national and international consulting projects in the areas of Enterprise Architecture Management and Project Portfolio Management. After earning his Bachelor’s Degree in Systems Software Engineering and his Master’s Degree in Information Systems, Parvahan started his career as a consultant with Deloitte Consulting. He is currently a PhD candidate with the Department of Information Systems and Strategic IT Management at the University of Duisburg-Essen, Germany.
Diane Strode is a Senior Lecturer in the Faculty of Business and Information Technology at Whitianga Polytechnic in New Zealand. Her teaching concerns behavioral and technical aspects of systems development. Her research concerns the development and testing of theory pertinent to agile software development. She has published in The Journal of Systems and Software and in the proceedings of HICSS, AMCIS, PACIS, ACIS, ISTA, and CRIWG. She is currently a committee member of the CRIWG. She received a Best IS Thesis Award for 2013 from the Professors and Heads of Information Systems in New Zealand. She has a BSc (Computer Science) from the University of Melbourne, a MInfSc (Information Systems) from Massey University, and a PhD (Information Systems) from Victoria University of Wellington.

Marinos Themistocleous is an Associate Professor in the Department of Digital Systems at the University of Piraeus, Greece. He holds a BSc in Computer Science, a Postgraduate Degree in Teaching and Learning in Higher Education, a MSc in Information Systems Management, and a PhD in Informatics. Before joining the University of Piraeus, he worked as a Senior Lecturer at Brunel University, UK. He has many years of experience working within the computer industry and has worked as a consultant for numerous firms. He has received numerous awards for his publications, which include several teaching textbooks, internationally refereed journal papers, and conference articles. He currently reviews research proposals submitted to the European Union and other international funding bodies. His research interests include Information Systems, Information Systems Management, Service-Oriented Architectures, e-business, and Net-Centric Information Systems.

João Varajão is a Professor of Information Systems and Project Management at the University of Minho. His primary research interests are information systems management and project management. He has authored and edited several refereed publications, including books, book chapters, and international conference papers. He currently serves as Editor-In-Chief, Associate Editor, and Editorial Board Member for several international journals. He has also served on numerous committees of international conferences and workshops.

Ilker Yakın is an Assistant Professor of Computer Education and Instructional Technology at Mersin University in Turkey. He received a PhD in Computer Education and Instructional Technology from the Middle East Technical University in 2012. His research interests include Human Performance Technology, social media in education, technology integration, design, development, and evaluation of learning and performance technology tools, electronic performance support systems, and pre-service teacher education.

Xiaohui Zhao has worked as an Assistant Professor in Information Systems at University of Canberra, Australia since 2012. He received his PhD from Swinburne University of Technology, Australia in 2007. He served as a lecturer in the Department of Computing at Unitec Institute of Technology, New Zealand from 2011 to 2012 and received a TechNZ Grant from the Ministry of Science and Innovation, New Zealand. His research interests include business process modelling and analysis, service composition, and outsourcing. He has published over 50 papers in prestigious journals and conferences.
